Activity for the three months ended September 30, 2022

Transactions		
<i>Type</i>	<i>#</i>	<i>\$ in millions</i>
Commitments	0	0.0
Investments	8	425.6
Realizations-Cash	2	167.0

Fund XI made no new commitments or adjustments to portfolio companies.

Fund XI made investments in portfolio companies as follows (\$ in millions):

Investments:

Double Eagle IV	\$ 140.2
Tumbleweed IV	124.8
Paloma VI	83.3
Piedra IV	23.8
Silverback II	23.3
Pegasus II	14.9
Arbor Gas	13.6
Special Opportunities	1.7
	<u>\$ 425.6</u>

Fund XI received cash distributions from the following portfolio companies (\$ in millions):

Distributions:

Grayson Mill II	\$ 118.3
EnCap Minerals	48.7
	<u>\$ 167.0</u>

Fund Performance Summary (\$ in millions)

Significant Events and Transactions

- Silverback II** - Currently flowing back initial 7 horizontal wells; plan to continue 1-rig development program during the fourth quarter

Enduring IV	- Continued running a one rig program with tailwinds from recent cost and debt reduction measures and commodity prices
Black Swan	- Continued running a 2-rig development program to bring value forward; began completing a 5 and 3-well pad
Forge II	- Aggregated ~33,000 net acres in the Southern Delaware Basin; currently running an active development program
XCL	- Continued running a 3-rig program and executing on a large scale development program
Piedra IV	- Accumulated ~8,500 net royalty acres primarily in the core of the Midland Basin; currently running a 2-rig development program on their operated position
Special Opportunities	- Realized a 2.6x ROI on Denbury investment; Encino is focused on building out its methane monitoring business and acquiring additional cameras to help grow the company's continuous monitoring program
Arbor Gas	- Continued to progress design engineering and site development; made substantial progress in negotiations with offtake counterparty
Grayson Mill II	- Continued to execute on a significant capital program and make recurring distributions
Grenadier III	- Continued to evaluate opportunities across multiple basins
Pegasus II	- Closed on several small minerals transactions in the core of the Permian Basin
EnCap Minerals	- Made ~\$134 million in distributions; current industry activity and strong commodity prices should translate to cashflow growth for the entity in 2022
Verdun II	- Began to execute its operated development program of the acquired EP Energy Eagle Ford assets
Sabalo II	- Evaluating opportunities across multiple basins
Paloma VI	- Increased to five rigs running in the Haynesville Shale to bring value forward
Double Eagle IV	- Closed on ~10,150 net acres in the Permian Basin and initiated a 2-rig development program
Tumbleweed IV	- Closed on ~6,800 net royalty acres in the Permian Basin and continues to actively evaluate and close on acquisition opportunities
Earthstone	- Closed its previously announced acquisition of Titus Oil & Gas Production

Environmental, Social and Governance Highlights

During the due diligence phase of our investment process, EnCap ensures that the prospective management team members are fully aligned with EnCap's Environmental, Social and Governance ("ESG") building blocks prior to making the investment decision. Upon partnering with a new team, EnCap requires each portfolio company to have a likeminded ESG policy and supporting policies and procedures in place. In addition, EnCap requires each portfolio company to report on significant ESG issues and provide details of ongoing ESG developments during each quarterly Board meeting. This information is used by EnCap to quantitatively measure ESG activities and the impact on the performance of each portfolio company.

During Q3 2022, EnCap managed Fund XI in accordance with ESG policies. There were no material changes to the ESG risks and opportunities facing the portfolio, and there were no material ESG incidents to report during the quarter.

Additionally, refer to our third EnCap Sustainability Report covering 2021 available on our FIS DX website.

Other Reporting Matters

In addition to this report (which contains all fund financial statements in Section IV), the following reports net to each Limited Partner are available on our Investran DX website:

1. Statement of Partner's Capital, including allocation of the following:
 - a. Management fees
 - b. Net operating income (loss)
 - c. Realized gains (losses)
 - d. Unrealized gains (losses)
 - e. Unrealized incentive allocation
 - f. Incentive payments to the GP
 - g. Contributions paid
 - h. Distributions received
 - i. Recallable distributions received
 - j. Tax withholdings, if applicable
 - k. Portfolio company summary cash flows
2. Status of Payout
3. ILPA Fee and Expense Reporting Template

Other reporting available on our Investran DX website includes:

1. Cash call and distribution notices
2. Quarterly management fee calculations
3. Supplemental fund and portfolio company information (available 45 days after quarter end; 105 days after year end)
 - a. Fund organization information
 - b. Portfolio company organization information
 - c. Portfolio company financial information
4. Supplemental Schedule of Investments
5. All tax reporting
6. Annual audited financial statements
7. Advisory Board presentations
8. Legal documents

Please contact Katherine Cangelosi at Kcangelosi@encapinvestments.com if log on assistance is needed.

Section II: Industry Overview

Crude Oil Overview

Crude spot prices (“WTI”) had a rough quarter finishing down ~26% QoQ, its first quarterly loss in two years. WTI closed the quarter settling at \$79.91/Bbl driven mainly by high inflation data, which led to recession and demand fears. WTI started the quarter on a positive note, settling at \$108.43/Bbl on July 1st, but finished the quarter down ~\$26/Bbl. Subsequent to quarter-end, OPEC+ announced a production cut of ~2 MMBbl/d, which sent oil prices into the mid-\$80/Bbl range and helped offset some near-term recession fears and eliminated any Strategic Petroleum Reserve (“SPR”) releases impact. OPEC+ seems committed to supporting a ~\$90/Bbl floor and frustrating the Biden Administration who is keen on trying to ratchet oil prices down before mid-term elections. Some near-term bullish oil price drivers include 1) a continued Russian/Ukrainian conflict and Russian threats to cut off oil sales to countries who try and impose price caps 2) SPR oil releases expected to end soon and 3) still strong demand readings outside the U.S. and in global mobility data. However, recent negative inflationary data continues to signal to the broader market that further rate hikes are imminent, leading to a decreased demand picture, which in turn is keeping oil prices relatively range bound. Most analysts believe that in 2023 the global oil supply should grow slightly, but fundamentally the market is still well positioned for healthy oil prices.

Natural Gas Overview

Natural gas spot prices (“Henry Hub”) continued to remain strong during the quarter finishing roughly flat QoQ and up ~15% YoY. The 5-year natural gas strip finished the quarter at an average of \$5.22/MMBtu, which is a ~13% increase QoQ. Near-term gas futures remain bullish as 1) Russian/Ukraine geopolitical tensions remain high 2) Global demand and U.S. exports continue to ramp and 3) we approach peak demand winter months. Medium to long-term fundamentals remain strong even as the world continues to transition to cleaner sources of fuel.

Figure 1: Oil & Gas Spot Prices

Figure 2: Natural Gas (Henry Hub) Strip Prices

Figure 3: Crude Oil (WTI) Strip Prices

Drilling Activity

During Q3 2022, the total U.S. rig count (as measured by Baker Hughes) increased 2% QoQ to 765 rigs. This total rig count represented an increase of 47% YoY. The U.S. total natural gas rig count finished the quarter at 159 rigs, up from 157 rigs running at the end of Q2 2022. Year-over-year, the U.S. total natural gas rig count finished up 61%. The U.S. total oil rig count increased 2% during Q3 2022, moving from 594 rigs at the beginning of the quarter to 604 rigs at quarter-end. Year-over-year, the U.S. total oil rig count is up 43% or ~183 rigs.

Figure 5: U.S. Total Onshore and Offshore Rig Count

M&A Activity

Despite commodity price volatility driven by recessionary fears and depressed equity valuations there were ~\$16 billion of M&A upstream transactions in Q3 2022. Most deals were production heavy as buyers still continue to apply little value to upside inventory. The largest deals during the quarter were 1) EQT's purchase of Tug Hill/XCL Midstream for \$5.2 billion and 2) Devon's \$1.8 billion purchase of Eagle Ford assets from Validus Energy. These deals show that M&A is possible, but overall wide bid/ask spreads continue to hold the market back as buyers and sellers continue to be concerned about commodity price volatility. A number of stalled sales have also occurred as buyer friendly multiples are failing to surpass seller hold prices. A near-term acceleration in upstream M&A is possible if commodity prices are able to stabilize. Private equity sponsored acquisitions have also slowed as most firms are experiencing a challenging fundraising environment.

22. EARTHSTONE

Valuation Assumptions

Valuations have generally been determined as follows (subject to adjustment for particular circumstances and review by the Advisory Board):

- 1) Private equity securities and mineral interests held during the initial investment period are valued at cost (which is considered fair value) until such time as there is a measurable change in fair market value based upon the assumptions below.
- 2) Private equity exploration and production investments held after the initial investment period (generally longer than twelve months unless an expansion from an earlier fund) are valued at the risk adjusted PV10 of the future cash flow stream. The future cash flow stream is based on third party engineered projections applying the NYMEX forward strip pricing as of the valuation date.

The reserve categories were generally risked as follows:

- a. PDP – no discount applied
- b. PDNP – a 20% discount applied
- c. PUD – a 40% discount applied
- d. Probable – a 80% discount applied
- e. Possible – a 90% discount applied

The average NYMEX strip prices by year as of September 30, 2022 were as follows:

	<u>\$/BO</u>	<u>\$/MMBTU</u>
2022	79.11	6.92
2023	73.06	5.44
2024	67.08	4.74
2025	63.57	4.58
2026+	60.97	4.45

Unevaluated oil and gas leaseholds and other operating assets, such as gathering systems and processing plants, are valued at measurable inputs, such as original acquisition price and more recent public or private transactions in similar assets.

- 3) Non-producing and early stage mineral interests and ORRIs are valued at precedent transactions or discounted cash flows if underlying third-party reserve reports are available. Mature producing mineral interests and ORRIs are valued using a cash flow multiple of actual trailing 12 month cash flow. The cash multiple utilized is derived by taking into consideration market and asset specific factors including, but not limited to: location; life cycle or maturity of the asset; projected growth profile; precedent transactions; and comparable public market trading multiples.
- 4) Raisa III is valued based on the expected indemnity holdback per the terms of their sale agreement.
- 5) Paloma V is valued based on the expected indemnity holdbacks per the terms of their sale agreement.
- 6) Earthstone Energy (NYSE: ESTE) 19,819,820 common units valued at the quarter end share price of \$12.32/share.

ENCAP INVESTMENTS L.P.

EnCap Energy Capital Fund XI

Portfolio Companies

Note: Valuation assumptions 1) through 6) as presented above apply to all investments currently held by Fund XI. The remaining assumptions constitute the standardized valuation methodology to potentially be applied in future periods and are provided for informational purposes only.

- 7) Non-restricted public securities are valued at the quoted price at the end of the quarter.
- 8) Subordinated and restricted public securities (assuming adequate float) are valued at 90% of the quoted price at the end of the quarter.
- 9) Debt securities are valued at the face amount of the note plus accrued interest (less any reserve for uncollectible amounts or credit risk discounts).
- 10) Redeemable preferred securities are valued at the face amount of the issue plus accrued dividends (less any reserve for uncollectible amounts).
- 11) Other private/public equity securities with limited trading volume are valued based on relevant factors including NAV, comparables, significant events, etc.

Silverback Exploration II, LLC

Company Description

Silverback Exploration II (“Silverback II”) is a privately-held, San Antonio-based independent oil and gas company. The Silverback II management team is largely made up of individuals from Silverback Exploration I (“Silverback I”), a highly successful Fund IX portfolio company, and will be led by Steve Lipari (CEO), David Frye (VP of Land) and Jon Conaway (VP of Exploration). In addition to working together at Silverback I, each management team member also gained substantial experience and contacts in the industry from past roles at companies such as EOG Resources, Matador Resources, Newfield Exploration and Vitruvian Exploration. Additionally, George Young Jr. (former CEO of Silverback I) will act as an advisor in Silverback II.

Silverback II intends to employ a strategy very similar to that of Silverback I by leveraging its deep technical skills and experiences and extensive relationships to pursue unconventional projects through a combination of (i) producing and non-producing property acquisitions, (ii) grass-roots leasing efforts and (iii) farm-ins or joint ventures with operators whose large leasehold positions exceed their ability to timely develop and maintain their acreage. Initially, the team will focus on seeking out proprietary, privately-negotiated opportunities and thus are targeting areas in which they have the most experience and contacts, primarily the Permian Basin and South Texas.

Transaction Summary

In June 2017, Fund X committed \$243 million, Fund XI committed \$243 million and management committed \$14 million, providing a total equity commitment of \$500 million to Silverback II. In August 2018, Fund X’s commitment was transferred to Fund XI as a means to manage Fund X’s overall commitment level. Fund XI reimbursed Fund X for start-up costs incurred to date plus interest at 8%. The investment is structured in the form of common equity with Fund XI receiving 97.2% of distributed cash until an 8% IRR and 1.15x ROI is achieved. Distributions thereafter will be allocated on a graduated basis as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

On November 10, 2021, Silverback II closed the acquisition of EOG Resources’ core Northwest Shelf assets in New Mexico for total consideration of \$38.6 million. The assets consist of ~40,000 net acres with ~\$15 million of PDP PV-10 value (net of P&A liabilities) at signing. Additionally, the assets have existing midstream and SWD infrastructure.

The Northwest Shelf is an established vertical play that has seen a recent increase in activity as operators adopt horizontal drilling techniques with enhanced completions. Management has identified numerous greenfield development locations with attractive drilling economics.

Recent Events

During the third quarter, Silverback finished completing its first 7 horizontal wells. Initial production results are encouraging in both the Paddock and Blinbry formations, which gives us additional confidence in the prospectivity of their position. Silverback will pick up one rig at the end of the fourth quarter to continue their development program and will also turn 3 remaining DUCs to sales early during the quarter. The company will continue to monitor well results and is able to adjust activity as market conditions dictate.

Valuation (\$000’s)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
July-17	\$108,704	\$0	\$116,235	\$116,235	1.07x	N/A

Enduring Resources IV, LLC

Company Description

Enduring Resources IV is a privately held, independent oil and gas company based in Denver, CO. The company is led by the former management team of Westport Resources, a publicly traded independent that sold to Kerr-McGee in 2004 for \$3.4 billion. Additionally, management is substantially the same team from Enduring I & II, which were both highly successful EnCap entities. After its formation in 2004, Enduring I built asset bases in East Texas, South Texas, and the Rockies. The company exited the majority of its assets through three major individual sales: a \$603 million sale of its East Texas properties to Cabot Oil & Gas (NYSE: COG) in August 2008; a \$1.325 billion sale of its South Texas/Eagle Ford Shale assets to a 50/50% joint venture between Talisman (NYSE: TLM) and Statoil (NYSE: STO) in December 2010; and a \$43 million sale of its East Texas Robertson County assets in February 2011. Enduring I generated a 41% IRR and a 2.5x ROI on \$162 million invested for Fund V and a 333% IRR and a 2.3x ROI on \$42 million invested for Fund VII. Following its inception in 2011, Enduring II pursued multiple projects in West Texas and the Rockies but ultimately focused its efforts on the Southern Midland Basin, where it amassed 63,000 net acres in Reagan and Irion counties and drilled over 50 operated horizontal wells with four rigs running at the time of the sale. In 2014, the company sold this asset for \$2.5 billion to an affiliate of American Energy Partners and generated a 68% IRR and 2.9x ROI for both Fund VII and Fund VIII on \$106 million and \$170 million of invested capital, respectively. The company will execute a strategy similar to the one deployed in Enduring I & II, whereby Enduring IV will build a compelling acreage position in one or more onshore U.S. basins through a combination of acquisitions, greenfield leasing, and farm-ins. The team will then rely on its proven technical and operating expertise to execute a development program utilizing optimized drilling and completion techniques to create value.

Transaction Summary

Enduring IV was formed in June 2017 with a \$1.0 billion commitment consisting of \$475 million from Fund X, \$475 million from Fund XI, and \$50 million from management. In Q1 2018, the company increased its commitment to \$1.05 billion consisting of \$475 million from Fund X, \$475 million from Fund XI, \$52.5 million from management, and \$47.5 million from an affiliate of Avista Capital Partners. The investment is structured as common equity, with EnCap receiving a proportionate share of the distributions until simple payout is achieved. Thereafter, distributions will be allocated on a graduated basis after certain IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

In July 2017, Enduring IV made a ~\$250 million acquisition of a large operator's San Juan Basin assets. This acquisition included ~\$200 million of PDP PV-10 and ~135,000 net acres with meaningful upside across all hydrocarbon phase windows of the Mancos Shale. Additionally, Enduring IV sees significant value in optimizing costs on existing legacy wellbores.

In Q1 2018, Enduring IV closed on its previously announced acquisition of WPX Energy, Inc.'s (NYSE: WPX) San Juan Basin oil assets for \$700 million that was substantially underpinned by PDP value. The acquired assets encompass ~93,000 net acres in the prolific core of the oil window with ~22.0 Mboe/d of production (74% liquids). Enduring IV will look to develop its inventory of highly economic locations with modern completions to drive value.

Recent Events

Currently, Enduring IV has ~230,000 net acres across all hydrocarbon phase windows of the Mancos Shale with ~25 MBoe/d of production. After initiating development in July 2018, the company experienced significant operational issues and delays related to the required infrastructure build-out, which led to cost overruns and mixed results on its first series of Mancos oil horizontal wells. In response, management slowed down its development pace and overhauled its field operations team and D&C protocols. However, this delay in development also resulted in increased midstream obligations.

ENCAP INVESTMENTS L.P.

EnCap Energy Capital Fund XI

Portfolio Companies

In early 2020, Enduring IV halted all development plans (with 6 DUCs outstanding) as commodity prices declined. The company focused its efforts on reducing operating expenses, cutting overhead costs, and paying down debt. The company successfully paid down considerable debt over the course of 2020 and 2021 and has benefitted significantly from its implemented cost reductions, which are expected to be sustainable.

Enduring IV is now on solid footing and is running a one rig program to bring value forward. The company plans to operate with a moderate reinvestment rate and expects to initiate distributions from free cash flow over the next year. Additionally, management continues to explore consolidation opportunities to realize value from added scale.

Valuation (\$000's)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR

Sable Bay Energy, LLC

Fully Realized

Company Description

Sable Bay Energy, LLC is a privately-held, Houston-based independent oil and gas company focused on the identification, acquisition and development of oil and gas assets within the U.S. The Sable Bay management team is led by Don Dotson (CEO), Doyle Adams (VP Geology), Eric Alfuth (CFO), Don Adams (Executive VP Land), and Matthew Hoops (VP Land). Mr. Dotson is currently the President & COO of Plantation V. He joined Plantation II in 2004 as COO and managed all technical and operational functions through the successful sales of Plantation II, Plantation III, and Plantation IV. The Sable Bay management team supplements Mr. Dotson's experience of leading private equity companies with a highly capable, young technical group with backgrounds of evaluating shale plays on behalf of larger organizations.

The initial strategy will be to capture a meaningful acreage position in an area with known hydrocarbon production. The team will look for opportunities with large resource potential that (i) are located in areas with producing vertical wells from formations previously untested horizontally, (ii) are located in areas with producing horizontal wells, but of older vintage where there is upside in modern completion techniques, and (iii) have multi-bench potential. In addition, the team will look for opportunities with existing infrastructure in place or a clear path to future infrastructure build out. Sable Bay will focus on operated positions and evaluate the deals with an exit in mind and a clear understanding of the potential buyer universe.

Transaction Summary

In August 2017, Fund XI committed \$247.9 million and management committed \$2.1 million, providing a total equity commitment of \$250.0 million to the company. The investment is structured in the form of common equity with Fund XI receiving 99% of distributed cash until an 8% IRR is achieved. Distributions thereafter will be allocated on a graduated basis as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

In Q4 2018, EnCap and management made the decision to wind down the company due to the inability to capture a compelling asset in current market conditions.

Black Swan Oil & Gas, LLC

Company Description

Black Swan is a privately-held, Oklahoma City-based independent oil and gas company focused on the identification, acquisition, and exploration of liquids-rich plays in various onshore US basins. Black Swan is led by Ian Yingling (CEO), Jason Kneedy (EVP Exploration), David LaLonde (CFO), Jeff Brooks (VP - Land), and Kathy Brotherton (VP – Business Development). Mr. Yingling has 16 years of industry experience and has previously held leadership positions within reservoir and operations engineering functions as well as business development at many well-respected companies including Occidental Petroleum Corporation (NYSE: OXY), Dominion Energy Inc./HighMount (NYSE: D), Continental Resources, Inc. (NYSE: CLR), Warwick Energy Group, and Sherman Energy. Mr. Kneedy, began his career at Chesapeake Energy Corporation (NYSE: CHK) in 2004, and most recently served as Advisor – US Risk Capital, Technical, Strategy & Operations, where he oversaw the generation and evaluation efforts for all new play opportunities and served as the lead geologic representative for the company's strategic planning and business development divisions. Mr. LaLonde has over 15 years of corporate finance and transaction experience in the energy industry, having most recently served as the CFO of Riley Permian. Prior to Riley Permian, Mr. LaLonde was a Partner at Petro Capital where he co-managed E&P activities of the firm. Mr. Brooks has over 17 years of land experience across all the major L48 basins from his time at Chesapeake, where he most recently served as the Director of Land for Business Development and Exploration. Mrs. Brotherton has over 35 years of business development and land experience, most recently serving as Director of Land and Business Development for J. Cleo Thompson, where she was instrumental in J. Cleo Thompson's growth and ultimate sale of its Delaware Basin assets to Oxy for >\$1.0 billion in October 2016.

Transaction Summary

In October 2017, Fund XI committed \$248.5 million and management committed \$1.5 million, providing a total equity commitment of \$250.0 million to the company. In July 2021, Fund XI expanded its commitment to Black Swan by \$249.4 million and management expanded its commitment by \$0.6 million, providing a pro forma total commitment of \$500 million. The investment is structured in the form of common equity with Fund XI receiving 99.5% of distributed cash until an 8% IRR is achieved. Distributions thereafter will be allocated on a graduated basis as certain IRR and ROI targets are met.

In Q2 2021, Fund XI expanded its commitment from \$250 million to \$500 million to support the continued growth and development of the company's Midland Basin asset. Subsequently, in Q2 2022 Fund XI and Management expanded its commitment by an additional \$50 million, providing a pro forma total of \$550 million. EnCap believes the expanded commitment will leave the company well capitalized to capture various bolt-on acquisitions and fund the development of infrastructure to support the Company's operated development program.

Post Investment Activity

In June 2018, Black Swan acquired ~8,000 net acres in the Green River Basin as a part of the Bureau of Land Management's June lease auction in Wyoming. Lease terms for the acreage are extremely advantageous as they contain high NRIs (87.5%) and ten-year terms, which provide maximum development flexibility. Management targeted this area for its attractive well results from Southland, BP, and others, multi-zone potential, and low entry cost relative to other premier basins. Early wells in the basin have targeted the Lewis and Foxhills formations with more modern completion techniques yielding significant improvement in EUR. In Q3 2019 Black Swan opportunistically divested its position in the Green River Basin in order to focus its efforts on the highly compelling Midland Basin where the company has gained traction and is building a position.

Recent Events

As of Q3 2022, Black Swan holds ~20,800 largely contiguous net acres in the Midland Basin, which are almost entirely HBP. Additionally, the company owns ~13,800 NRAs largely under their operated leasehold

Quarterly Review

As of September 30, 2022

22

ENCAP INVESTMENTS L.P.

EnCap Energy Capital Fund XI

Portfolio Companies

position. The company is focused on continuing to expand its operated leasehold position and opportunistically acquire mineral interests under its operated footprint in Martin County.

During the quarter, Black Swan began completing the 5-well Biff pad (Middle Spraberry, Lower Spraberry, Jo Mill, Wolfcamp A, and Wolfcamp B) and the 3-well McFly pad (Middle Spraberry, Lower Spraberry, and Wolfcamp B). Black Swan expects first production for these 8 wells in October 2022. To date, the company has brought 21 horizontal wells online across four pads (6 Lower Spraberry, 6 Wolfcamp A, 3 Jo Mill, 3 Wolfcamp B, 2 Middle Spraberry, and 1 Wolfcamp D) with encouraging early time results. The company plans to continue running its two-rig development program for the remainder of 2022 and has the ability to quickly ramp down activity if the price environment deteriorates.

Valuation (\$000's)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Oct-17	\$497,670	\$0	\$913,790	\$913,790	1.84x	N/A

Forge Energy II, LLC

Company Description

Forge Energy II, LLC is a San Antonio, Texas based independent oil and gas company. The management team consists of Barry Winstead (CEO), Danny Boone (Business Development), Arnold Nall (Operations), and Dan Weisel (CFO). Prior to Forge I, Management worked together in various roles at Burlington for more than 20 years, including 10 years together in senior management positions.

In February 2018, Forge I closed on the sale of its Delaware Basin assets to Oasis Petroleum, Inc. (NYSE: OAS) for \$483.4 million in cash and 46.0 million shares. These assets included ~22,000 net acres and 3,500 Boe/d of production in Winkler, Loving, and Ward Counties, Texas. Forge I ultimately invested \$524.9 million of equity, comprised of \$279.7 million from Fund VIII, \$105.0 million from Fund VIII Co-Invest, \$128.2 million from Pine Brook, \$5.3 million from Friends and Family, and \$6.6 million from management.

At closing on February 14, 2018, after accounting for debt and other miscellaneous purchase price adjustments, Forge I received \$436.9 million of cash proceeds from OAS, resulting in distributions to Fund VIII and Fund VIII Co-Invest of \$233.0 million and \$87.4 million, respectively, equating to a 0.8x cash-on-cash ROI net to each Fund. Additionally, OAS issued 46.0 million shares to Forge I. The waterfall was crystallized at \$11.45/share (based on the 10-day VWAP as of May 15, 2018) and the remaining shares were distributed according to this valuation (~18.8 million shares distributed to Fund VIII and ~7.0 million shares distributed to Fund VIII Co-Invest). Overall, this is a strong result for Forge that was largely driven by Forge's ability to shift its strategy and deploy capital in the core of the Delaware Basin from 2016-2018.

In December 2017, Forge I formed Forge Interests, LP, an entity created to hold carved-out ORRIs from leases with NRIs in excess of 75% and mineral interests purchased by the Company. Forge Interests, LP holds 1,939 net royalty acres (normalized to a 12.5% royalty burden) in Winkler, Loving, and Ward Counties, Texas. We believe these non-cost bearing interest will likely represent meaningful future value for Forge I, which will further enhance the overall return net to EnCap.

Forge II will initially focus on the Delaware Basin, but will be opportunistic as it relates to other areas of focus. Per Management's desire to simplify the structure and governance of Forge II, Pine Brook and Friends and Family investors will not participate; Management and EnCap Fund XI will be the sole investors in Forge II at formation.

Transaction Summary

In June 2018, Fund XI committed \$392.0 million and management committed \$8.0 million, providing a total equity commitment of \$400.0 million to the company. The investment is structured in the form of common equity with Fund X receiving 97% of distributed cash until an 8% IRR is achieved. Distributions thereafter will be allocated on a graduated basis as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

In November 2019, Forge II acquired ~2,000 net acres in the Delaware Basin from XTO Energy. Lease terms for the acreage are extremely advantageous as they contain high effective NRIs (83%) and is 100% HBP, which provide maximum development flexibility. Management targeted this area for its attractive well results from Felix II, Jagged Peak, Concho, and others, multi-zone potential, and Forge's past success in the area.

Also in November 2019, Forge II acquired ~200 net acres from Bill Pearl Productions, directly offset their existing position in the Delaware Basin.

In December 2020, Forge II acquired Occidental Petroleum's Red Bull South assets for a total purchase price of \$112.2 million. These assets consist of ~26,500 net acres, located in Reeves and Pecos Counties, TX and the value of the acquisition was underwritten by PDP PV-10 value from 76 producing wells. The

ENCAP INVESTMENTS L.P.

EnCap Energy Capital Fund XI

Portfolio Companies

position is largely HBP and Management believes there is meaningful upside to be unlocked through already-identified operational optimization.

Recent Events

During the third quarter of 2022, Forge II continued drilling the 5-well Lyssa pad and the 3-well Iron Mike pad. The company also turned the 3-well Mosaic pad online with encouraging early-time results. Additionally, added production history on recent key tests gives us further confidence in the prospectivity of additional development locations across Forge's leasehold position. Current net production is ~11,700 Boepd.

For the fourth quarter of 2022, Forge II plans to scale back its development program from 2 rigs to 1 as it works through its DUC inventory. The company continues to seek opportunities to bolster its core acreage position through bolt-on acquisitions, swaps, and trades.

Valuation (\$000's)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR

XCL Resources Holdings, LLC

Company Description

XCL Resources is a privately held, Houston-based independent oil and gas company focused on the acquisition and development of liquids-rich basins in the United States. XCL is led by Gray Lisenby (CEO), Blake McKenna (President, EVP Operations), and Eric Matus (CTO). Mr. Lisenby was most recently SVP & CFO of Rice Energy (“Rice”) and Rice Midstream Partners (“RMP”), where he was integral in the companies’ rapid growth and value creation. In total, Rice completed over \$4.0 billion in transactions, grew production from 50 MMcf/d to 1.3 Bcf/d (\$1.8 billion capital budget in 2017), and outperformed almost all E&P peers from IPO to exit (sold to EQT for ~\$10.0 billion in 2017). Mr. McKenna was most recently Senior Engineer at Vitesse, where he led engineering efforts and closed over \$300 million of non-op Bakken acquisitions. Prior to Vitesse, Mr. McKenna spent seven years at EOG across all major engineering disciplines in multiple basins, including the Bakken where he managed over 45,000 Boe/d of production. Mr. Matus was previously Senior Engineer at Vitesse, where he pioneered a system to employ “big data” in the evaluation of individual DSUs basin-wide by integrating production, D&C, and geologic data. Previously, Mr. Matus worked at EOG and was instrumental in prototyping many of EOG’s proprietary iApps. XCL intends to leverage its diversified team experience to be opportunistic as it employs a data-driven, acquire & develop strategy with its initial focus in the Williston Basin. Focusing on risk-adjusted returns, Management will utilize its deep technical expertise across the value chain to identify opportunities that possess asymmetric risk/reward opportunities.

Transaction Summary

In July 2018, Fund XI committed \$394.0 million, Rice Investment Group committed \$20.0 million, other investors committed \$1.1 million, and management committed \$5.1 million, providing a total equity commitment of \$420.2 million to the Company. The investment is structured in the form of common equity with Fund XI receiving 93.75% of distributed cash until an 8% IRR is achieved. Distributions thereafter will be allocated on a graduated basis as certain IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

In December 2019, XCL’s commitment was expanded by \$200.0 million (\$191.2 million net to Fund XI) to \$620.2 million (\$585.2 million net to Fund XI) to fund the closing of a significant transaction in the Uinta Basin and to provide dry powder for future capital needs.

Post Investment Activity

Following inception, XCL evaluated multiple basins for high quality development opportunities. The Company entered the Bakken in Q1 2019 through a series of small acquisitions, ultimately capturing ~2,500 net acres (100% HBP) in an attractive area at a low cost basis. Due to a wide bid/ask spread between the Company and offset operators, XCL was unable to build adequate scale and shifted its focus to other potential opportunities. XCL is currently evaluating options for this asset.

In December 2019, XCL closed on the acquisition of ~44,500 net acres in the Uinta Basin with ~9.2 MBoe/d of production for \$625 million. The acreage is >90% HBP and 78% operated with attractive 80% NRIs. Additionally, the position is highly contiguous and configured for all two-mile DSUs. XCL was attracted to the overpressured, multi-stacked, and oil-driven pay on this asset, which was highly delineated by 24 producing, horizontal wellbores. Management will seek to create value by developing its highly economic inventory in a cost-efficient manner using optimized completion techniques.

After closing its acquisition, XCL initiated its development program with the initial goal of confirming the viability of slickwater completions and optimal well spacing. The company completed three wells with slickwater in Q1 2020 that have met expectations to date. In Q4 2020, the company completed its first 5-well spacing test, and in late 2021, XCL completed its first 9-well spacing test. Well results continue to validate the compelling development thesis of XCL.

ENCAP INVESTMENTS L.P.

EnCap Energy Capital Fund XI

Portfolio Companies

Recent Events

The company is currently running 3 rigs to bring value forward through large-scale development. Based off well results and current economics, the company plans to continue its three-rig development program for the foreseeable future. Over the last couple months, XCL brought on a 23-well development from two adjacent units, which has met expectations to date.

Valuation (\$000's)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Jul-18	\$571,525	\$0	\$808,350	\$808,350	1.41x	N/A

Piedra Energy IV, LLC

Company Description

Piedra IV is a privately held, Midland-based oil and gas company managed by Chip Smith and Robert Beecherl that is focused in the Permian Basin. The team initially partnered with EnCap Fund VII in Piedra I and II. In Piedra I, the company sold Wolfberry assets to Berry Petroleum for \$123 million, providing Fund VII with a 2.4x ROI and 47% IRR on \$45 million invested. In Piedra II, the company sold 7,668 acres primarily in Martin County, Texas to Athlon for \$170 million net to Piedra II. After accounting for debt repayment and other holdbacks, the company distributed ~\$106 million net to Fund VII. Piedra II also sold 739 net acres in Reeves and Pecos Counties, Texas to Diamondback for ~\$31.5 million in gross proceeds, or ~\$20.8 million net to Fund VII. This acreage was a tag-along sale to Diamondback's acquisition of Brigham Resources, which closed in February 2017. Overall, Fund VII realized a 3.2x ROI and 48% IRR. Prior to Piedra, Mr. Smith spent 18 years focused on property acquisitions and exploration and was formerly the founder/co-founder of Charter Royalty Company, Parsley & Smith and Vecta Technology. Mr. Beecherl spent 19 years focused on acquisitions and divestments at Vecta Technology, Sugarberry Oil & Gas and Verdad Oil and Gas. Piedra III was founded in May 2014 and has invested substantially all of its \$340 million total equity commitment capturing an attractive minerals portfolio in the core of the Midland and Delaware basins and leasehold position in the Midland basin, substantially all of which remain unrealized. Given Piedra III's limited capacity for incremental investment, Piedra IV was formed in August 2018 to pursue additional opportunities. The Piedra IV management team is led by the same management team as Piedra III, which includes the Piedra founders, Chip Smith and Robert Beecherl, and Sam Beaufait (CFO) and Chris Ryden (Business Development), all with strong track records in value creation in the Permian Basin. Piedra IV will maintain the same dual-track strategy of 1) pursuing exploration and development of lower risk resource plays with scalability and upside potential and 2) acquiring mineral interests primarily in the Midland and Delaware basins.

Transaction Summary

Fund XI formed a limited liability company with Piedra IV in August 2018, committing \$240 million. The management team committed \$12 million providing total capital committed of \$252 million to the company. The investment takes the form of common equity with Fund XI receiving 95% of the available cash flow until an 8% IRR and a 1.0x ROI is earned, and thereafter distributions are allocated on a graduated basis until higher IRR and ROI targets are met. All exploration and production assets will be held in Piedra Energy IV, LLC, while for tax purposes mineral related interests will be held in Rock River Minerals IV, LP (both entities collectively referred to as "Piedra IV"). EnCap holds a majority position on the Board of Managers.

Post-Investment Activity

Piedra IV initially focused its efforts on acquiring mineral interests through Rock River Minerals IV ("RRM IV"). Since August 2018, the Company has captured ~8,200 net royalty acres ("NRA") (normalized to 1/8th royalty rate) primarily in the heart of the Midland Basin, where activity remains robust. Due to the nature of mineral interests, there are no additional capital requirements or operating expenses associated with the assets after their initial purchase. Furthermore, there is no risk of the interests expiring, as is the case with traditional leasehold acquisitions.

During the first quarter of 2022, the Company closed on the acquisition of 2,913 net leasehold acres in Andrews County. Management has a deep understanding of the area and plans to pull meaningful value forward through the drill bit. The position remains prospective for horizontal development in multiple benches, including the Lower Spraberry, Middle Spraberry, and Wolfcamp B.

Recent Events

Piedra IV has accumulated ~8,500 NRAs primarily focused in the Permian Basin. The company has ~8,200 NRAs in the Midland Basin and ~300 NRAs in the Delaware Basin. All of the acreage continues to be de-risked by XTO Energy, Pioneer, Endeavor, Diamondback, and other well capitalized companies. As commodity prices remain constructive, the company expects operator activity to increase and cash flow to grow. The company continues to evaluate numerous accretive opportunities within its current target areas.

Silverado Oil & Gas LLC

Fully Realized

Company Description

Silverado Oil & Gas LLC (“Silverado”) is a privately-held, Woodlands, TX-based company focused on pursuing large-scale acquire and exploit opportunities with an initial focus on the Permian, Eagle Ford, Williston and Anadarko basins. Silverado is led by Larry Massaro (CEO) and Trevor Reuben (CFO). Massaro and Reuben have worked together for a number of years and most recently served as CFO and VP of Corporate Development, respectively, at Newfield Exploration (“Newfield”), where they led the financial, business development and strategic aspects of the company prior to its \$7.7 billion sale to Encana in February 2019. Massaro and Reuben are initially joined by ten other individuals, all of whom worked with them at Newfield. The senior-most individuals are Ed Haas and Luis Faya, two engineers who will oversee Silverado’s operational and reservoir engineering efforts, respectively. Haas most recently served as VP of Production at Newfield, where he was responsible for managing 35 professional and 400 field operations staff, operating 4,000 wellbores and helping implement Newfield’s capital and operating budget. Faya most recently served as the Technical Director of Corporate Development at Newfield, where he led A&D, M&A and NAV technical evaluations for asset, corporate and new venture opportunities. The remaining individuals span the disciplines of drilling, marketing, finance, reservoir engineering and geology.

Silverado plans to pursue large acquire and exploit opportunities with an initial focus on the Permian, Eagle Ford, Williston and Anadarko basins. Targeted assets will have a PDP component along with substantial upside potential and the ability to employ scale and integration to optimize full-field development. Management believes there are a number of strategic assets that are currently available for sale (or will soon become available) due to industry participants being forced to live within cash flow and direct capital budgets toward a subset of their existing asset base, leading them to divest quality assets. After the capture phase, Management is prepared to own and operate assets for an extended period of time if necessary, extracting value through a multi-year exploitation plan with a rigorous focus on financial and operational discipline, creating a going-concern business that does not rely on external funding.

Transaction Summary

In March 2019, Fund XI committed \$492.5 million and management committed ~\$6.4 million providing a total equity commitment of ~\$498.9 million to the company. The investment is structured in the form of common equity with Fund XI receiving 98.7% of distributed cash until an 8% IRR and 1.25x ROI is achieved. Distributions thereafter will be allocated on a gradual basis as additional return hurdles are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

In Q3 2021, EnCap and management made the decision to wind down the company due to the inability to capture a compelling asset in current market conditions. The wind down was completed in Q4 2021.

Raisa III Holdings, LLC

Substantially Realized

Company Description

Raisa III is a privately held, Denver-based independent oil and gas company focused on building an attractive non-operated asset base through acquiring small non-operated working interests and mineral interests in the core of de-risked basins that demonstrate the most economic drilling opportunities in the country. The Raisa III management team is led by the same individuals as Raisa II and consists of Luis Rodriguez (CEO), Casey Harless (VP – Land), Jeremy Cook (CFO), and Ayman Kaheel (VP – Data Analytics). Raisa II was founded in April 2016 and has invested \$275 million out of its \$300 million 8/8ths equity commitment capturing an attractive non-operated working interest and minerals interest portfolio in the core of the DJ, Delaware, Anadarko, and Williston.

Raisa III will employ a similar strategy of acquiring small non-operated working interests and mineral interests in the core of de-risked basins which demonstrate the most economic drilling opportunities in the country. The Raisa team performs intense geologic and engineering analysis to identify the high-graded sections under the best and most efficient operators, generating a significant competitive advantage versus small local competitors. Management targets tier-one acreage in heavily delineated areas of highly economic basins, which helps to mitigate geological and engineering risk and to benefit from timely development of acquired acreage.

Transaction Summary

In May 2019, Fund XI committed \$98.0 million and management committed \$2.0 million, providing a total equity commitment of \$100 million to the company. The investment is structured in the form of common equity with Fund XI receiving 98% of distributed cash until an 8% IRR and 1.25x ROI is achieved. Distributions thereafter will be allocated on a graduated basis as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Recent Events

During the 4th quarter of 2021, we successfully closed the sale of Raisa Energy III, LLC to Savitar Energy Holdings, LLC, a company formed by Ares and Citadel. Net to EnCap, \$7.8 million of cash proceeds to Fund XI were received. We also expect to receive additional cash of ~\$248k through a holdback that will be paid out 12 months after closing.

Valuation (\$000's)

Paloma Partners V Holdings, LLC

Substantially Realized

Company Description

Paloma V was formed in May 2020 and is led by Chris O’Sullivan (President), Mark Gabrisch (EVP Land), Scott Smith (EVP BD), Bobby Poirrier (CFO), and Doug Genrich (COO) (collectively “Management”). Management has a long track record of value creation with EnCap across multiple entities dating back to 1998. Paloma V’s initial strategy consisted of capitalizing on distressed opportunities in the upstream space arising from a combination of significant industry distress and capital scarcity. Between inception and late 2020, the team evaluated a wide range of situations, but Management ultimately concluded that its strategy was challenged due to an unexpected willingness by bondholders of distressed companies to support entrenched management teams through recapitalizations, management retention, and full or partial equityizations. In addition, bid/ask spreads were a common hurdle.

In late 2020, Paloma V shifted its strategy to focus on acquiring a diversified portfolio of rent/royalty payments from surface owners who have contracted their land to operators for solar installations and wind turbines. Concurrent with the strategy shift, Paloma V re-branded to Paloma Solar & Wind, LLC (“PSW” or the “Company”) and hired two key individuals with prior experience in this strategy. Typical contracts between surface owners and operators have 20-40 year primary terms with extensions, and PSW will focus on contracts with significant term remaining that are also underpinned by modern, large scale, and high quality generation assets where the operators have invested extensive upfront capital. The opportunity set is a highly fragmented market with many small acquisitions involved to achieve critical scale. This effort will require an experienced ground game to facilitate transactions with surface owners throughout the Lower 48, and the Paloma team is uniquely positioned to execute based on its proven ability to deploy ground game leasing in prior successful Paloma entities. After the accumulation phase, PSW will look to divest an attractive portfolio of low risk, long duration yield to large institutions or via a securitized product offering. Overall, we believe this platform is relatively unique in the institutional space at this scale, but the strategy can deliver compelling full-cycle returns upon successful execution of the company’s plan.

Transaction Summary

In May 2020, Fund XI committed \$196.0 million to Paloma V. Management committed \$4.0 million, providing a total equity commitment of \$200.0 million to the company. As part of the strategy shift to PSW, EnCap transferred \$10.0 million of its existing commitment to EnCap Energy Transition Fund I in March 2021. The investment will be structured in the form of common equity with Fund XI and ETF receiving 98% of distributed cash until a 10% IRR is achieved, and thereafter distributions will be allocated on a graduated basis as certain IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

In February 2022, EnCap signed and closed the sale of the PSW platform to Queensland Investment Corporation (“QIC”) for \$47 million. PSW made a \$39 million gross distribution to its investors shortly after closing and expects to make additional distributions from indemnity holdbacks over 18 months.

Over the short lifespan of PSW, the company acquired an attractive and diversified portfolio of solar and wind royalties. PSW also made significant offers for royalty streams on several large scale solar projects but was unable to meet the asks. The PSW Board decided to internally run a strategic alternatives process in Q4 2021 after recognizing the difficulties in executing PSW’s business plan at scale. The primary challenges included: (i) the entrance of several well-capitalized and aggressive competitors with exceptionally low cost of capital, (ii) high brokerage costs required to chase ground game deals, and (iii) general unfamiliarity with the asset class made it difficult to secure a bank loan or to place a securitization. Overall, PSW’s strategy had merit, and the exit market came to fruition. However, the arbitrage between entry and exit valuations became too compressed to achieve target returns, which led to EnCap’s decision to sell the platform.

Special Opportunities Capital, LLC

Company Description

The purpose of Special Opportunities Capital (“SOC”) is to opportunistically invest in unique public securities or private investments that EnCap believes can deliver compelling returns. The entity may invest in a combination of common equity, preferred equity, and public bonds over time with varying strategies. These strategies may include making a highly liquid passive investment, participating in a recapitalization, taking a controlling interest, or taking an entity private. We believe the recent period of significant distress and volatility, coupled with severe capital scarcity in the industry, will lead to various opportunities to invest across the capital structure of select entities. As incremental opportunities materialize, SOC’s commitment may be expanded to accommodate future investments.

Transaction Summary

In November 2020, Fund XI provided an initial commitment of \$50 million. In March 2021, the commitment was expanded to \$75 million to gain additional exposure to the current investment.

Post Investment Activity

During 4Q 2020 and 1Q 2021, SOC deployed \$53 million to establish a meaningful ownership position in Denbury Inc. (NYSE: DEN) at an average share price of ~\$28.00/share. In September 2020, DEN emerged from bankruptcy and subsequently traded at a public enterprise value equivalent to our internal estimate of PDP PV-10. As such, the public market placed little to no value on DEN’s vast CO₂ infrastructure, which includes >1,000 miles of pipeline that could transport 800 MMcf/d of CO₂ along the Gulf Coast. EnCap believed the market would recognize the value of this infrastructure given its highly strategic proximity to the Gulf Coast industrial complex for carbon capture, utilization, and sequestration (“CCUS”) and ongoing efforts by the DEN management team to position the company as a leader in CCUS. By November 2021, the market valued the CCUS business at approximately \$2.5 billion with the anticipation of enhanced 45Q via the Build Back Better Act. At this time, SOC began selling shares and ultimately exited its position in 1Q 2022 at an average share price close to \$80.00/share. SOC realized ~\$136 million in proceeds and achieved a 2.6x ROI.

In November 2021, Special Opportunities closed on a \$7 million investment in Encino Environmental Services. The investment represents a non-controlling ownership (25%) in the business alongside BP Energy Partners who is the primary sponsor. Encino is a Houston-based company focused on methane monitoring and greenhouse gas reduction. The investment provides a compelling opportunity to build a company which can offer a full suite of services related to the emissions problem in the industry.

In February 2022, Special Opportunities made a follow-on investment to the Encino platform through Context Labs (“CXL”) in partnership with BP Energy Partners. In total, the investment in CXL was \$16.3 million with Special Opportunities taking 25% of the investment (~\$4.0 million). CXL is a Boston based software developer that provides ESG data analytics and insights. CXL will serve as the software offering in the Encino suite of products going forward.

Recent Events

Encino continues to focus on building out its methane monitoring business with its existing customer base along with enhanced sales efforts for new customer acquisition. In particular, the company is focused on acquiring additional camera equipment to help grow the company’s continuous monitoring program (CEMS) given increased demand for real time emissions monitoring and measurement.

In Q3 2022, Encino agreed to acquire a 58% stake in Sensia, a Spanish camera manufacturer. Encino expects the transaction will provide more control over the camera supply chain, preferred pricing, and potentially an incremental line of revenue through direct sales.

Arbor Renewable Gas LLC

Company Description

Arbor Renewable Gas Holdings, LLC (“Arbor” or the “Company”) was formed in February 2021 and is led by Tim Vail (CEO), Brent Gwaltney (CFO), Ned Crady (Corporate Development & GC), and Trey Fielder (Head of Site Development) (collectively “Management”). Mr. Vail has an impressive track record and was previously Founder and CEO of G2X Energy (methanol producer), CEO of Synthesis Energy Systems (coal gasification), and Director of Commercialization for Fuel Cell Development at General Motors. Management has a very strong energy background with significant experience developing, constructing, and managing large scale industrial/energy projects.

Arbor’s focus is on the production of renewable syngas, which can then be used to produce renewable gasoline, green hydrogen, and sustainable aviation fuel. Management has a close relationship with SunGas/GTI (provider of proprietary gasifier technology) and has negotiated an exclusive arrangement for the use of the technology for the projects Arbor is focused on pursuing. Arbor’s first planned project in Beaumont, TX is expected to produce ~1,000 bbls/day of renewable gasoline with a very low or negative carbon intensity score. Given the attributes of Arbor’s gasoline, it is expected to qualify for meaningful environmental or tax credits under the LCFS, RFS, and 45Q programs. This investment required significant front-end diligence and will continue to be vetted with Management and industry experts. EnCap believes this investment has compelling risk/reward, and we intend to expose limited upfront capital in order to get the project “shovel ready” before bringing in a strategic partner or exploring an outright sale before deploying full development capital. Additionally, we believe Management represents a potential long-term partner to EnCap given its level of expertise in an emerging market with significant momentum.

Transaction Summary

In February 2021, Fund XI made a \$13.5 million dollar commitment to Arbor alongside a \$1.5 million commitment from management for a total equity commitment of \$15 million to the company. This initial commitment was sized to capture the opportunity to partner with the Arbor team and to fund start-up costs while continuing extensive diligence. Subsequently, in July 2021, EnCap Energy Transition Fund I (45.8%) and Yorktown (6.1%) joined the investment group alongside Fund XI (45.8%), and Arbor’s commitment was increased to \$100 million (inclusive of management’s \$2.2 million commitment) to support the company’s business plan. The investment is structured as common equity, with Fund XI receiving a proportionate share of the distributions until an 8% IRR is achieved. Thereafter, distributions will be allocated on a graduated basis after certain IRR and ROI targets are met.

Post Investment Activity

Shortly after closing, the Company secured a highly strategic 53-acre site located at the confluence of low-cost and plentiful wood waste feedstock, rail and waterfront access, utility access, and critical CO2 infrastructure in Beaumont, TX (“Spindletop”). This site has the capacity for up to two additional trains, beyond the first train slated for Q4 2024 COD, that could be designed to produce syngas, renewable gasoline, sustainable aviation fuel, and/or green hydrogen. The site is construction ready, fully permitted, and Arbor has completed front-end engineering and design, providing clarity of capital costs for the initial train. Additionally, the Company received its indicative carbon intensity score, based on detailed review of the Company’s processes, for both the California and European markets from third party consultants, and verified that its feedstock meets the standard to qualify for D-3 RINs under the EPA’s Renewable Fuel Standard and the International Sustainability and Carbon Certification. Both verifications have contributed to derisking the environmental attribute component of the revenue stack.

Arbor has secured an additional site in Baton Rouge, Louisiana and has begun early-stage development work to derisk an expansion project. The Company is in discussions with an oil major (separate from Spindletop site) that could result in a partnership that leads to accelerated development and construction of the project.

Recent Events

In Q3 2022, Arbor continued to advance engineering on the initial train. The company has completed phase II (FEL-2) of front-end engineering and design, and phase III (FEL-3) is nearly 50% complete. Upon completion of FEL-3, Arbor will issue requests for proposal (RFPs) to procure all of the equipment to construct the processing unit modules.

During the quarter, Arbor made substantial progress toward advancing its negotiations with a European offtake counterparty. The company and its offtake counterparty are negotiating documents to finalize a long-term offtake with revenue price protection (floor).

Arbor is growing its team to execute on the expanding investment landscape. In September, the company hired Brian Zatarain as President. Brian will lead several commercial efforts to de-risk and advance projects. Brian has a 25+ year track record in corporate business development. Prior to Arbor, he was the CEO of ITAFOS, a public phosphate mining and fertilizer production company where he led a \$300MM+ restructuring of its capital structure, multiple acquisitions, and oversaw plant development and commissioning. Additionally, Brian has extensive working relationships with several of the EETF Managing Partners, dating back to Enron Corporation.

Valuation (\$000's)

The investment in Arbor Gas is carried at cost (which approximates fair value).

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Feb-21	\$38,217	\$0	\$38,217	\$38,217	1.00x	N/A

Grayson Mill Energy II, LLC

Company Description

Grayson Mill Energy II is a privately held, Houston-based independent oil and gas company focused on the development of oil and gas properties in the Williston basin. The Grayson Mill II management team is comprised of the same senior management team as Grayson Mill I. They have also added additional key personnel and support staff with a significant Bakken experience. The team is led by Eric Bayes (CEO), Blake Sullens (COO), Matt Ultis (CFO), and Dewey Gerdorn (VP-Business Development). Mr. Bayes was previously VP Operations with Oasis Petroleum (“Oasis”), where he managed the entirety of Oasis’ operations team in the Bakken, which included 16 rigs, six frac crews, and over 300 employees at its peak. While at Oasis, Mr. Bayes was being groomed to be a future leader of the company prior to deciding to pursue his own venture. Mr. Sullens was most recently Operations Manager at Alta Resources, where he played a critical role in the execution and success of the company’s Duvernay asset. He brings a unique combination of operational, engineering, and petrophysical expertise to the team. Mr. Ultis was previously CFO of Redman Management Company (GSO portfolio company) and also held various corporate planning, finance, and investor relations roles at Oasis. Mr. Gerdorn previously served as VP-Business Development at Bright Horizon Resources, where he focused on the Midcontinent and East Texas basins. Prior to Bright Horizon Resources, Mr. Gerdorn worked at PDC Energy for nineteen years, where he was part of the original team that formed PDC’s successful strategy to enter the Wattenberg and Piceance basins. Grayson Mill represents a strong, data-driven and operational team well situated to execute the company’s strategy in the Bakken.

Transaction Summary

In February 2021, Fund X posted a \$150 million deposit to secure the acquisition of Equinor’s Bakken assets. In April 2021, Fund X committed \$250 million, Fund XI committed \$500 million, and management committed \$1 million, providing a total equity commitment of \$751 million to the company. Simultaneous with the April closing, ownership across members was trued up based on commitments to the company. The investment is structured in the form of common equity with EnCap receiving 99.9% of distributed cash until an 8% IRR and 1.00x ROI is achieved. Distributions thereafter will be allocated on a graduated basis as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

Concurrent with the formation of Grayson Mill II, the company closed its acquisition of Equinor’s Bakken assets for \$900 million. Equinor’s Bakken assets include ~240k net acres producing ~44 MBoe/d net (67% oil), as well as an extensive crude, gas, and water gathering system that greatly enhances producer margins. At closing, the transaction was funded with \$560 million in equity, \$275 million in debt, and \$65 million in interim period cash flow. The valuation was highly compelling with over \$1 billion in hard value coverage and meaningful upside inventory remaining that was not valued to underwrite the deal. Additional upside exists in LOE reductions and refrac potential. Equinor hedged a meaningful portion of PDP volumes on behalf of Grayson Mill at PSA signing, and Equinor also provided firm crude transportation at an attractive fixed fee arrangement through YE 2022. The transaction closed in April 2021.

During Q1 2022, Grayson Mill sold non-core acreage and associated production in Montana for \$71 million to a private operator.

Recent Events

Management began influencing operations after closing in April 2021 and formally brought operations in-house in August 2021. Over the course of 2021, the team primarily focused on stabilizing production and lowering operating costs, which yielded excellent results. The company also completed a significant backlog of DUCs that were inherited from the seller and commenced a re-frac program. In late 2021, Grayson Mill deployed its first operated rig, and in Q1 2022, the company added its second operated rig.

ENCAP INVESTMENTS L.P.

EnCap Energy Capital Fund XI

Portfolio Companies

Grayson Mill continues to run two rigs with a significant capital program but is reinvesting a moderate portion of overall operating cash flow while maintaining modest leverage (<1.0x). The company will likely add a third rig before year-end. In total, Grayson Mill distributed ~\$191 million during the quarter and has distributed ~\$721 million since inception. Overall, the company is very well positioned for continued success, especially in the current commodity price environment, and we expect to realize ongoing distributions from free cash flow for the foreseeable future.

Valuation (\$000's)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
April-21	\$394,177	\$466,018	\$844,713	\$1,310,731	3.33x	N/A

Grenadier Energy Partners III, LLC

Company Description

Grenadier Energy Partners III, LLC (“Grenadier III”) is a privately-held, Woodlands, TX-based oil and gas company. The Grenadier III management team is largely made up of individuals responsible for Grenadier Energy Partners II’s success (“Grenadier II”) and will be led by Patrick J. Noyes (CEO), Lenny Lilja (CFO), Kyle Noyes (President & COO), and Thomas Belsha (CTO & Business Development). Management has an established track record in multiple basins with varying strategies, and we view this repeat team as having the ability to identify, capture, and execute on attractive investment opportunities.

Grenadier III will evaluate opportunities across multiple basins but will initially focus its efforts in the Midland Basin where Management can leverage its deep network of contacts, technical understanding of subsurface dynamics, and recent operational success in the northern side of the Basin. Management is currently evaluating several positions held by smaller, private operators in Texas that may not have the operational capabilities that Grenadier III does or are not adequately capitalized to develop the assets to the level required by the public buyer universe in today’s environment. As such, Grenadier III believes there is an opportunity for a consolidation of such positions and will emphasize their ability to create value through the drillbit. Grenadier III will remain opportunistic as it relates to other basins given its experience across multiple U.S. basins.

Transaction Summary

In April 2021, Fund XI committed \$343 million and management committed \$7 million providing a total equity commitment of \$350 million to the company. The investment is structured in the form of common equity with Fund XI receiving 98.0% of distributed cash until an 8% IRR and 1.25x ROI is achieved. Distributions thereafter will be allocated on a gradual basis as additional return hurdles are met. EnCap holds a majority position on the Board of Managers.

Recent Events

Grenadier III is actively evaluating acquisition opportunities in areas where the team has prior experience and/or a competitive advantage. The team will additionally remain opportunistic as it relates to other basins given its experience across multiple U.S. basins.

Valuation (\$000’s)

The investment in Grenadier III is carried at cost (which approximates fair value).

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Jun-21	\$6,370	\$0	\$6,370	\$6,370	1.00x	N/A

Pegasus Resources Holdings II, LLC

Company Description

Pegasus Resources Holdings II, LLC (“Pegasus II”) is a privately-held, Fort Worth-based company focused on the acquisition and aggregation of mineral interests and overriding royalties in the core of premier oil and gas basins in the United States. Pegasus II is led by George M. Young Jr. (CEO), Will Rodgers (President), Lynn Frank (CFO), Don Collins (VP-Land), and David Hvyl (Sr. Reservoir Engineer). Mr. Young was formerly CEO of Silverback Exploration, a Fund IX portfolio company, which sold its Delaware Basin assets to Centennial Resource Development in December 2016 for \$855 million, which generated a 3.1x ROI net to Fund IX. Management originally formed Pegasus Resources Holdings, LLC in 2017, which was consolidated into EnCap Minerals, LLC in June 2021. Management now manages EnCap Minerals in addition to Pegasus II.

Continuing the strategy of Pegasus I, Pegasus II’s initial strategy is to selectively acquire, manage and grow a portfolio of mineral interests within the Permian Basin, where management has extensive experience and relationships. The company strives to acquire minerals under the most efficient and sophisticated operators where line of sight to near-term development is achievable. Initially, Pegasus is focusing on seeking out proprietary, privately-negotiated opportunities and thus is targeting areas in which the team has the most experience and contacts.

Transaction Summary

In June 2021, Fund XI committed \$297.3 million and management / other investors committed \$2.7 million, providing a total equity commitment of \$300.0 million to the company. The investment is structured in the form of common equity with Fund XI receiving 99.1% of distributed cash until an 8% IRR and 1.25x ROI is achieved. Distributions thereafter will be allocated on a gradual basis as additional return hurdles are met. EnCap holds a majority position on the Board of Managers. Overhead between EnCap Minerals and Pegasus II is allocated based off direct costs and attention served and is reviewed and approved by the Board.

Recent Events

Since formation in June 2021, Pegasus II has closed on ~\$135 million of minerals transactions in the core of the Permian Basin. Management is seeing meaningful deal flow and will remain disciplined in its approach to continue to aggregate attractive deals under well capitalized operators.

Valuation (\$000’s)

The investment in Pegasus II is carried at cost (which approximates fair value).

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Jun-21	\$151,125	\$0	\$151,125	\$151,125	1.00x	N/A

EnCap Minerals, LLC

Company Description

EnCap Minerals, LLC (“EnCap Minerals”) was formed in June 2021 with the consolidation of core Permian mineral assets from multiple EnCap portfolio companies held in Fund IX (OGX III), Fund X (Fortis I, Fortis II, Fortis III, OGX IV), and Fund XI (OGX V, Pegasus I). Each entity received equity ownership in the new EnCap Minerals platform in exchange for the assets contributed, resulting in Fund IX, Fund X, and Fund XI owning 9.8%, 52.5%, and 36.6% of EnCap Minerals, respectively. The balance of the ownership, 1.1%, rests with the current management investors in Pegasus I. EnCap Minerals holds a premier portfolio of 125,000 core net royalty acres in the Permian Basin (60% Delaware Basin and 40% Midland Basin) with diversified and highly undeveloped assets positioned for future organic growth with no capital requirements.

EnCap Minerals is managed by the Pegasus team pursuant to a Management Services Agreement. Overhead is allocated to EnCap Minerals and Pegasus II using a methodical approach that is reviewed and approved by EnCap. As part of the consolidation, EnCap formally separated ties with the Fortis and OGX/Santa Elena teams, but several management members were retained to bolster the go-forward management team. Overall, we believe the consolidation of assets under EnCap Minerals will meaningfully reduce overhead, enhance distributions, and provide scale that will create differentiated opportunities for value creation and an ultimate monetization. EnCap Minerals will closely monitor the markets for a potential IPO, outright sale, or additional consolidation opportunities with other large private mineral interests using equity consideration.

Transaction Summary

In June 2021, EnCap Minerals was formed with the consolidation of core Permian interests. The existing remaining commitments of the Fund IX (OGX III) and Fund X (Fortis I, Fortis II, Fortis III, OGX IV) entities involved in the consolidation were carried over to EnCap Minerals to provide for additional future flexibility should a considerable deal arise requiring a cash component (subject to Advisory Board approval given the Funds involved).

The management interests of Fortis III, OGX III, OGX IV, and OGX V were fully repurchased prior to the consummation of EnCap Minerals, and the EnCap Funds hold the common equity interests directly related to these investments. The original management incentive structures remain for Fortis I, Fortis II, and Pegasus I, which are subject to an 8% IRR on original invested capital. Thereafter distributions are allocated on a graduated basis as certain ROI targets are met. EnCap holds a majority position on the Board of Managers for EnCap Minerals.

Recent Events

The EnCap Minerals portfolio has greatly benefited from improved commodity prices and increased industry activity in the Permian Basin. Approximately half of all Permian rigs have been running on EnCap Minerals’ position over the past few quarters. As such, we anticipate a meaningful production and cash flow ramp this year.

In Q3 2022, EnCap Minerals made \$134 million in distributions (\$49 million to Fund XI, \$70 million to Fund X, and \$13 million to Fund IX). The company will continue to make monthly distributions on an ongoing basis.

Valuation (\$000’s)

The Unrealized Value is based on a cash flow multiple of actual trailing 12 month cash flow.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Nov-17	\$599,695	\$205,271	\$986,351	\$1,191,622	1.99x	N/A

Verdun Oil Company II LLC

Company Description

Verdun II is headquartered in Houston, TX and is led by the same management team as Verdun I (Fund X); Tim Nein (CEO), Danny Savitz (CFO), Jason LaGrega (COO), Will Rider (EVP Land & BD), Mark Stephenson (EVP-Geology), and Martin Perez (EVP-Engineering) (collectively, “Management” or “Verdun Management”). Verdun II was formed in July 2021 to acquire EP Energy’s Eagle Ford assets and was capitalized with a \$392 million commitment from Fund XI at signing.

Transaction Summary

On July 26, 2021, Verdun II and XCL signed an agreement to acquire EP Energy’s South Texas Eagle Ford and Uinta assets for \$1.55 billion. Verdun II’s allocated purchase price was \$758 million (\$706 million cash / \$53 million hedge loss assumption), subject to adjustments, and jointly posted a \$72 million deposit.

After signing, the transaction was flagged for review by the FTC, citing concerns with XCL’s acquisition of the Uinta assets. During a lengthy review process with the FTC, it was ultimately decided that the best path forward would be to agree that EnCap would divest the Uinta assets in order to ensure the capture of the Eagle Ford assets at a compelling valuation. A limited and expedited process was run and a PSA was signed with Crescent Energy to sell the Uinta assets for \$815 million in February 2022. On March 31, 2022 the acquisition of EP Energy’s Eagle Ford assets closed simultaneously with the close on the sale of Uinta assets to Crescent.

EP Energy’s Eagle Ford assets consist of ~110,000 net acre, primarily located in La Salle County, TX, producing ~25.7 Mboe/d (~65% oil). Verdun management believes that there are a number of greenfield development locations with compelling economics at today’s commodity prices, and additional refrac candidates. Potential upside also exists in LOE optimization and operational efficiencies. The asset base gives Verdun II immediate scale, and given it’s large production base, positions the company to immediately develop the asset within cash flow while making distributions.

Recent Events

Verdun II’s acquisition of EP Energy’s Eagle Ford assets closed on March 31, 2022. The company is integrating the asset base and has begun to execute its operated development program. Early time results from wells completed by Verdun exceed historical results and legacy type curve.

Valuation (\$000’s)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Jul-21	\$361,163	\$0	\$810,537	\$810,537	2.24x	N/A

Sabalo II Holdings, LLC

Company Description

Sabalo Energy II, LLC (“Sabalo II”) is a privately-held, Corpus Christi, TX-based oil and gas company. The Sabalo II management team is largely made up of individuals responsible for Sabalo Energy I’s (“Sabalo I”) successful sale to Laredo Petroleum (NYSE: LPI) and will be led by Barry Clark (CEO), Robert Helm (CFO), Tom Medary (VP Geology), and Mike Dignam (EVP Corporate Development). Management has an established track record in multiple basins with varying strategies, and we view this repeat team as having the ability to identify, capture, and execute on attractive investment opportunities.

Sabalo II will evaluate opportunities across multiple basins, but will initially focus its efforts in the Permian Basin where Management can leverage its deep network of contacts, technical understanding of subsurface dynamics, and recent operational success. Management is currently evaluating several positions in the Midland Basin both on and off market and believes there is an opportunity for consolidation as both public and private operators look to offload assets. Sabalo II will remain opportunistic as it relates to other basins given its experience across multiple plays in the U.S.

Transaction Summary

In September 2021, Fund XI committed \$296.5 million and management committed \$3.5 million, providing a total equity commitment of \$300 million to the Company. The investment is structured in the form of common equity with Fund XI receiving 98.8% of distributed cash until an 8% IRR and 1.00x ROI is achieved. Distributions thereafter will be allocated on a graduated basis as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Recent Events

Sabalo II is actively evaluating acquisition opportunities in areas the team has prior experience and/or a competitive advantage. The team will also remain opportunistic as it relates to other basins given its experience in multiple basins.

Valuation (\$000’s)

The investment in Sabalo II is carried at cost (which approximates fair value).

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR
Sep-21	\$5,930	\$0	\$5,930	\$5,930	1.00x	N/A

Paloma Partners VI Holdings, LLC

Company Description

Paloma VI (“PPVI” or “PNG”) is a privately held, Houston-based independent oil and gas company focused on the development of oil and gas properties in the Haynesville Shale. PPVI was formed in December 2021 and is led by Chris O’Sullivan (President), Mike Winsor (CEO), Mark Gabrisch (EVP Land), Scott Smith (EVP BD), and Bobby Poirrier (CFO) (“Management”). Management, excluding Mr. Winsor, has a long track record of value creation with EnCap across multiple entities dating back to 1998. Mr. Winsor was previously EVP and COO at Indigo Natural Resources (“Indigo”), where he managed the entirety of Indigo’s operations in the Haynesville including an eight rig program at its peak. Mr. Winsor has also attracted other key ex-Indigo personnel to join PPVI to help lead a strong operations platform. Management will continue to operate Paloma IV (Fund IX), where the team has led a strong turnaround of the business. Paloma V (Paloma Solar & Wind) was realized in February 2022.

Transaction Summary

In December 2021, Fund XI committed \$539.0 million to Paloma VI. Management committed \$11.0 million, providing a total equity commitment of \$550.0 million to the company. The investment is structured in the form of common equity with Fund XI receiving 98% of distributed cash until an 8% IRR and 1.0x ROI is achieved. Distributions thereafter will be allocated on a graduated bases as additional IRR and ROI targets are met. EnCap holds a majority position on the Board of Managers.

Post Investment Activity

Concurrent with the formation of Paloma VI, the company closed its take-private transaction of Goodrich Petroleum Corporation (“GDP”) for \$527 million, including the assumption of debt. GDP’s assets include ~32,200 net acres in the Haynesville (92% HBP) and ~33,200 net acres in the TMS (97% HBP) producing ~180 MMcf/d net (97% gas). At closing, the transaction was funded with \$430 million in equity and \$97 million in assumed net debt. PPVI’s business plan is to accelerate activity with multiple rigs operating a larger scale and more efficient program to bring value forward. While not underwritten, we have high confidence in management’s ability to further expand core inventory, improve NRIs, and extend existing short lateral units with its land and BD expertise. The transaction closed on December 23, 2021.

Recent Events

The company has ramped up activity in light of strong gas prices and economics and is currently running five rigs and two completion crews to embark on efficient field development. PNG has experienced meaningful production growth, which is expected to accelerate in 2023. Additionally, the company has bolstered its inventory through acreage trades and small acquisitions, and PNG will remain opportunistic to further grow its asset base.

Valuation (\$000’s)

The Unrealized Value is based on the PV10 of the future cash flow stream on a risk adjusted basis.

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR

Double Eagle Energy Holdings IV, LLC

Company Description

Double Eagle Energy Holdings IV, LLC (“Double Eagle”) was formed in March 2022 and is based in Fort Worth, TX. Double Eagle is led by Cody Campbell (Co-CEO) and John Sellers (Co-CEO), as well as Blake Carpenter (CCO), Joshua Gregg (CFO), and Garrett Martin (COO). Mr. Campbell and Mr. Sellers founded the first iteration of Double Eagle in 2009 with a focus on acquiring and flipping leases in the early days of the shale land grab. From 2009 to 2012 Double Eagle was primarily focused on the Haynesville and Eagle Ford. Double Eagle was one of the first movers in the oil window of the Eagle Ford and sold tens of thousands of acres to Chesapeake, Enduring, and Hilcorp.

Management formed Double Eagle II in 2014 with a focus on the Midland Basin. Over the course of 24 months, Double Eagle leveraged deep industry and in-basin relationships as well as an unparalleled “land machine” to build a position of ~71,000 net acres in the core of the Midland Basin. Double Eagle II invested a total of ~\$520 million in the assets, and ultimately sold to Parsley in 2017 for ~\$2.8 billion, realizing a gross 3.3x ROI and 95% IRR.

Following the success of Double Eagle II, Management formed Double Eagle III to re-enter the Midland Basin in 2017. Shortly after formation, Double Eagle III merged with Four Point to form DoublePoint. The team ultimately invested a total of ~\$1.8 billion in acquisitions and development capital. Management executed on a sophisticated ground game, closing 78 acreage trades over 50,000 net acres, to create a blocky drill-ready position of ~98,000 net acres in the core of the Midland Basin. The team successfully operated 7 horizontal rigs with 3 frac crews, drilling 266 wells and growing production from 8 MBOED in Q1 of 2019 to 90 MBOED in April of 2021. DoublePoint ultimately sold to Pioneer in May of 2021 for ~\$6.4 billion, representing a gross 3.1x ROI and 43% IRR.

Double Eagle intends to leverage its industry relationships to create a core acreage position in the Midland and Delaware Basins through acquisitions and acreage swaps. Management will use its proven operating abilities to develop the assets and ultimately create a sizable cash flowing business that will be attractive to buyers in any market environment.

Transaction Summary

Double Eagle was initially be capitalized with a \$1.1 billion common equity commitment, which includes \$1.0 billion from Fund XI and \$100 million from Management. For up to 90 days after closing, we allowed Management to raise commitments from Friends and Family of up to \$100 million, which would reduce Fund XI’s commitment on a dollar-for-dollar basis. Any additional commitments from Friends and Family would be added to the total commitment amount, with a maximum expansion of \$50 million.

In Q2 2022, Double Eagle closed on additional commitments from Friends and Family, raising the total commitment to be \$1.15 billion. This includes \$900 million from Fund XI, \$154 million from Friends and Family, and \$100 million from Management.

Recent Events

As of September 30, 2022, Double Eagle has closed on ~10,150 net acres in the Permian Basin and initiated a 2-rig development program on its Mabey drilling unit. The company is actively evaluating acquisition opportunities in the Permian Basin where the team has prior experience and/or a competitive advantage.

Valuation (\$000’s)

The investment in Double Eagle IV is carried at cost (which approximates fair value).

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR

Tumbleweed Royalty IV, LLC

Company Description

Tumbleweed Royalty IV, LLC (“Tumbleweed”) was formed in March 2022 and is based in Fort Worth, TX. Tumbleweed is led by Cody Campbell (Co-CEO) and John Sellers (Co-CEO), as well as Blake Carpenter (CCO), Grant Wright (President), and Ben Faith (COO). Mr. Campbell and Mr. Sellers founded the first iteration of Double Eagle in 2009 with a focus on acquiring and flipping leases in the early days of the shale land grab. From 2009 to 2012 Double Eagle was primarily focused on the Haynesville and Eagle Ford. Double Eagle was one of the first movers in the oil window of the Eagle Ford and sold tens of thousands of acres to Chesapeake, Enduring, and Hilcorp.

Management formed Tumbleweed Royalty I in 2016 to acquire mineral and royalty interest in the Midland Basin. The team invested a total of \$70 million to acquire ~13,000 net royalty acres. Tumbleweed Royalty I ultimately sold its assets in three separate transactions from 2017 to 2019 realizing \$200 million in ultimate proceeds, representing a gross 2.9x ROI.

In 2020 Management formed Tumbleweed Royalty II to acquire mineral and royalty interest the Midland Basin. This entity currently consists of ~14,000 net royalty acres concentrated in the highest quality areas of the Midland Basin. Collectively, Management has consolidated more than \$500 million of royalty acreage since 2016.

Tumbleweed intends to leverage its industry relationships to identify and acquire mineral and royalty interest in the Midland and Delaware Basins.

Transaction Summary

Tumbleweed was initially capitalized with a \$550 million common equity commitment, which includes \$500 million from Fund XI and \$50 million from Management. For up to 90 days after closing, we allowed Management to raise commitments from Friends and Family of up to \$50 million, which would reduce Fund XI’s commitment on a dollar-for-dollar basis. Any additional commitments from Friends and Family would be added to the total commitment amount, with a maximum expansion of \$25 million.

In Q2 2022, Tumbleweed closed on additional commitments from Friends and Family, raising the total commitment to be \$577 million. This includes \$450 million from Fund XI, \$77 million from Friends and Family, and \$50 million from Management.

Recent Events

As of September 30, 2022, Tumbleweed has closed on ~6,800 net royalty acres in the Permian Basin and expects to close on more than 1,400 additional net royalty acres over the next month. The company is actively evaluating acquisition opportunities in the Permian Basin where the team has prior experience and/or a competitive advantage.

Valuation (\$000’s)

The investment in Tumbleweed IV is carried at cost (which approximates fair value).

Date of Initial Investment	Capital Invested	Realized Proceeds	Unrealized Value	Total Value	Projected ROI	Projected IRR

Earthstone Energy, Inc Company Description

Earthstone Energy, Inc. (NYSE: ESTE) is a publicly-traded independent oil and gas company focused on the exploration and production of onshore assets in the U.S. Management is led by Frank Lodzinski (Executive Chairman), Robert Anderson (CEO) and their technical team, who previously led Oak Valley Resources, LLC (“OVR”) and have a demonstrable track record of value creation over the last 20 years in various public and private companies. Prior to partnering with EnCap in OVR, Mr. Lodzinski managed GeoResources, Inc. (formerly NASDAQ: GEOI), which was merged with Halcon Resources (NYSE:HK) in April 2012 for \$1 billion. At closing, the transaction generated a 4.9x ROI and a 38% IRR for original investors. OVR marked EnCap’s third partnership with Mr. Lodzinski and Mr. Anderson (after Cliffwood Oil & Gas and AROC) and the fifth oil & gas company the team have managed since the late 1980s. In 2014, OVR signed an agreement to reverse merge into Earthstone Energy, Inc. (NYSE:ESTE). Earthstone gained its initial operated Permian footprint through its combination with Bold Energy III (Fund IX) in May 2017. After a resetting of the market from Covid related turmoil, Earthstone began to execute on a series of highly accretive acquisitions in 2020 in the Midland and Delaware Basins, due in part to the company’s strong balance sheet and reputation for being a great partner.

Transaction Summary

On April 14, 2022, Earthstone completed a bolt-on deal to acquire privately held operated assets in the Southern Midland Basin from Bighorn Permian Resources, LLC (“Bighorn”) for a total consideration of \$713 million. Earthstone funded \$639 million of cash and issued 5.7 million shares of Earthstone’s Class A common stock to Bighorn. To help fund the cash portion of the deal, Earthstone issued \$550 million of 8% senior unsecured notes in April 2022 and closed a \$280 million PIPE that included \$220 million from EnCap (19.8 million new shares of Earthstone Class A common stock net to Fund XI) and \$60 million from Post Oak Energy Capital (“Post Oak”) (5.4 million new shares to Earthstone Class A common stock). In conjunction with this transaction, EnCap Fund VII also sold all 4.6 million of its Earthstone shares to Post Oak for \$51 million in total proceeds. Negotiation of deal terms was led by Post Oak, and EnCap received all necessary Advisory Board approvals related to the Bighorn transaction.

Recent Events

On August 10, 2022, Earthstone closed its acquisition of Titus Oil & Gas Production, LLC’s northern Delaware Basin assets in New Mexico for \$635 million including \$575 million cash and \$60 million of equity (3.9 million shares). The deal was priced at a discount to PDP PV10 value and helps Earthstone expand its highly economic inventory in the core of the Delaware Basin and add additional scale.

Earthstone is very well positioned to generate substantial free cash flow at current commodity price levels and will use free cash flow to: (1) paydown its moderate leverage profile, (2) return capital to shareholders, and (3) make opportunistic accretive acquisitions. In October 2022, Earthstone announced the repurchase of 3.0 million shares from a third party investor for \$44 million.

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION:

EnCap Energy Capital Fund XI, L.P. (the “Partnership”), a Texas limited partnership, was formed on December 22, 2016 to provide its partners with an opportunity to participate in privately negotiated equity and equity-related investments in the upstream and midstream independent oil and gas sector of North America. The Partnership operates pursuant to a partnership agreement (the “Partnership Agreement”) dated December 22, 2016, which should be referred to for a complete description of the provisions of the Partnership. EnCap Equity Fund XI GP, L.P. (“General Partner”), a Texas limited partnership, is the sole general partner for the Partnership. The Partnership’s final close was on November 30, 2017. There are 369 investors owning the limited partnership interests (“Limited Partners”, and collectively with the General Partner, the “Partners”). The General Partner’s and Limited Partners’ total capital commitments to the Partnership are \$208.8 million and \$6,752.4 million, respectively. The Partners’ total outstanding commitments as of September 30, 2022 were approximately \$1,842.0 million. The ratio of total contributed capital to total committed capital is 74.2%. The Partnership has committed \$7,543.4 million to portfolio companies, of which \$2,806.9 million remains unfunded at September 30, 2022.

EnCap Energy Fund XI-C, L.P. (the “C Feeder”) and EnCap Energy Capital Fund XI-D, L.P. (the “D Feeder”), affiliated funds, are investors in the Partnership. The C Feeder’s and D Feeder’s ownership in the Partnership’s capital are 13.946253% and 8.279808%, respectively.

The Partnership shall be dissolved upon the expiration of a 10-year period ending December 22, 2026, unless the Advisory Board or greater than 75% of the Limited Partners agree to extend the Partnership for up to two additional one-year periods in order to permit an orderly liquidation and winding up of the Partnership.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The Partnership is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board Accounting Codification (“ASC”) 946, Financial Services – Investment Companies.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the General Partner to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results, including the ultimate amount realized upon the sale of illiquid and/or fair valued investments, can, and often do, differ from those estimates.

Investment valuation and transactions

The Financial Standards Accounting Board (“FASB”) guidance “Fair Value Measures,” establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under the guidance are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date;

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;

Level 3 Prices, inputs or modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no marked activity).

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. An investment's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the General Partner. The General Partner considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, provided by multiple, independent sources that are actively involved in the relevant market. The categorization of an investment within the hierarchy is based upon the pricing transparency of the investment and does not necessarily correspond to the General Partner's perceived risk of that investment.

Partnership investments are valued quarterly by the General Partner. Investment cost and the net realized gains or losses thereon are determined, for financial accounting purposes, on the specific identification method. The Partnership's investments that have been classified within level 3 utilize significant unobservable inputs and trade infrequently or not at all. Level 3 investments may include common and preferred equity securities, corporate debt, warrants and other privately issued securities. When observable prices are not available for these securities, the General Partner uses one or more valuation techniques (e.g., the market approach or the income approach) for which sufficient and reliable data is available. Within level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors.

The inputs used by the General Partner in estimating the value of level 3 investments included third party engineering reserve reports, oil and gas NYMEX future prices as of the date the valuation is performed, estimated capital expenditures, estimated operating costs, and risk-adjusted discount factors based on whether the reserves are classified as proved developed producing, proved developed nonproducing or proved undeveloped. Other relevant information considered by the General Partner may include the following factors: original transaction price, recent public or private transactions in the same or similar assets, restrictions on transfer, including the Partnership's right, if any, to require registration by the issuer of the offering and sale of securities held by the Partnership under the securities laws; significant recent events affecting the issuer, including significant changes in financial condition and pending mergers and acquisitions; and all other reasonable and customary factors affecting value. The fair value measurement of level 3 investments does not include transaction costs that may have been capitalized as part of the security's cost basis. Assumptions used by the General Partner due to the lack of observable inputs may significantly impact the resulting fair value and therefore the Partnership's results of operations.

Investments may be classified as level 2 when market information becomes available, yet the investment is not traded in an active market and/or the investment is subject to transfer restrictions, or the valuation is adjusted to reflect illiquidity and/or non-transferability.

Investments in restricted securities of public companies cannot be offered for sale to the public until the Partnership complies with certain statutory requirements. The valuation of the securities by management takes into consideration the type and duration of the restriction, but in no event does the valuation exceed the listed price on a national securities exchange or the NASDAQ national market. Investments in restricted securities of public companies are generally included in level 2 of the fair value hierarchy.

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

Investments whose values are based on quoted market prices in active markets, and are therefore classified within level 1, generally include active listed equities. The General Partner does not adjust the quoted price for such instruments, even in situations where the Partnership holds a large position and a sale could reasonably impact the quoted price.

The following table presents the investments carried on the Statement of Assets, Liabilities and Partners' Capital by level within the valuation hierarchy as of September 30, 2022.

Assets at Fair Value as of September 30, 2022				
	Level 1	Level 2	Level 3	Total
Investments:				
Private equity holdings	\$ —	\$ —	\$ 7,113,673,030	\$ 7,113,673,030
Public equity holdings	244,180,182	—	—	244,180,182
	<u>\$ 244,180,182</u>	<u>\$ —</u>	<u>\$ 7,113,673,030</u>	<u>\$ 7,357,853,212</u>

The following table summarizes the valuation methodology and significant unobservable inputs used for investments that are categorized within Level 3 of the fair value hierarchy as of December 31, 2021. The disclosure below excludes investments for which fair value is based on unobservable but non-quantitative inputs. Such items include investments for which the determination of fair value is based on prices from prior transactions or third party pricing information without adjustment.

Assets (at fair value)	Fair Value at December 31, 2021	Valuation Techniques ⁽¹⁾	Unobservable Inputs ⁽²⁾	Range of Inputs (Weighted Average)
Investments in Equity of Privately Held Companies	\$ 593,154,667	Recent transactions approximates Fair Value	Recent transaction price	N/A
	\$ 3,525,688,000	Income Approach / Discounted Cash Flow Analysis	Discount rate	10%
			NYMEX forward strip oil pricing (\$/BO)	\$58.57-\$72.69
			NYMEX forward strip gas pricing (\$/MMBTU)	\$3.03 - \$3.66
			Risk adjusted PDP reserves	0%
			Risk adjusted PDNP reserves	20%
			Risk adjusted PUD reserves	40% - 85% (66.0%)
			Cash flow multiple	9.3x - 23.8x (11.8x)
		Value of Undeveloped Acreage	Price per acre	\$0 - \$18,676

(1) In determining certain of these inputs, the General Partner evaluates a variety of factors including economic conditions, industry and comparable companies and company specific developments including growth avenues, exit strategies and realization opportunities. The General Partner also evaluates the following unobservable inputs in considering the fair value of its investments: third party engineering reserve reports, oil and gas NYMEX future prices, risk-adjusted discount factors based on reserve category, capital expenditures and operating costs of the company, financial information obtained from each company including unaudited financial statements for the most recent period available, estimated financial performance and budget to actual variance analysis; current and projected financial condition of the company; current and projected ability of the company to service its debt obligations; type and amount of collateral, if any, underlying the investment; current financial ratios applicable to each investment; pending debt or capital restructuring of the company; projected operating results of the company; current information regarding any offers to purchase the investment; current ability of the company to raise any additional financing as needed. The General Partner has determined that market participants would take these inputs into account when valuing the investment. Once the General Partner has estimated the underlying entities' business enterprise value, a waterfall analysis of the entities' capital structure should be considered. Reserve categories are defined as follows: PDP - proved developed producing, PDNP - proved developed nonproducing, PUD - proved undeveloped, Prob - unproved probable, and Poss - unproved possible.

(2) Significant increases or decreases in any of the above unobservable inputs in isolation may result in a significant lower or higher fair value measurement, respectively.

During the nine months ended September 30, 2022, purchases of Level 3 investments totaled \$1,331,933,921. The classification of an investment within level 3 is based upon the significance of the unobservable inputs to the overall fair value measurement.

Transfers into and out of Level 3 are recorded at the value of the assets at the beginning of the year. During the nine months ended September 30, 2022, Special Opportunities Capital, LLC, valued at \$74,531,000,

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

was transferred from level 2 to level 3 of the fair value hierarchy. Because of the inherent uncertainty of valuation of these level 3 investments, those estimated values may differ significantly from values that would have been used had a ready market for the investments existed. Such differences could be material.

Concentration of Risk

As the Partnership's investments are primarily in the domestic independent oil and gas sector, revenue and profitability are dependent upon numerous factors beyond the Partnership's control, such as economic and political developments in the industry and competition from other sources of energy. The energy markets have historically been very volatile and there can be no assurance that oil and gas prices will not be subject to wide fluctuations in the future. A substantial or extended decline in oil and gas prices could have a material adverse effect on the Partnership's financial position, results of operations and cash flows.

The Partnership's investment program requires a moderate amount of diversification among its portfolio companies. Under the Partnership Agreement, the Partnership may not invest more than 15% of total commitments in any one portfolio company without the prior approval of the Advisory Board or 20% of total commitments in any one portfolio company without consent of at least 66 2/3% of the Limited Partners. This policy may subject the Partnership to greater volatility than would usually be present in a more diversified portfolio, inasmuch as poor performance with respect to any one investment by the Partnership may expose the Partnership to a greater degree of loss than would be the case with a more broadly diversified investment program.

Most of the total commitment will be invested in privately negotiated equity and equity-related investments. Generally, there is no readily available market for such investments and, as such, the Partnership might take longer to liquidate these positions than would be the case for investments in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices on these sales could be less than those originally paid by the Partnership. Also, issuers whose securities are not publicly traded may not be subject to public disclosure and other investor protection requirements applicable to publicly traded securities. In addition, the issuers of such privately negotiated securities are companies which typically have limited capitalization and limited operating histories, companies operating at a loss or with significant variations in operating results from period to period, companies which may need substantial additional capital to support operations and growth, and companies which may be highly leveraged. By their nature, such investments possess a high degree of business and financial risk that may result in substantial losses.

Cash and Cash Equivalents

Cash and cash equivalents consist of demand deposits and cash held in Fidelity Investments Money Market Funds Treasury Portfolio – Class I (“Fidelity money market account”), a money market fund which contains investments with weighted average maturities of three months or less. As of September 30, 2022, the Partnership has cash in its Fidelity money market account of \$28,933,320. The Partnership places its cash and cash equivalents with financial institutions, and, at times, cash held in bank accounts may exceed the Federal Deposit Insurance Corporation insured limit. Cash and cash equivalents are classified as Level 1 assets and are carried at cost or amortized cost which approximates fair value.

Income and Expenses

Income and expenses from the Partnership's general operations are recognized on the accrual basis.

Investment Transactions and Related Investment Income

Investment transactions are accounted for on a trade-date basis. Dividend income is recorded on the record date with the exception of dividend income from marketable securities which is recorded on the ex-dividend date.

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

Gains or Losses on Investments

Realized gains and losses on investments represent the difference between the original cost of the investments and the related market price at the sale or distribution date, net of expenses, as well as write-offs. The difference between the original cost and the estimated fair value of investments, including any receivable for holdbacks, owned at the end of the period represents unrealized gains or losses.

Income Taxes

No provision for federal income taxes is included in the accompanying financial statements. As the Partnership is not subject to income taxation, the tax effects of its activities accrue to the individual partners.

The Partnership's tax returns are subject to examination by federal and state taxing authorities. As of December 31, 2021, the earliest tax year that remains subject to examination under the standard limitation period is 2018. Pursuant to the Bipartisan Budget Act of 2015, for tax years beginning after December 31, 2017, if the IRS makes audit adjustments to the Partnership's income tax returns, it (and some states) may assess and collect any taxes (including any applicable penalties and interest) resulting from such audit adjustments directly from the Partnership. To the extent possible under the new rules, the Partnership's general partner may elect to either pay the taxes (including any applicable penalties and interest) directly to the IRS or, if eligible, issue a revised information statement to each current limited partner and former limited partner with respect to an audited and adjusted return. Although the Partnership's general partner may elect to have the limited partners take such audit adjustment into account and pay any resulting taxes (including applicable penalties or interest) in accordance with their interests in the Partnership during the tax year under audit, there can be no assurance that such election will be practical, permissible or effective in all circumstances. As a result, current limited partners may bear some or all of the tax liability resulting from such audit adjustment, even if such limited partners did not own an interest in the Partnership during the tax year under audit. If, as a result of any such audit adjustment, the Partnership is required to make payments of taxes, penalties and interest, the cash available for distribution to our limited partners might be substantially reduced. These rules are not applicable for tax years beginning on or prior to December 31, 2017.

In accordance with a provision of the FASB guidance "Income Taxes", the General Partner is required to determine whether a tax position of the Partnership is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement which could result in the Partnership recording a tax liability that would reduce partners' capital. Based on the General Partner's analysis, there are no material disclosures or adjustments impacting the Partnership's financial statements as of September 30, 2022. The Partnership does not expect that its assessment regarding unrecognized tax benefits will materially change over the next twelve months. However, the General Partner's conclusions may be subject to review and adjustment at a later date based on on-going analyses of tax laws, regulations and interpretations thereof and other factors.

NOTE 3 – INVESTMENT TRANSACTIONS:

The Partnership made equity investments in certain private entities that are primarily engaged in the acquisition, development and operation of oil and gas properties. Generally, the related limited liability company and partnership agreements provide for a specified percentage sharing of revenues and expenses until the Partnership has achieved a specified internal rate of return and return on investment. After this level of return has been achieved, the percentage-sharing ratio is adjusted to provide for an increased allocation to the management group of the investee and a decreased allocation to the Partnership.

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

Total contributions to and proceeds from investments are as follows:

	Nine months ended September 30, 2022	
	Contributions	Proceeds
Private equity investment holdings:		
Silverback Exploration II, LLC	\$ 45,927,000	\$ —
Black Swan Oil & Gas, LLC	46,915,902	—
XCL Resources Holdings, LLC	35,762,821	—
Piedra Energy IV, LLC	80,945,833	—
EFXI Raisa III HoldCo, LLC	—	293,169
Paloma Partners V Holdings, LLC	—	37,200,000
Special Opportunities Capital, LLC	5,803,958	65,150,794

Earthstone Energy Inc.	220,000,000	—
	<u>\$ 1,331,933,921</u>	<u>\$ 147,461,346</u>

In June 2022, the Partnership received additional sales proceeds from EFXI Raisa III Holdco, LLC of \$293,169, resulting in a realized loss of \$2,542,357.

In March 2022, Grayson Mill Holdings II, LLC sold a portion of its assets and distributed cash proceeds of \$44,817,383 to the Partnership, resulting in a realized gain of \$41,750,717.

In February 2022, Paloma Partners V Holdings, LLC sold all of its assets and distributed a return of capital of \$37,200,000 to the Partnership.

During the nine months ended September 30, 2022, Special Opportunities Capital, LLC sold a portion of its assets and distributed cash proceeds of \$65,150,794 to the Partnership, resulting in a realized gain of \$37,913,522.

NOTE 4 – ALLOCATIONS TO PARTNERS:

The Partnership Agreement provides that the net increase (decrease) in partners' capital resulting from operations associated with the Partnership is allocated 3% to the General Partner and 97% to the Limited Partners ("Partners' Sharing Ratio") until such time as the Limited Partners receive an 8% internal rate of return on their investment ("Preferred Return Payout"). After Preferred Return Payout is achieved, the General Partner is allocated 80% of the Limited Partner distributions and the Limited Partners are allocated the remaining 20% in proportion to their respective ownership percentages until such time the General Partner has been distributed 20% of total Limited Partner net distributions from the Partnership ("Catch-Up Payout"). After Catch-Up Payout is achieved, the Limited Partners are distributed net cash distributions equal to 80% of their original respective ownership interests and the remaining 20% distributed to the General Partner. Upon liquidation of the Partnership, the General Partner will be required to restore funds to the Partnership to the extent that the General Partner has received cumulative carried interest distributions in excess of amounts that would have been distributed to it pursuant to the formula set forth

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

above applied on an aggregate basis covering all transactions of the Partnership, net of income taxes thereon. Funds returned to the Partnership for this purpose will be distributed to the Limited Partners in proportion to their aggregate funded commitments.

Net increase (decrease) in partners' capital resulting from operations was allocated between the General Partner and Limited Partners in accordance with the allocation methodology described above. During the nine months ended September 30, 2022, net increase in partners' capital resulting from operations allocated to the General Partner and Limited Partners was \$637,805,300 and \$1,805,531,628, respectively, which includes an unrealized incentive allocation to the General Partner of \$564,505,192.

NOTE 5 – TRANSACTIONS WITH RELATED PARTIES:

The General Partner initially receives an annual management fee equal to 1.5% of total partner commitments, payable in advance at the beginning of each quarter. The initial management fee period expires upon the earlier of (a) five years from the final closing date, (b) the date the fund is fully invested, (c) the date a subsequent fund organized by the General Partner makes its first investment or (d) the occurrence of certain other events as specified in the Partnership Agreement. After such time, the annual management fee is equal to 1.5% of the Partnership's cash investment in remaining portfolio investments reduced by amounts distributed to the extent such amounts constitute a return of capital and any write-down or write-off where the General Partner has determined that such portfolio investment will not be repaid or recouped by the Partnership. The management fee paid by the Partnership is reduced in the subsequent quarter by 100% of any transaction fees received by the General Partner. The management fee constitutes full reimbursement by the Partnership to the General Partner for the General Partner's administrative expenses, including, but not limited to, salaries and wages of officers and employees of the General Partner, office rent, utilities and other general, administrative and overhead expenses. During the nine months ended September 30, 2022, the Partnership paid management fees of \$78,313,396 to the General Partner.

During the nine months ended September 30, 2022, the Partnership reimbursed EnCap Investments L.P. ("EnCap"), an affiliate of the Partnership, \$3,526,119 for general and administrative expenses. At September 30, 2022, the Partnership owed \$0 to EnCap for general and administrative expenses. During the nine months ended September 30, 2022, the Partnership was advanced \$9,600,000 by EnCap to fund portfolio companies. These advances were repaid to EnCap within the same quarter.

Managing Directors of the General Partner may serve on the Board of Directors of the Partnership's underlying portfolio companies.

Pursuant to the Partnership Agreement, the Partnership has agreed to indemnify the General Partner and its affiliates against certain losses and other liabilities to which they may become subject in connection with matters arising out of or in connection with the Partnership's business and affairs. The Partnership believes that it is unlikely that it will have to make material payments under these arrangements, and no liabilities related to these indemnifications have been recognized on the accompanying Statement of Assets, Liabilities and Partners' Capital.

NOTE 6 – FINANCIAL HIGHLIGHTS:

The following financial highlights for the year ended December 31, 2021, have been calculated in accordance with guidance provided in Accounting Standards Codification 946, "Financial Services – Investment Companies":

ENCAP ENERGY CAPITAL FUND XI, L.P.

NOTES TO FINANCIAL STATEMENTS

Net investment loss ratio	<u>-1.6%</u>
Expense ratios:	
Operating expenses	4.0%
Unearned incentive allocation	<u>0.0%</u>
Operating expenses and unearned incentive allocation ratio	<u>4.0%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2021)	<u>6.3%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2020)	<u>-26.3%</u>

The net investment loss and expense ratios are calculated for the Limited Partners taken as a whole. The net investment loss and operating expenses ratios do not reflect the effects of the incentive allocation to the General Partner, if any. The internal rate of return from inception is calculated based on the actual dates of the cash inflows and outflows and the residual value of the Limited Partners' capital account, net of all incentive allocations, as of each measurement date. Future realization of investments may be at different values than currently carried fair values, resulting in rates of return that may differ materially from that indicated above.

NOTE 7 – COMMITMENTS AND CONTINGENCIES:

The Partnership's investments are subject to legal proceedings, claims, and litigation arising in the ordinary course of business. Each investee defends itself vigorously against any such claims. Although the outcome of these matters is currently not determinable, the General Partner does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its financial position, results of operations, or cash flows.

In May 2022, the Partnership entered into a Guaranty Agreement with Wells Fargo Bank, N.A. ("Wells Fargo") to provide a \$75 million guaranty as part of XCL Resources Holdings, LLC's ("XCL") upsized bank facility. This facility, led by Wells Fargo, has an aggregate \$295 million borrowing base, comprised of a \$220 million borrowing base supported by XCL's upstream assets and \$75 million supported by the agreement with the Partnership. Any increases in the borrowing base supported by XCL's upstream assets at either of the scheduled borrowing base redeterminations at October 1, 2022 and February 1, 2023 will reduce the Partnership's guaranty amount on a dollar-for-dollar basis. Should the borrowing base supported by XCL's upstream assets not exceed the \$295 million threshold by February 1, 2023, Wells Fargo may call all or a portion from the Partnership (up to a maximum of \$75 million) and apply the proceeds thereof to the reduction of the loans. At the time of this agreement, XCL had extensive capital invested in > 25 horizontal wells in progress that received no borrowing base credit, and the company is currently on track to eliminate all of the outstanding Partnership obligation.

ENCAP ENERGY CAPITAL FUND XI-C, L.P.

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION:

EnCap Energy Capital Fund XI-C, L.P. (the “Partnership”), a Cayman exempt limited partnership, was formed on December 22, 2016 to provide its partners with an opportunity to participate as a limited partner in EnCap Energy Capital Fund XI, L.P. (“Fund XI”), a Texas limited partnership, indirectly through its interest in EnCap Energy Fund XI-C, L.P. (“C Blocker”). C Blocker, a 94.154458% subsidiary of the Partnership, was formed on December 22, 2016 for the purpose of being a limited partner of and holding record title to the limited partner interest in Fund XI. Fund XI was formed on December 22, 2016 to invest in privately negotiated equity and equity-related investments in the upstream and midstream independent oil and gas sector of North America. The Partnership operates pursuant to a partnership agreement (the “Partnership Agreement”) dated December 22, 2016, which should be referred to for a complete description of the provisions of the Partnership. EnCap Equity Fund XI-C Cayman GP, LLC (“General Partner”), a Delaware limited liability company, is the sole general partner of the Partnership. The General Partner does not own an economic interest in the Partnership.

The Partnership’s final close was on November 30, 2017. There are 72 investors owning the limited partnership interests (“Limited Partners”) in the Partnership. The Limited Partners’ total capital commitments to the Partnership are \$914.1 million. The Limited Partners’ total outstanding commitments as of September 30, 2022 were approximately \$241.9 million. The ratio of total contributed capital to total committed capital is 74.2%.

Through its investment in C Blocker, the Partnership indirectly invests in all corresponding investments in Fund XI and receives a proportionate amount of investment income, gains (losses) and expenses equal to its relative contribution of capital as pursuant to the Fund XI partnership agreement. The financial statements of Fund XI, including the Schedule of Investments, are attached to this report and should be read with the Partnership’s financial statements. The Partnership’s funded ownership interest in Fund XI is 13.131019%.

The Partnership shall be dissolved upon the dissolution of Fund XI or the expiration of a 10-year period ending December 22, 2026, unless greater than 75% of the Limited Partners agree to extend the Partnership for up to two additional one-year periods in order to permit an orderly liquidation and winding up of the Partnership.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The Partnership is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board Accounting Codification (“ASC”) 946, Financial Services – Investment Companies.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the General Partner to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results, including the ultimate amount realized upon the sale of illiquid and/or fair valued investments, can, and often do, differ from those estimates.

ENCAP ENERGY CAPITAL FUND XI-C, L.P.

NOTES TO FINANCIAL STATEMENTS

Investment valuation and transactions

The Financial Standards Accounting Board ("FASB") guidance "Fair Value Measures," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under the guidance are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 Prices, inputs or modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no marked activity).

As of September 30, 2022, the investment in C Blocker is excluded from the fair value hierarchy leveling as the fair value of the investment was measured at net asset value ("NAV") using the practical expedient. Fund XI's valuation policies are discussed in Note 2 of the Fund XI financial statements attached to this report.

Concentration of Risk

As the Partnership's investment in Fund XI is primarily related to the domestic independent oil and gas sector, revenue and profitability are dependent upon numerous factors beyond the Partnership's control, such as economic and political developments in the industry and competition from other sources of energy. The energy markets have historically been very volatile and there can be no assurance that oil and gas prices will not be subject to wide fluctuations in the future. A substantial or extended decline in oil and gas prices could have a material adverse effect on the Partnership's financial position, results of operations and cash flows.

Fund XI's investment program requires a moderate amount of diversification among its portfolio companies. Under the Partnership Agreement, Fund XI may not invest more than 15% of total commitments in any one portfolio company without the prior approval of the Advisory Board or 20% of total commitments in any one portfolio company without consent of at least 66 2/3% of its limited partners. This policy may subject Fund XI to greater volatility than would usually be present in a more diversified portfolio, inasmuch as poor performance with respect to any one investment by Fund XI may expose the Partnership to a greater degree of loss than would be the case with a more broadly diversified investment program.

Most of the total commitment will be invested through Fund XI in privately negotiated equity and equity-related investments. Generally, there is no readily available market for such investments and, as such, Fund XI might take longer to liquidate these positions than would be the case for investments in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices on these sales could be less than those originally paid by Fund XI. Also, issuers whose securities are not publicly traded may not be subject to public disclosure and other investor protection requirements applicable to publicly traded securities. In addition, the issuers of such privately negotiated securities are companies which typically have limited capitalization and limited operating histories, companies operating at a loss or with significant variations in operating results from period to period, companies which may need substantial additional capital to support operations and growth, and companies which may be highly leveraged. By their nature, such investments possess a high degree of business and financial risk that may result in substantial losses.

ENCAP ENERGY CAPITAL FUND XI-C, L.P.

NOTES TO FINANCIAL STATEMENTS

Cash

Cash represents cash deposits held at financial institutions which is readily available. At any time, cash in financial institutions may exceed federally insured limits.

Income and Expenses

Income and expenses from the Partnership's general operations are recognized on the accrual basis.

Gains or Losses on Investments

Realized gains and losses on investments represent the pro-rata allocation of Fund XI's difference between the original cost of the investments and the related market price at the sale or distribution date, net of expenses, as well as write-offs. The difference between the original cost and the estimated fair value of investments, including any receivable for holdbacks, owned at the end of the period represents unrealized gains or losses.

Income Taxes

The Partnership's financial statements include the Partnership's allocable share of the provisions for income tax expense and income taxes payable by its subsidiary, C Blocker. In accordance with the FASB guidance "Income Taxes", C Blocker provides for all income taxes payable and for deferred taxes arising from temporary differences between the book and tax bases of assets and liabilities using enacted tax rates and laws in effect in the years in which differences are expected to reverse. A valuation allowance is recognized for deferred tax assets if it is more likely than not that some or all of the deferred tax asset will not be realized.

Income taxes paid and payable by C Blocker are allocated to the Partners based on their respective sharing percentages in effect at the time of the respective expense or benefit is incurred.

The Partnership is not subject to income taxation; the tax effects of its activities accrue to the individual partners. The Partnership's tax returns are subject to examination by federal and state taxing authorities. As of December 31, 2021, the earliest tax year that remains subject to examination under the standard limitation period is 2018. Pursuant to the Bipartisan Budget Act of 2015, for tax years beginning after December 31, 2017, if the IRS makes audit adjustments to the Partnership's income tax returns, it (and some states) may assess and collect any taxes (including any applicable penalties and interest) resulting from such audit adjustments directly from the Partnership. To the extent possible under the new rules, the Partnership's general partner may elect to either pay the taxes (including any applicable penalties and interest) directly to the IRS or, if eligible, issue a revised information statement to each current limited partner and former limited partner with respect to an audited and adjusted return. Although the Partnership's general partner may elect to have the limited partners take such audit adjustment into account and pay any resulting taxes (including applicable penalties or interest) in accordance with their interests in the Partnership during the tax year under audit, there can be no assurance that such election will be practical, permissible or effective in all circumstances. As a result, current limited partners may bear some or all of the tax liability resulting from such audit adjustment, even if such limited partners did not own an interest in the Partnership during the tax year under audit. If, as a result of any such audit adjustment, the Partnership is required to make payments of taxes, penalties and interest, the cash available for distribution to our limited partners might be substantially reduced. These rules are not applicable for tax years beginning on or prior to December 31, 2017.

The General Partner is required to determine whether a tax position of the Partnership is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being

ENCAP ENERGY CAPITAL FUND XI-C, L.P.

NOTES TO FINANCIAL STATEMENTS

realized upon ultimate settlement which could result in the Partnership recording a tax liability that would reduce partners' capital. Based on the General Partner's analysis, there are no material disclosures or adjustments impacting the Partnership's financial statements as of September 30, 2022. The Partnership does not expect that its assessment regarding unrecognized tax benefits will materially change over the next twelve months. However, the General Partner's conclusions may be subject to review and adjustment at a later date based on on-going analyses of tax laws, regulations and interpretations thereof and other factors.

NOTE 3 – ALLOCATIONS TO PARTNERS:

The Partnership Agreement provides that the net increase (decrease) in partners' capital resulting from operations associated with the Partnership is allocated 100% to the Limited Partners on a pro-rata basis.

NOTE 4 – TRANSACTIONS WITH RELATED PARTIES:

During the nine months ended September 30, 2022, the Partnership reimbursed EnCap Investments L.P. ("EnCap"), an affiliate of the Partnership, \$77,352 for general and administrative expenses. At September 30, 2022, the Partnership owed EnCap \$0 for general and administrative expenses.

NOTE 5 – FINANCIAL HIGHLIGHTS:

The following financial highlights for the year ended December 31, 2021, have been calculated in accordance with guidance provided in Accounting Standards Codification 946, "Financial Services – Investment Companies":

Net investment loss ratio	<u>-1.6%</u>
Expense ratios:	
Expenses	4.8%
Unearned incentive allocation	<u>0.0%</u>
Expenses including unearned incentive allocation ratio	<u>4.8%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2021)	<u>6.0%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2020)	<u>-26.4%</u>

The net investment loss and expense ratios are calculated for the Limited Partners taken as a whole. The net investment loss and expenses ratios do not reflect the effects of the incentive allocation to the General Partner. The expenses ratio includes the investment expenses and income tax provision allocated from C Blocker. The internal rate of return from inception is calculated based on the actual dates of the cash inflows and outflows and the residual value of the Limited Partners' capital account, net of all incentive allocations, if any, as of each measurement date. Future realization of investments may be at different values than currently carried fair values, resulting in rates of return that may differ materially from that indicated above.

NOTE 6 – COMMITMENTS AND CONTINGENCIES:

The Partnership's investments are subject to legal proceedings, claims, and litigation arising in the ordinary course of business. Each investee defends itself vigorously against any such claims. Although the outcome of these matters is currently not determinable, the General Partner does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its financial position, results of operations, or cash flows.

ENCAP ENERGY CAPITAL FUND XI-C FACILITATOR, LLC

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION:

EnCap Energy Capital Fund XI-C Facilitator, LLC (the “Company”), a Delaware limited liability company, was formed on November 30, 2017 to provide its members with an opportunity to participate as a limited partner in EnCap Energy Capital Fund XI, L.P. (“Fund XI”), a Texas limited partnership, indirectly through its interest in EnCap Energy Fund XI-C, L.P. (“C Blocker”). C Blocker, a 5.845542% subsidiary of the Company, was formed on December 22, 2016 for the purpose of being a limited partner of and holding record title to the limited partner interest in Fund XI. Fund XI was formed on December 22, 2016 to invest in privately negotiated equity and equity-related investments in the upstream and midstream independent oil and gas sector of North America. The Company operates pursuant to a limited liability company agreement (the “Company Agreement”) dated November 30, 2017, which should be referred to for a complete description of the provisions of the Company. EnCap Equity Fund XI-C Cayman GP, LLC (“Manager”), a Delaware limited liability company, is the manager of the Company and the general partner of Fund XI.

There are 2 investors owning the members’ equity interests (“Members”) in the Company. The Members’ total capital commitments to the Company are \$56.8 million. The Members’ total outstanding commitments as of September 30, 2022 were approximately \$15.0 million. The ratio of total contributed capital to total committed capital is 74.2%.

Through its investment in C Blocker, the Company indirectly invests in all corresponding investments in Fund XI and receives a proportionate amount of investment income, gains (losses) and expenses equal to its relative contribution of capital as pursuant to the Fund XI partnership agreement. The financial statements of Fund XI, including the Schedule of Investments, are attached to this report and should be read with the Company’s financial statements. The Company’s funded ownership interest in Fund XI is 0.815234%.

The Company shall be dissolved upon the dissolution of Fund XI, the election of the Members and the Manager or an entry of a judicial decree of dissolution of the Company.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation

The accompanying consolidated financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The Company is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board Accounting Codification (“ASC”) 946, Financial Services – Investment Companies.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Manager to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results, including the ultimate amount realized upon the sale of illiquid and/or fair valued investments, can, and often do, differ from those estimates.

Investment valuation and transactions

The Financial Standards Accounting Board (“FASB”) guidance “Fair Value Measures,” establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level

ENCAP ENERGY CAPITAL FUND XI-C FACILITATOR, LLC

NOTES TO FINANCIAL STATEMENTS

1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under the guidance are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 Prices, inputs or modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no marked activity).

As of September 30, 2022, the investment in C Blocker is excluded from the fair value hierarchy leveling as the fair value of the investment was measured at net asset value ("NAV") using the practical expedient. Fund XI's valuation policies are discussed in Note 2 of the Fund XI financial statements attached to this report.

Concentration of Risk

As the Company's investment in Fund XI is primarily related to the domestic independent oil and gas sector, revenue and profitability are dependent upon numerous factors beyond the Company's control, such as economic and political developments in the industry and competition from other sources of energy. The energy markets have historically been very volatile and there can be no assurance that oil and gas prices will not be subject to wide fluctuations in the future. A substantial or extended decline in oil and gas prices could have a material adverse effect on the Company's financial position, results of operations and cash flows.

Fund XI's investment program requires a moderate amount of diversification among its portfolio companies. Under Fund XI's Partnership Agreement, Fund XI may not invest more than 15% of total commitments in any one portfolio company without the prior approval of the Advisory Board or 20% of total commitments in any one portfolio company without consent of at least 66 2/3% of its limited partners. This policy may subject Fund XI to greater volatility than would usually be present in a more diversified portfolio, inasmuch as poor performance with respect to any one investment by Fund XI may expose the Company to a greater degree of loss than would be the case with a more broadly diversified investment program.

Most of the total commitment will be invested through Fund XI in privately negotiated equity and equity-related investments. Generally, there is no readily available market for such investments and, as such, Fund XI might take longer to liquidate these positions than would be the case for investments in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices on these sales could be less than those originally paid by Fund XI. Also, issuers whose securities are not publicly traded may not be subject to public disclosure and other investor protection requirements applicable to publicly traded securities. In addition, the issuers of such privately negotiated securities are companies which typically have limited capitalization and limited operating histories, companies operating at a loss or with significant variations in operating results from period to period, companies which may need substantial additional capital to support operations and growth, and companies which may be highly leveraged. By their nature, such investments possess a high degree of business and financial risk that may result in substantial losses.

Cash and Cash Equivalents

Cash and cash equivalents consist of demand deposits and cash held in Fidelity Investments Money Market Funds Treasury Portfolio – Class I ("Fidelity money market account"), a money market fund which contains investments with weighted average maturities of three months or less. As of September 30, 2022, the Company has no cash in its Fidelity money market account. The Company places its cash and cash

ENCAP ENERGY CAPITAL FUND XI-C FACILITATOR, LLC

NOTES TO FINANCIAL STATEMENTS

equivalents with financial institutions and, at times, cash held in bank accounts may exceed the Federal Deposit Insurance Corporation insured limit. Cash and cash equivalents are classified as Level 1 assets and are carried at cost or amortized cost which approximates fair value.

Income and Expenses

Income and expenses from the Company's general operations are recognized on the accrual basis.

Gains or Losses on Investments

Realized gains and losses on investments represent the pro-rata allocation of Fund XI's difference between the original cost of the investments and the related market price at the sale or distribution date, net of expenses, as well as write-offs. The difference between the original cost and the estimated fair value of investments, including any receivable for holdbacks, owned at the end of the period represents unrealized gains or losses.

Income Taxes

The Company's financial statements include the Company's allocable share of the provisions for income tax expense and income taxes payable by its subsidiary, C Blocker. In accordance with the FASB guidance "Income Taxes", C Blocker provides for all income taxes payable and for deferred taxes arising from temporary differences between the book and tax bases of assets and liabilities using enacted tax rates and laws in effect in the years in which differences are expected to reverse. A valuation allowance is recognized for deferred tax assets if it is more likely than not that some or all of the deferred tax asset will not be realized.

Income taxes paid and payable by C Blocker are allocated to the Members based on their respective sharing percentages in effect at the time of the respective expense or benefit is incurred.

The Company is taxed as a partnership and is not subject to income taxation, the tax effects of its activities accrue to the Members. The Company's tax returns are subject to examination by federal, state, local, and foreign jurisdictions, where applicable. As of December 31, 2021, the earliest tax year that remains subject to examination under the standard limitation period is 2018. Pursuant to the Bipartisan Budget Act of 2015, for tax years beginning after December 31, 2017, if the IRS makes audit adjustments to the Company's income tax returns, it (and some states) may assess and collect any taxes (including any applicable penalties and interest) resulting from such audit adjustments directly from the Company. To the extent possible under the new rules, the Company's manager may elect to either pay the taxes (including any applicable penalties and interest) directly to the IRS or, if eligible, issue a revised information statement to each Member and former Member with respect to an audited and adjusted return. Although the Company's manager may elect to have the members take such audit adjustment into account and pay any resulting taxes (including applicable penalties or interest) in accordance with their interests in the Company during the tax year under audit, there can be no assurance that such election will be practical, permissible or effective in all circumstances. As a result, current Members may bear some or all of the tax liability resulting from such audit adjustment, even if such Members did not own units in the Company during the tax year under audit. If, as a result of any such audit adjustment, the Company is required to make payments of taxes, penalties and interest, the cash available for distribution to the Members might be substantially reduced. These rules are not applicable for tax years beginning on or prior to December 31, 2017.

The Manager is required to determine whether a tax position of the Company is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement which could result in the Company recording a tax liability that would reduce members' capital. Based on the Manager's analysis, there are no material disclosures or adjustments impacting the

ENCAP ENERGY CAPITAL FUND XI-C FACILITATOR, LLC

NOTES TO FINANCIAL STATEMENTS

Company's financial statements as of September 30, 2022. The Company does not expect that its assessment regarding unrecognized tax benefits will materially change over the next twelve months. However, the Manager's conclusions may be subject to review and adjustment at a later date based on on-going analyses of tax laws, regulations and interpretations thereof and other factors.

NOTE 3 – ALLOCATIONS TO MEMBERS:

The Company Agreement provides that net income (loss) associated with the Company is allocated 100% to the Members on a pro-rata basis.

NOTE 4 – TRANSACTIONS WITH RELATED PARTIES:

During the nine months ended September 30, 2022, the Company reimbursed EnCap Investments L.P. ("EnCap"), an affiliate of the Company, \$31,624 for general and administrative expenses. At September 30, 2022, the Company owed EnCap \$0 for general and administrative expenses.

NOTE 5 – FINANCIAL HIGHLIGHTS:

The following financial highlights for the year ended December 31, 2021, have been calculated in accordance with guidance provided in Accounting Standards Codification 946, "Financial Services – Investment Companies":

Net investment loss ratio	<u>-1.8%</u>
Expense ratios:	
Expenses	5.0%
Unearned incentive allocation	<u>0.0%</u>
Expenses including unearned incentive allocation ratio	<u>5.0%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2021)	<u>5.9%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2020)	<u>-27.0%</u>

The net investment loss and expense ratios are calculated for the Members taken as a whole. The net investment loss and expenses ratios do not reflect the effects of the incentive allocation to the Manager. The expenses ratio includes the investment expenses and income tax provision allocated from C Blocker. The internal rate of return from inception is calculated based on the actual dates of the cash inflows and outflows and the residual value of the Members' capital account, net of all incentive allocations, if any, as of each measurement date. Future realization of investments may be at different values than currently carried fair values, resulting in rates of return that may differ materially from that indicated above.

NOTE 6 – CONTINGENCIES:

The Company's investments are subject to legal proceedings, claims, and litigation arising in the ordinary course of business. Each investee defends itself vigorously against any such claims. Although the outcome of these matters is currently not determinable, the Manager does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its financial position, results of operations, or cash flows.

ENCAP ENERGY CAPITAL FUND XI-D, L.P.

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION:

EnCap Energy Capital Fund XI-D, L.P. (the “Partnership”), a Texas limited partnership, was formed on December 22, 2016 to provide its partners with an opportunity to participate as a limited partner in EnCap Energy Capital Fund XI, L.P. (“Fund XI”), a Texas limited partnership. Fund XI was formed on December 22, 2016 to invest in privately negotiated equity and equity-related investments in the upstream and midstream independent oil and gas sector of North America. The Partnership operates pursuant to a partnership agreement (the “Partnership Agreement”) dated December 22, 2016, which should be referred to for a complete description of the provisions of the Partnership. EnCap Equity Fund XI-D GP, LLC (“General Partner”), a Delaware limited liability company, is the sole general partner of the Partnership. The General Partner does not own an economic interest in the Partnership.

The Partnership’s final close was on November 30, 2017. There are 28 investors owning the limited partnership interests (“Limited Partners”) in the Partnership. The Limited Partners’ total capital commitments to the Partnership are \$576.4 million. The Limited Partners’ total outstanding commitments as of September 30, 2022 were approximately \$152.5 million. The ratio of total contributed capital to total committed capital is 74.2%.

As a limited partner in Fund XI, the Partnership indirectly invests in all corresponding investments in Fund XI and receives a proportionate amount of investment income, gains (losses) and expenses equal to its relative contribution of capital as pursuant to the Fund XI partnership agreement. The financial statements of Fund XI, including the Schedule of Investments, are attached to this report and should be read with the Partnership’s financial statements. The Partnership’s funded ownership interest in Fund XI is 8.279808%. The Partnership will participate in Fund XI indirectly through EnCap Energy XI-D, Inc. (“Fund XI-D, Inc.”). Fund XI-D, Inc. will hold record title to the limited partnership interest in Fund XI as a nominee for and behalf of the Partnership as described in the Agency Agreement. Beneficial ownership will remain with the Partnership, which will be treated as the owner of the Partnership interest in Fund XI for U.S. federal income tax purposes.

The Partnership shall be dissolved upon the dissolution of Fund XI or the expiration of a 10-year period ending December 22, 2026, unless greater than 75% of the Limited Partners agree to extend the Partnership for up to two additional one-year periods in order to permit an orderly liquidation and winding up of the Partnership.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The Partnership is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board Accounting Codification (“ASC”) 946, Financial Services – Investment Companies.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the General Partner to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results, including the ultimate amount realized upon the sale of illiquid and/or fair valued investments, can, and often do, differ from those estimates.

ENCAP ENERGY CAPITAL FUND XI-D, L.P.

NOTES TO FINANCIAL STATEMENTS

Investment valuation and transactions

The Financial Standards Accounting Board ("FASB") guidance "Fair Value Measures," establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under the guidance are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 Prices, inputs or modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no marked activity).

As of September 30, 2022, the investment in Fund XI is excluded from the fair value hierarchy leveling as the fair value of the investment was measured at net asset value ("NAV") using the practical expedient. Fund XI's valuation policies are discussed in Note 2 of the Fund XI financial statements attached to this report.

Concentration of Risk

As the Partnership's investment in Fund XI is primarily related to the domestic independent oil and gas sector, revenue and profitability are dependent upon numerous factors beyond the Partnership's control, such as economic and political developments in the industry and competition from other sources of energy. The energy markets have historically been very volatile and there can be no assurance that oil and gas prices will not be subject to wide fluctuations in the future. A substantial or extended decline in oil and gas prices could have a material adverse effect on the Partnership's financial position, results of operations and cash flows.

Fund XI's investment program requires a moderate amount of diversification among its portfolio companies. Under the Partnership Agreement, Fund XI may not invest more than 15% of total commitments in any one portfolio company without the prior approval of the Advisory Board or 20% of total commitments in any one portfolio company without consent of at least 66 2/3% of its limited partners. This policy may subject Fund XI to greater volatility than would usually be present in a more diversified portfolio, inasmuch as poor performance with respect to any one investment by Fund XI may expose the Partnership to a greater degree of loss than would be the case with a more broadly diversified investment program.

Most of the total commitment will be invested through Fund XI in privately negotiated equity and equity-related investments. Generally, there is no readily available market for such investments and, as such, Fund XI might take longer to liquidate these positions than would be the case for investments in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices on these sales could be less than those originally paid by Fund XI. Also, issuers whose securities are not publicly traded may not be subject to public disclosure and other investor protection requirements applicable to publicly traded securities. In addition, the issuers of such privately negotiated securities are companies which typically have limited capitalization and limited operating histories, companies operating at a loss or with significant variations in operating results from period to period, companies which may need substantial additional capital to support operations and growth, and companies which may be highly leveraged. By their nature, such investments possess a high degree of business and financial risk that may result in substantial losses.

ENCAP ENERGY CAPITAL FUND XI-D, L.P.

NOTES TO FINANCIAL STATEMENTS

Cash and cash equivalents

Cash and cash equivalents consist of demand deposits and cash held in Fidelity Investments Money Market Funds Treasury Portfolio – Class I (“Fidelity money market account”), a money market fund which contains investments with weighted average maturities of three months or less. As of September 30, 2022, the Partnership has no cash in its Fidelity money market account. The Partnership places its cash and cash equivalents with financial institutions and, at times, cash held in bank accounts may exceed the Federal Deposit Insurance Corporation insured limit. Cash and cash equivalents are classified as Level 1 assets and are carried at cost or amortized cost which approximates fair value.

Income and Expenses

Income and expenses from the Partnership’s general operations are recognized on the accrual basis.

Gains or Losses on Investments

Realized gains and losses on investments represent the pro-rata allocation of Fund XI’s difference between the original cost of the investments and the related market price at the sale or distribution date, net of expenses, as well as write-offs. The difference between the original cost and the estimated fair value of investments, including any receivable for holdbacks, owned at the end of the period represents unrealized gains or losses.

Income Taxes

No provision for federal income taxes is included in the accompanying financial statements. As the Partnership is not subject to income taxation, the tax effects of its activities accrue to the individual partners.

The Partnership’s tax returns are subject to examination by federal and state taxing authorities. As of December 31, 2021, the earliest tax year that remains subject to examination under the standard limitation period is 2018. Pursuant to the Bipartisan Budget Act of 2015, for tax years beginning after December 31, 2017, if the IRS makes audit adjustments to the Partnership’s income tax returns, it (and some states) may assess and collect any taxes (including any applicable penalties and interest) resulting from such audit adjustments directly from the Partnership. To the extent possible under the new rules, the Partnership’s general partner may elect to either pay the taxes (including any applicable penalties and interest) directly to the IRS or, if eligible, issue a revised information statement to each current limited partner and former limited partner with respect to an audited and adjusted return. Although the Partnership’s general partner may elect to have the limited partners take such audit adjustment into account and pay any resulting taxes (including applicable penalties or interest) in accordance with their interests in the Partnership during the tax year under audit, there can be no assurance that such election will be practical, permissible or effective in all circumstances. As a result, current limited partners may bear some or all of the tax liability resulting from such audit adjustment, even if such limited partners did not own an interest in the Partnership during the tax year under audit. If, as a result of any such audit adjustment, the Partnership is required to make payments of taxes, penalties and interest, the cash available for distribution to our limited partners might be substantially reduced. These rules are not applicable for tax years beginning on or prior to December 31, 2017.

In accordance with a provision of the FASB guidance “Income Taxes”, the General Partner is required to determine whether a tax position of the Partnership is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement which could result in the Partnership recording a tax liability that would reduce partners’ capital. Based on the General Partner’s analysis, there are no material disclosures or adjustments impacting the Partnership’s financial statements as of September 30, 2022. The Partnership does not expect that its assessment regarding

ENCAP ENERGY CAPITAL FUND XI-D, L.P.

NOTES TO FINANCIAL STATEMENTS

unrecognized tax benefits will materially change over the next twelve months. However, the General Partner's conclusion may be subject to review and adjustment at a later date based on on-going analyses of tax laws, regulations and interpretations thereof and other factors.

NOTE 3 – ALLOCATIONS TO PARTNERS:

The Partnership Agreement provides that the net increase (decrease) in partners' capital resulting from operations associated with the Partnership is allocated 100% to the Limited Partners on a pro-rata basis.

NOTE 4 – TRANSACTIONS WITH RELATED PARTIES:

During the nine months ended September 30, 2022, the Partnership reimbursed EnCap Investments L.P. ("EnCap"), an affiliate of the Partnership, \$75,071 for general and administrative expenses. At September 30, 2022, the Partnership owed EnCap \$0 for general and administrative expenses.

NOTE 5 – FINANCIAL HIGHLIGHTS:

The following financial highlights for the year ended December 31, 2021, have been calculated in accordance with guidance provided in Accounting Standards Codification 946, "Financial Services – Investment Companies":

Net investment loss ratio	<u>-1.6%</u>
Expense ratios:	
Operating expenses	4.0%
Unearned incentive allocation	<u>0.0%</u>
Operating expenses and unearned incentive allocation ratio	<u>4.0%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2021)	<u>6.3%</u>
Internal rate of return net of incentive allocation (Inception to December 31, 2020)	<u>-26.4%</u>

The net investment loss and expense ratios are calculated for the Limited Partners taken as a whole. The net investment loss and operating expenses ratios do not reflect the effects of the incentive allocation to the General Partner. The expense ratios include expenses allocated from Fund XI. The internal rate of return from inception is calculated based on the actual dates of the cash inflows and outflows and the residual value of the Limited Partners' capital account, net of all incentive allocations, if any, as of each measurement date. Future realization of investments may be at different values than currently carried fair values, resulting in rates of return that may differ materially from that indicated above.

NOTE 6 – CONTINGENCIES:

The Partnership's investments are subject to legal proceedings, claims, and litigation arising in the ordinary course of business. Each investee defends itself vigorously against any such claims. Although the outcome of these matters is currently not determinable, the General Partner does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its financial position, results of operations, or cash flows.
