Disclaimer

This Presentation (the “Presentation”) has been prepared by EnCap Investments L.P. (“EnCap”) and is being delivered on a confidential basis in connection with EnCap’s annual Investor Conference for informational purposes only to current investors in existing EnCap funds. The information contained in the Presentation is confidential and its treatment is governed by the terms of the operating agreements of the applicable EnCap fund. Any reproduction or distribution of the Presentation, in whole or in part, or the disclosure of any portion of its contents, without the prior written consent of EnCap, is strictly prohibited. By accepting delivery of the Presentation, each recipient agrees to the foregoing and acknowledges on behalf of itself and its affiliates the following restrictions, limitations and qualifications.

The distribution of the Presentation does not constitute an offer to sell or a solicitation of an offer to buy interests in any fund managed or sponsored by EnCap and shall not be deemed to be any such offer or solicitation. Any such offer or solicitation will be made only pursuant to a confidential private placement memorandum of such fund, which will describe the terms and conditions of an investment in such fund, certain risks related to an investment in such fund, and set forth such fund’s subscription documents.

Certain information contained herein has been obtained from published or unpublished sources prepared by other parties not affiliated with EnCap. Neither EnCap nor its affiliates have verified any finding in the information attributed to a third-party herein and recipients of the Presentation should make their own independent investigations and evaluations of any such information. Any projections, forecasts and estimates and illustrative case studies contained in the Presentation are necessarily speculative in nature and are based upon certain assumptions, and are provided for illustrative purposes only. It can be expected that some or all of such assumptions will not materialize or will vary significantly from actual results. Accordingly, any projections are only estimates and actual results will differ and may vary substantially from the projections or estimates shown. EnCap expressly disclaims any representations or warranties as to, the projections, forecasts, estimates and case studies contained in the Presentation.

Past performance is not indicative of future results. There can be no assurances that any EnCap fund will achieve its objectives or avoid losses. Market conditions and legal and contractual restrictions may limit the liquidity of investments. Accordingly, actual realized returns on investment may differ materially from the values indicated herein.

Unless otherwise noted, all references to internal rate of return represent gross internal rate of return (“IRR”), and references to return on investment represent gross return on investment (“ROI”), in each case as further described in the following paragraph. Gross performance information does not reflect management fees, carried interests and other fees and expenses borne by investors in a fund, which will reduce returns and in the aggregate are expected to be substantial.

Gross IRR is calculated on the basis of the actual timing of investment inflows and outflows, aggregated monthly, and the return is annualized, without giving effect to carried interest, management fees, and other expenses of the type that would be borne by a fund’s investors. Gross ROI is calculated as total realized proceeds and unrealized values (if applicable) without giving effect to management fees, carried interest, and other fees or expenses of the type that would be borne by a fund’s investors, divided by the total capital invested. Actual IRRs (or net IRRs) and actual ROIs (or net ROIs) are calculated after taking into account management fees, carried interest, and fund expenses and will be lower than the gross IRRs and gross ROIs, respectively.

Certain information contained in this Presentation includes forward-looking statements. Forward-looking statements, which involve assumptions and describe the future plans, strategies or expectations of the management of EnCap, are generally identifiable by use of the words “will”, “shall”, “may”, “should”, “expect”, “anticipate”, “estimate”, “believe”, “intend”, “plan” or “project” or the negative of these words or other variations on these words or comparable terminology. Actual results, performance, liquidity, financial condition, prospects and opportunities may differ materially from those expressed in, or implied by, these forward-looking statements as a result of various risks, uncertainties and other factors. Except as expressly required by the federal securities laws, there is no undertaking to update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason.

The statements made in the Presentation are as of the date on the cover and EnCap does not undertake any obligation to update the information contained herein or the assumptions on which such information was based in light of later events, developments or circumstances. EnCap and its affiliates make no representations or warranties, express or implied, as to the accuracy or completeness of any information contained in the Presentation and expressly disclaim any responsibility or liability for any loss or damage suffered or incurred by the recipient or any other person or entity (whether direct, indirect, consequential, reasonably foreseeable or otherwise) however caused (including but not limited to negligence) in connection with the information contained herein or the authenticity, accuracy, or completeness of such information. The recipient hereby acknowledges EnCap’s disclaimer of liability and on behalf of itself and its affiliates expressly releases EnCap and its affiliates and representatives, from any liability, loss or damage.

EnCap reserves the right to request the return or destruction of the Presentation at any time, and each recipient thereof agrees to return or destroy these materials immediately upon such request.

Constructive Macro Environment for Oil & Gas

Growing Worldwide Demand for Energy

- Worldwide energy consumption projected to continue rapid growth
- Renewables will grow market share but oil & gas still needed long term to meet demand

Increased Emphasis on Energy Security

- Recent political unrest has placed renewed focus on securing safe and reliable sources to meet energy needs
- U.S. oil & gas production will remain a critical source to meet global needs going forward

Capital Intensive Declining Asset Base

- Significant investment required to simply keep production flat
- Over \$4.5 trillion of upstream investment needed to meet projected demand through 2030⁽¹⁾

Worldwide Underinvestment

- Meaningful reduction in oil & gas development capital by Majors and U.S. independents has hindered global production capacity
- Focus on shareholder returns, ESG, and market volatility have all contributed to reduced investment in the upstream space

“All of the Above” Required

- Renewables are growing and receiving substantial investment
- Broader acceptance of natural gas as path to lower carbon emissions
- Oil and gas will continue to be the backbone for energy supply

(1) Based on 2022 IEA STEPS forecast for upstream oil and gas investments.

Attractive Margins are Driving Activity

- Focus on efficient conversion of locations to PDP and cash flow
- ~800 U.S. horizontal rig count remains ~25% below pre-pandemic levels
- Private operators operating ~57% of US horizontal rigs

Compelling Drilling Margins ⁽¹⁾

U.S. Horizontal Rig Count

Public E&Ps are Healthy and Generating Attractive Returns

- **Capital discipline** has become the industry standard
 - Reinvestment rates of 35% - 50% since 2021
 - Moderate production growth
 - Substantial free cash flow
- Low leverage across the industry
- Management incentives strongly aligned with shareholder returns

Strong E&P Returns but Investor Appetite Remains Muted

- Energy is the top performing sector in S&P500 since January 2021
- Long-only investors still largely on the sidelines, ~78% of inflows targeting mega-caps with >\$50 billion market cap

Limited Capital Available to the Industry

- Public equity markets are essentially closed
- Generalist private equity firms are no longer investing in oil & gas
- E&P focused private equity fundraising activity has slowed considerably

Upstream – Public Equity Issuances

Upstream – Private Equity Funds Raised

Source: Dealogic, Pitchbook, and Preqin Pro. Market Data as of 9/30/2022.

Bid-Ask Spread & Lack of Cash Buyers Limiting Transaction Activity

- Mergers still possible if transaction is accretive to free cash flow, leverage, and inventory
 - However, companies are healthy “stand-alone” creating less pressure to consolidate
- Cash A&D activity has reduced dramatically due to:
 - Low public valuations
 - Lack of cash buyers
 - Commodity price volatility

Mergers & Consolidation Since 2015 ⁽¹⁾

Cash A&D Since 2015 ⁽²⁾

Focus on Large-Scale Highly Economic Development

- Most active operator in the U.S. with 34 horizontal rigs running⁽¹⁾
- Attractive margins despite cost inflation headwinds over the past 6 months
- ~\$5 billion 2023E development budget⁽²⁾
- Well economics consistently in excess of 50% IRR

Current Drilling Margins Are Robust ⁽³⁾

Note: Rig count estimates per Baker Hughes as of 9/30/2022.

(1) US Horizontal Rig Count for EnCap excludes 4 rigs operated by Earthstone Energy, Inc. (NYSE: ESTE). EnCap owns ~40% of ESTE common stock outstanding.

Fund IX – Permian (Operated & Minerals)

- Four remaining investments with an unrealized value of \$1.6Bn, representing ~57% of Fund IX's total unrealized value
- Development, distributions, and accretive acquisitions have driven meaningful value uplift in Fund IX's Permian position

Significant Value Uplift Since Last Conference: Fund IX Permian (\$MM)

Q3 2021

Q3 2022

Piedra III

- Operated assets in Andrews County, with 2-rigs deployed and generating robust returns
- Complimentary minerals portfolio concentrated in Midland Basin
- 2023E distributions of ~\$300MM
- Potential strategic exit in 2023

Earthstone

- Fund IX owns 33.9MM shares of ESTE stock from its combination with Bold III
- Executed on 6 accretive acquisitions over the last 18 months
- Current market cap of ~\$2.0Bn vs \$0.5Bn last year

EnCap Minerals

- 9.8% ownership in premier private Permian minerals entity
- Projecting ~\$45MM in 2023 distributions net to Fund IX
- ~40% of Permian drilling activity located on EnCap Minerals' interests; significant inventory remains

Sabalo Minerals

- Unrealized value represents Sabalo residual mineral position
- Sabalo sold its operated position to Laredo Energy in 2021 and retained ~6,900 NRAs
- Expect to launch sales process 1H 2023

Note: Sabalo Minerals excludes any realized proceeds from Sabalo Operated position sale to LPI.

Fund IX – Mature Operators

- Previously challenged investments now distributing significant cash flow
- Active portfolio management combined with improved market dynamics have positioned both companies for continued growth in distributions and overall value

Significant Value Uplift Since Last Conference: Protégé III and Paloma IV (\$MM)

■ Realized ■ Unrealized

\$477MM Increase in Value (66%)

Protégé III

- Company managed by Verdun team
- Continuing to execute on compelling development opportunities while making LTM distributions of \$142MM
- Exiting the year <0.4x leverage
- Positioned to continue delivering returns through cash flow distributions (>\$100MM 2023E) or an opportunistic monetization

Paloma IV

- Currently running three operated rigs
 - Compelling economics (>2.0x DROI) through up-spaced inventory as well as improved natural gas and NGL prices
- Opportunistically adding drilling inventory at compelling valuations
- Current leverage < 0.7x
- Projecting >\$125MM in 2023 distributions from free cash flow
