# Disclaimer

This Presentation (the “Presentation”) has been prepared by EnCap Investments L.P. (“EnCap”) and is being delivered on a confidential basis in connection with EnCap’s annual Investor Conference for informational purposes only to current investors in existing EnCap funds. The information contained in the Presentation is confidential and its treatment is governed by the terms of the operating agreements of the applicable EnCap fund. Any reproduction or distribution of the Presentation, in whole or in part, or the disclosure of any portion of its contents, without the prior written consent of EnCap, is strictly prohibited. By accepting delivery of the Presentation, each recipient agrees to the foregoing and acknowledges on behalf of itself and its affiliates the following restrictions, limitations and qualifications.

The distribution of the Presentation does not constitute an offer to sell or a solicitation of an offer to buy interests in any fund managed or sponsored by EnCap and shall not be deemed to be any such offer or solicitation. Any such offer or solicitation will be made only pursuant to a confidential private placement memorandum of such fund, which will describe the terms and conditions of an investment in such fund, certain risks related to an investment in such fund, and set forth such fund’s subscription documents.

Certain information contained herein has been obtained from published or unpublished sources prepared by other parties not affiliated with EnCap. Neither EnCap nor its affiliates have verified any finding in the information attributed to a third-party herein and recipients of the Presentation should make their own independent investigations and evaluations of any such information. Any projections, forecasts and estimates and illustrative case studies contained in the Presentation are necessarily speculative in nature and are based upon certain assumptions, and are provided for illustrative purposes only. It can be expected that some or all of such assumptions will not materialize or will vary significantly from actual results. Accordingly, any projections are only estimates and actual results will differ and may vary substantially from the projections or estimates shown. EnCap expressly disclaims any representations or warranties as to, the projections, forecasts, estimates and case studies contained in the Presentation.

Past performance is not indicative of future results. There can be no assurances that any EnCap fund will achieve its objectives or avoid losses. Market conditions and legal and contractual restrictions may limit the liquidity of investments. Accordingly, actual realized returns on investment may differ materially from the values indicated herein.

Unless otherwise noted, all references to internal rate of return represent gross internal rate of return (“IRR”), and references to return on investment represent gross return on investment (“ROI”), in each case as further described in the following paragraph. Gross performance information does not reflect management fees, carried interests and other fees and expenses borne by investors in a fund, which will reduce returns and in the aggregate are expected to be substantial.

Gross IRR is calculated on the basis of the actual timing of investment inflows and outflows, aggregated monthly, and the return is annualized, without giving effect to carried interest, management fees, and other expenses of the type that would be borne by a fund’s investors. Gross ROI is calculated as total realized proceeds and unrealized values (if applicable) without giving effect to management fees, carried interest, and other fees or expenses of the type that would be borne by a fund’s investors, divided by the total capital invested. Actual IRRs (or net IRRs) and actual ROIs (or net ROIs) are calculated after taking into account management fees, carried interest, and fund expenses and will be lower than the gross IRRs and gross ROIs, respectively.

Certain information contained in this Presentation includes forward-looking statements. Forward-looking statements, which involve assumptions and describe the future plans, strategies or expectations of the management of EnCap, are generally identifiable by use of the words “will”, “shall”, “may”, “should”, “expect”, “anticipate”, “estimate”, “believe”, “intend”, “plan” or “project” or the negative of these words or other variations on these words or comparable terminology. Actual results, performance, liquidity, financial condition, prospects and opportunities may differ materially from those expressed in, or implied by, these forward-looking statements as a result of various risks, uncertainties and other factors. Except as expressly required by the federal securities laws, there is no undertaking to update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason.

The statements made in the Presentation are as of the date on the cover and EnCap does not undertake any obligation to update the information contained herein or the assumptions on which such information was based in light of later events, developments or circumstances. EnCap and its affiliates make no representations or warranties, express or implied, as to the accuracy or completeness of any information contained in the Presentation and expressly disclaim any responsibility or liability for any loss or damage suffered or incurred by the recipient or any other person or entity (whether direct, indirect, consequential, reasonably foreseeable or otherwise) however caused (including but not limited to negligence) in connection with the information contained herein or the authenticity, accuracy, or completeness of such information. The recipient hereby acknowledges EnCap’s disclaimer of liability and on behalf of itself and its affiliates expressly releases EnCap and its affiliates and representatives, from any liability, loss or damage.

EnCap reserves the right to request the return or destruction of the Presentation at any time, and each recipient thereof agrees to return or destroy these materials immediately upon such request.

# Constructive Macro Environment for Oil & Gas

## Growing Worldwide Demand for Energy

- Worldwide energy consumption continues to rise
- Renewables will grow market share but oil & gas still needed long term to meet demand
- Oil & gas will continue to be the backbone for energy supply

## Capital Intensive & Declining Asset Base

- Significant investment required to simply keep production flat
- Over \$4.5 trillion of upstream investment needed to meet projected demand through 2030<sup>(1)</sup>

## Worldwide Underinvestment

- Meaningful reduction in oil & gas investment by Majors and U.S. independents has hindered global production capacity
- Focus on shareholder returns over growth and market volatility have contributed to reduced investment in upstream
- ESG and anti-fossil fuel movements have pressured the industry over the last 5 years

1. Based on 2022 IEA STEPS forecast for upstream oil and gas investments.

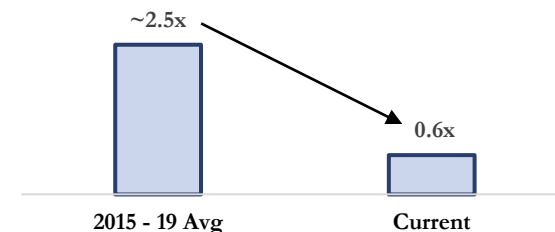

# E&P Industry is Healthy & Generating Returns

## Healthy Balance Sheets

- Investors demanding prudent leverage levels
- Balance sheets across the industry have continued to improve
- Low leverage has mitigated impact from increased interest rates

### Leverage Profile of Publics

## Attractive Drilling Returns

- Focus on capital efficiency is driving solid well productivity
- Multi-well pad development, longer laterals, and technology have offset cost inflation
- Margins continue to be strong at current commodity prices

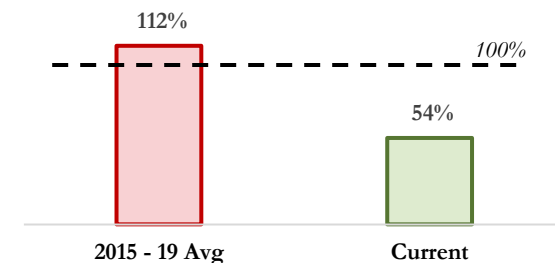

### Indicative Margin: \$75/Bbl

## Strong Free Cash Flow Generation

- High margins and capital discipline generating attractive yields
- ~83% of public companies have active shareholder return plans
- E&P FCF yield ~12% (S&P ~5%)

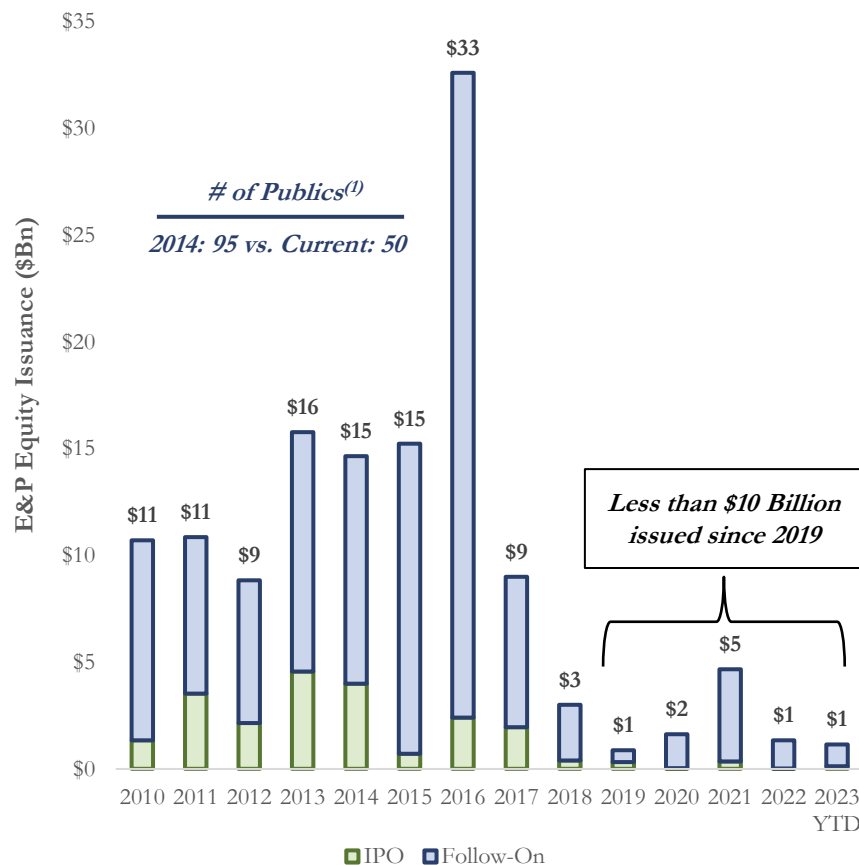

### Reinvestment Rate

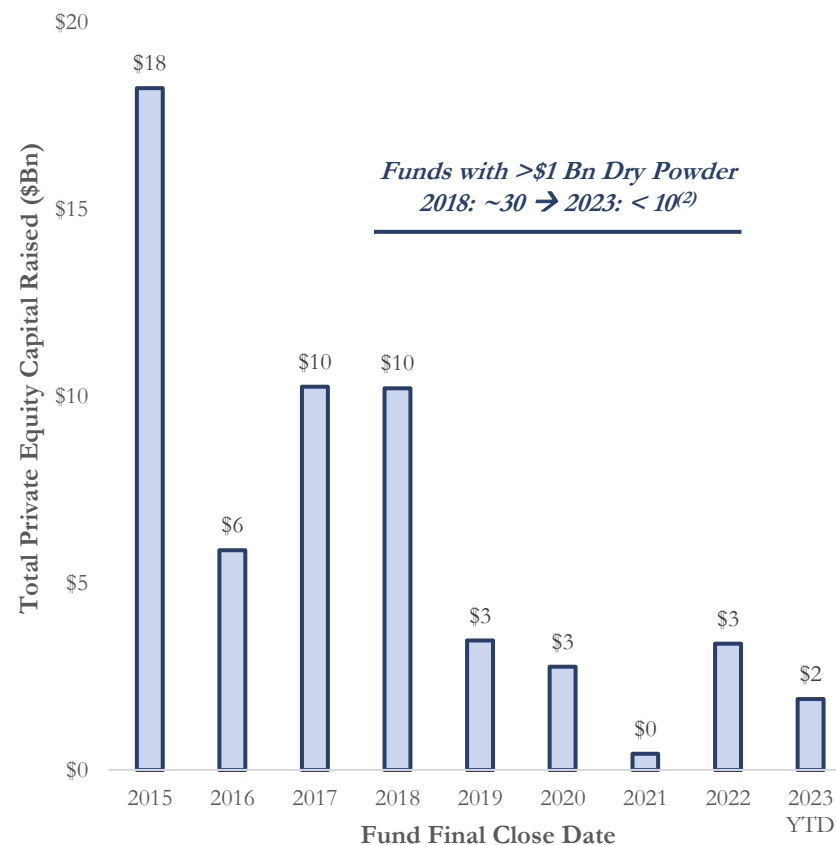

# Limited Capital Available to the Industry

- Public capital for E&P remains very limited
- E&P-focused private equity fundraising activity has slowed considerably

## Upstream – Public Equity Issuances

## Upstream – Private Equity Capital Raised

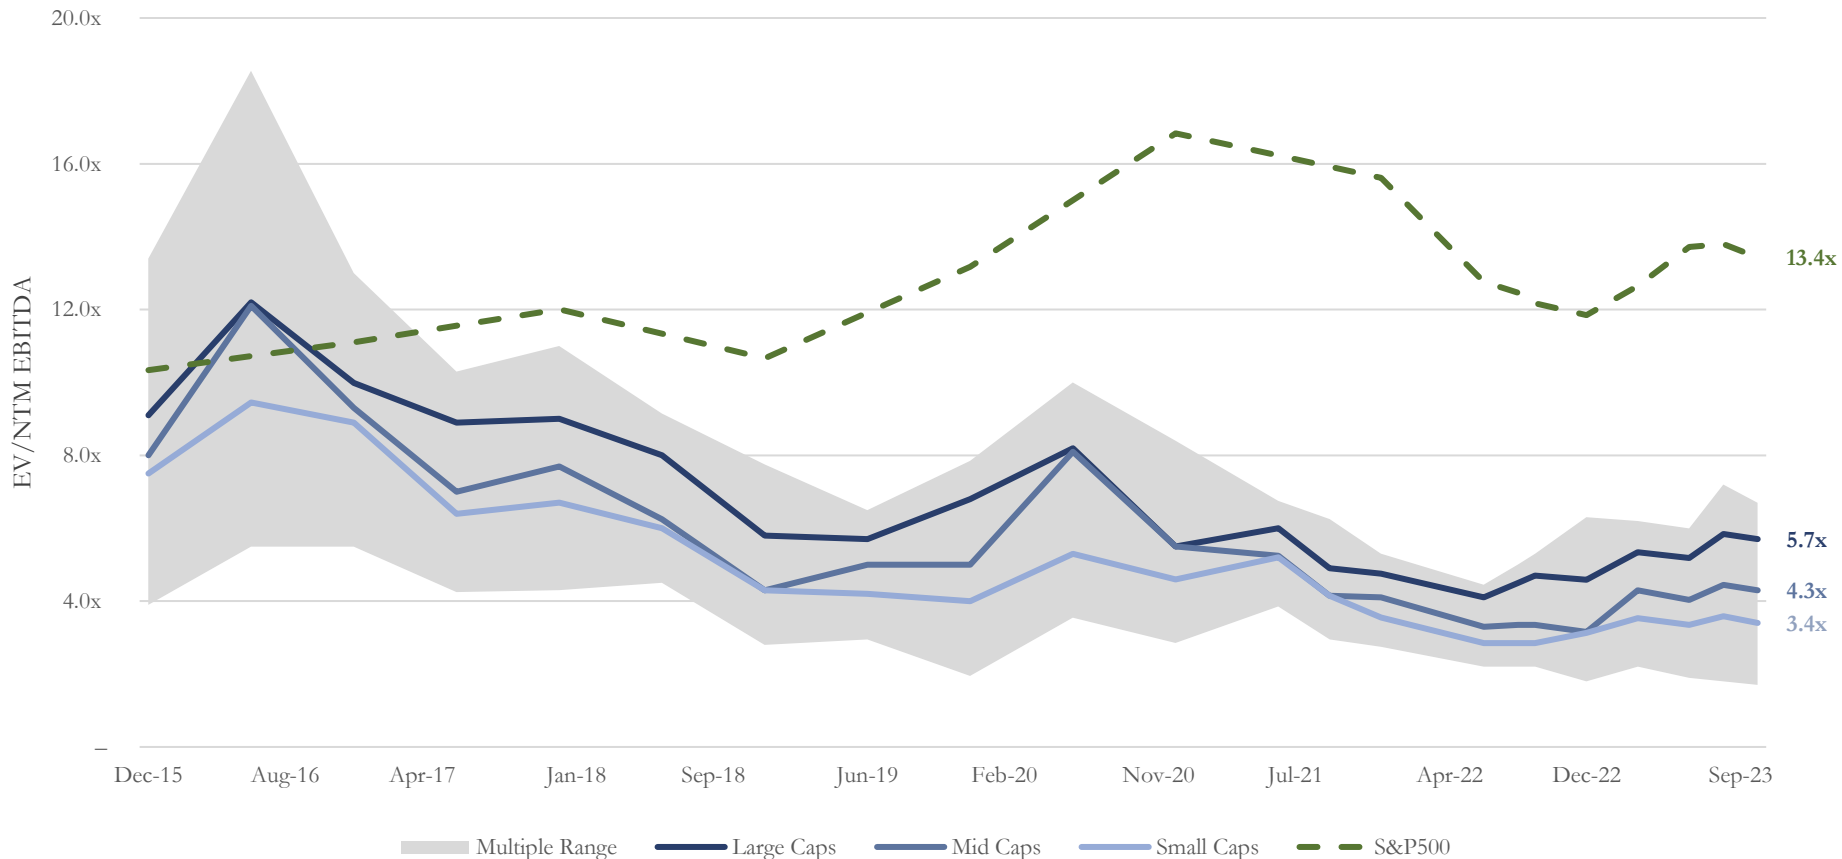

Source: Dealogic, RBC, Bloomberg, Pitchbook, and Preqin Pro. Market Data as of 9/30/2023.

- U.S. E&P companies with a market cap  $\geq$  \$500 million.
- RBC Richardson Barr internal database.

# Energy Valuations Remain at Historically Low Levels

- Despite energy being a top performing sector in the S&P 500 since January 2021, valuations remain persistently low
- Large caps trade significantly better than small-caps

## Historic EV/NTM EBITDA Ranges

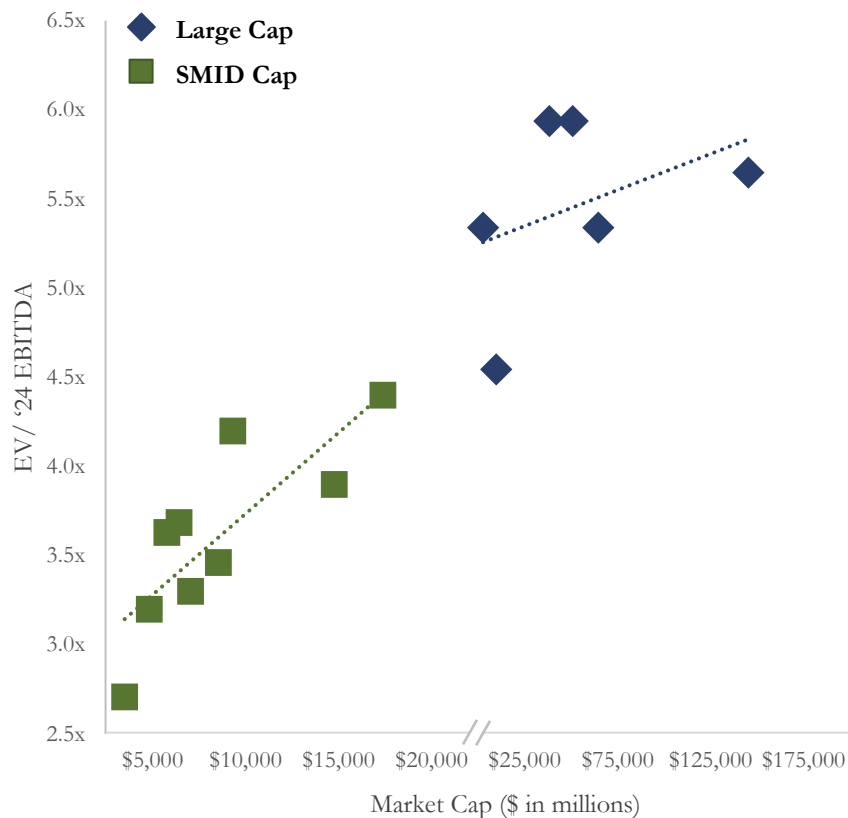

Source: Public filings, RBC Capital Markets, Wells Fargo, Enverus, and Wall Street research.

Note: Large Caps defined as Market Cap > \$20 billion; Mid Caps defined as Market Cap between \$5 and \$20 billion; Small Caps defined as Market Cap < \$5 billion.

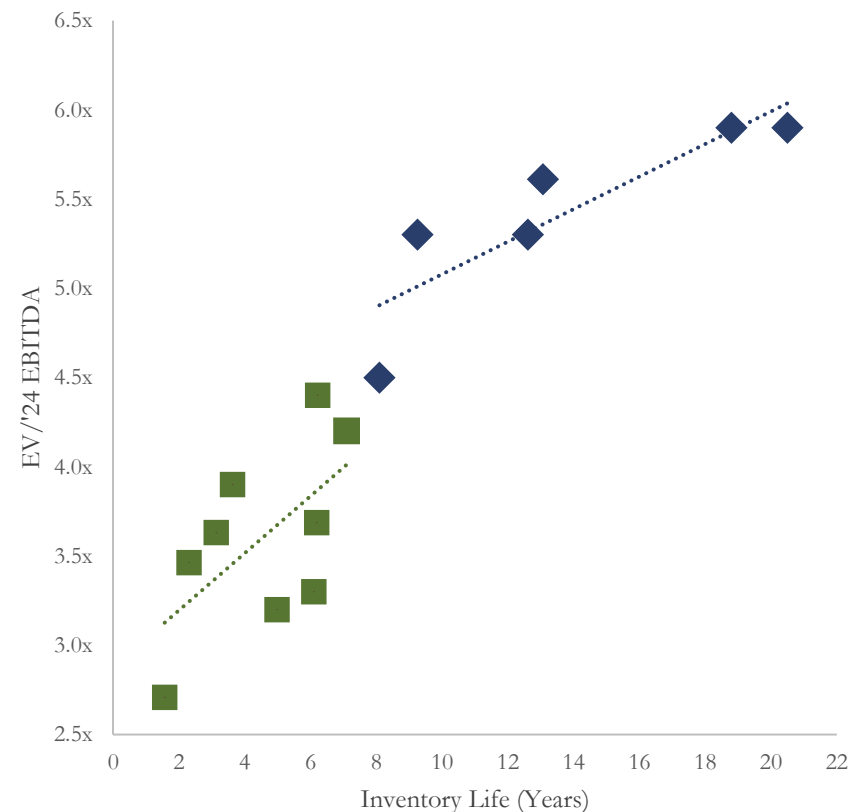

# Scale and Inventory Depth Driving Premiums for Publics

- SMID cap operators trade at a steep discount to larger peers
- Scale, trading volume, and extended inventory life needed to be relevant for large asset managers

Market Capitalization<sup>(1)</sup>

Tier-1 Inventory Life<sup>(2)</sup>

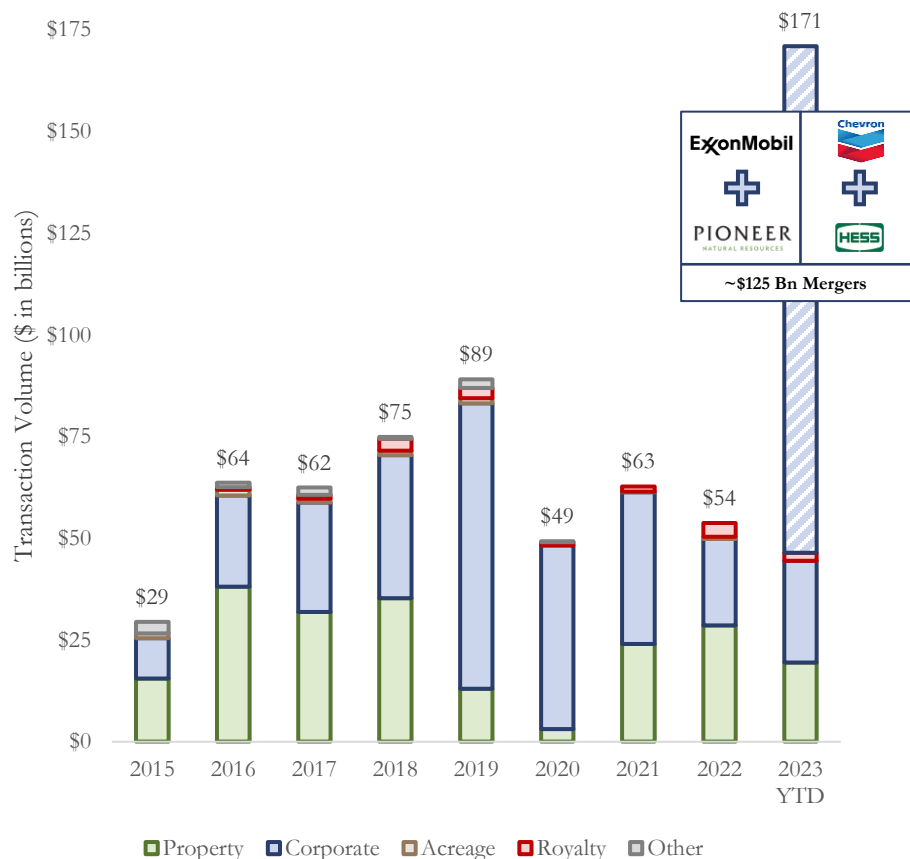

Source: Bloomberg, Enverus.

1. Large Cap defined as Market Cap > \$20 billion; SMID Cap defined as Market Cap < \$20 billion.
2. <\$50/bbl breakeven inventory life.

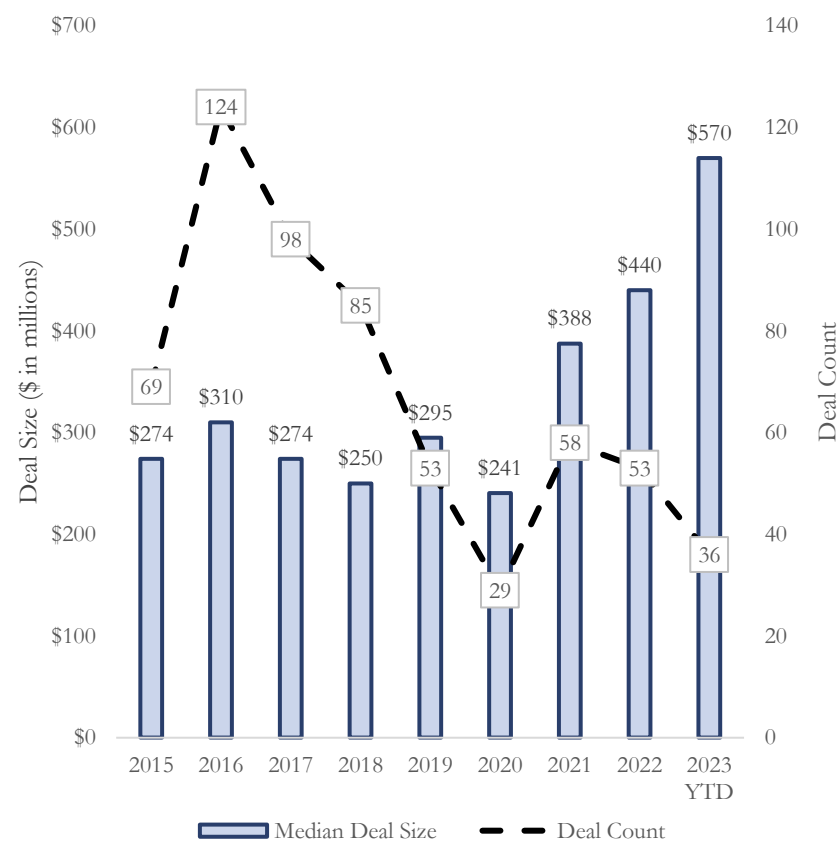

# M&A / A&D Market Dynamics

- Resurgence in M&A / A&D activity over the past 12 months
- Premium public buyers focused on transformational deals of scale

## A&D / M&A Since 2015<sup>(1)(2)</sup>

## Number of Deals & Deal Size Since 2015<sup>(1)</sup>

Source: Enverus, Dealogic, Wall Street research, and public filings. Market data as of 9/30/2023.

1. Excludes Offshore transactions and transactions less than \$100 million.

2. Other includes farm-outs and joint ventures.

## Strong Current Opportunity Set

### Property Acquisitions

Large scale asset acquisitions with substantial existing production and cash flow generation

*Ability to capture these deals at  
“hard value”  
2.0x to 3.0x EBITDA*

Significant running room with upside development locations received for limited to no cost

*~50% – 60% of Expected  
Investments*

### Lease & Develop

Ground floor leasing, bolt-on acquisitions, and other deals for undeveloped acreage and locations

*High margin environment creates  
extremely attractive drilling  
economics*

Arbitrage in acquiring core acreage for a low basis and converting to cash flow / distributions

# EnCap Portfolio Features Premier Operators Across the Lower 48

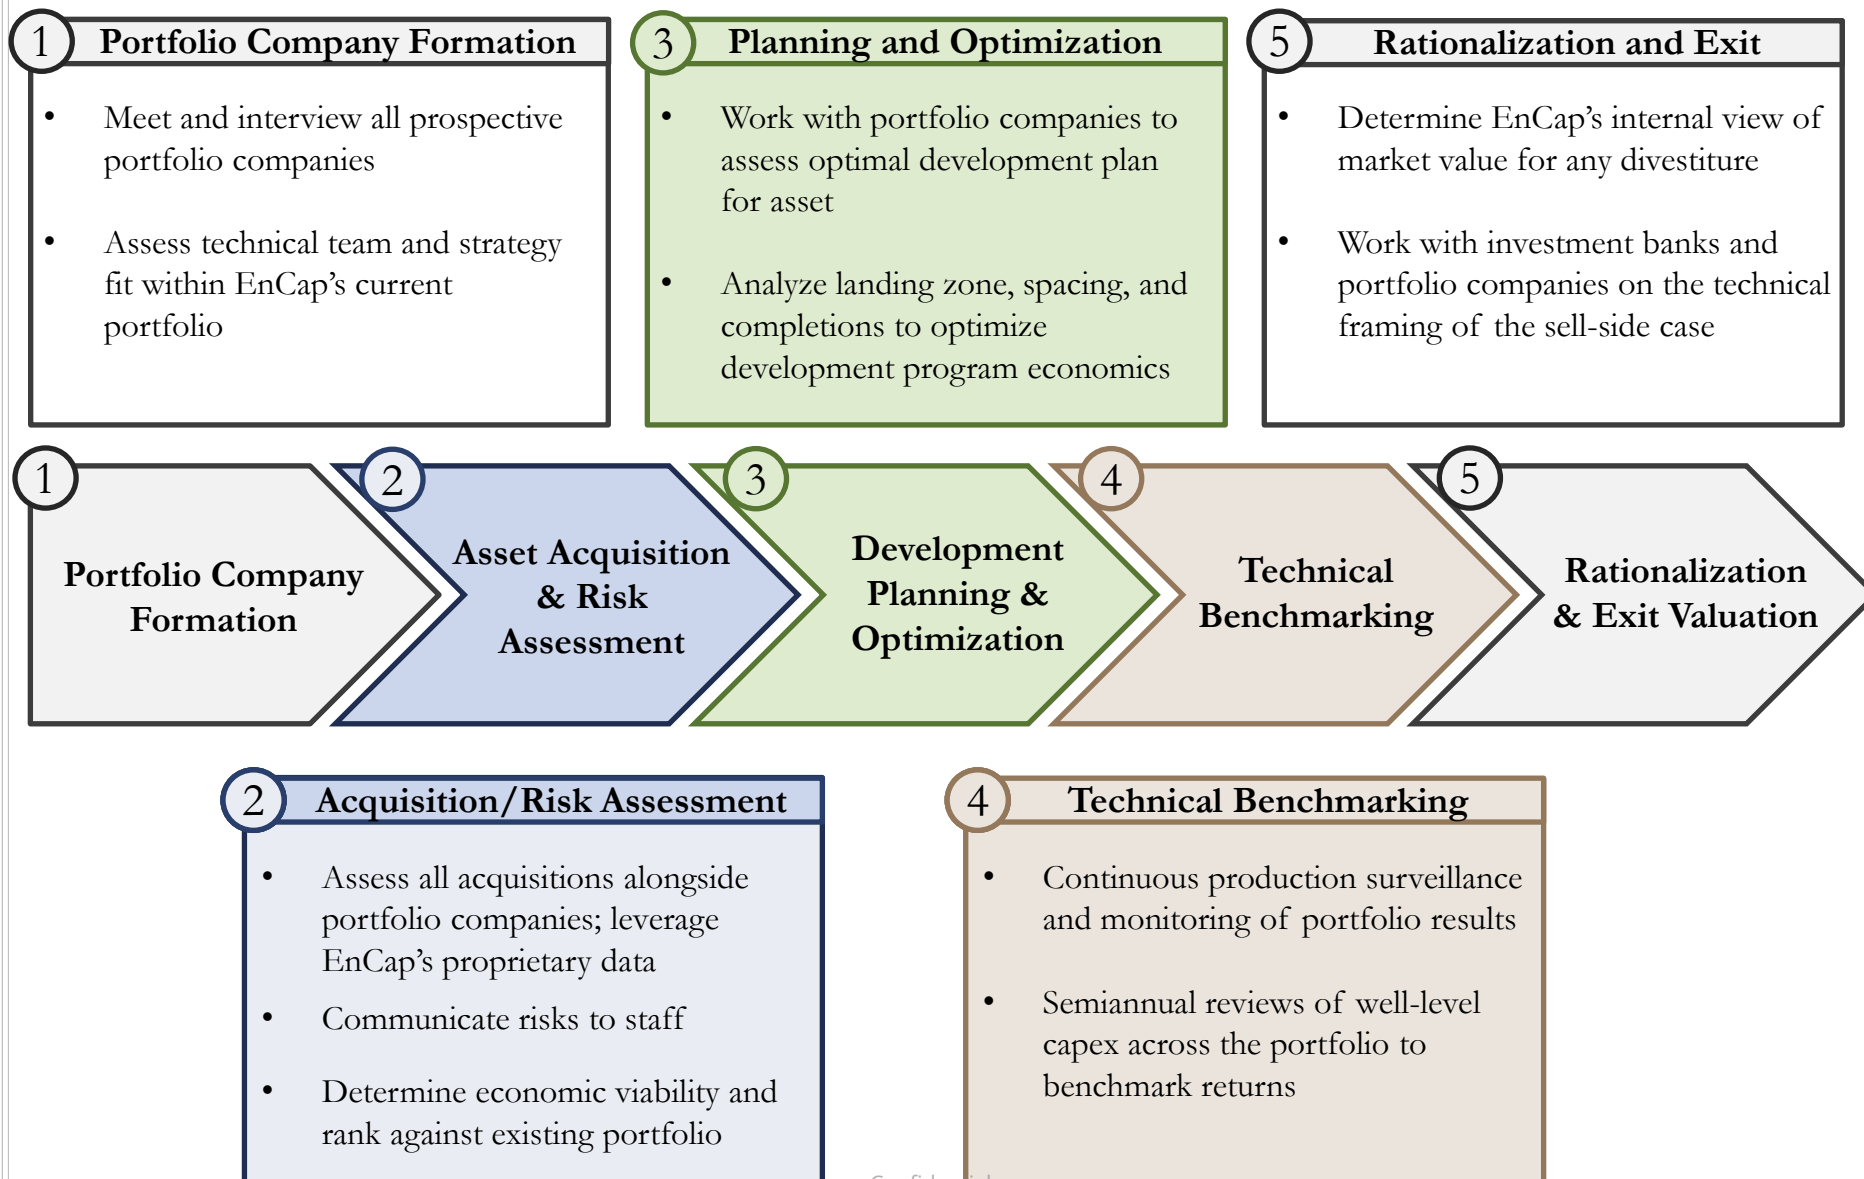

- Collectively, EnCap is one of the most active operators in the U.S. with 17 drilling rigs across 7 basins
- The technical team has built proprietary geologic and engineering databases in all major U.S. basins to facilitate efficient technical analysis and risk assessment

## Lower 48 Activity / EnCap Portfolio Company Activity

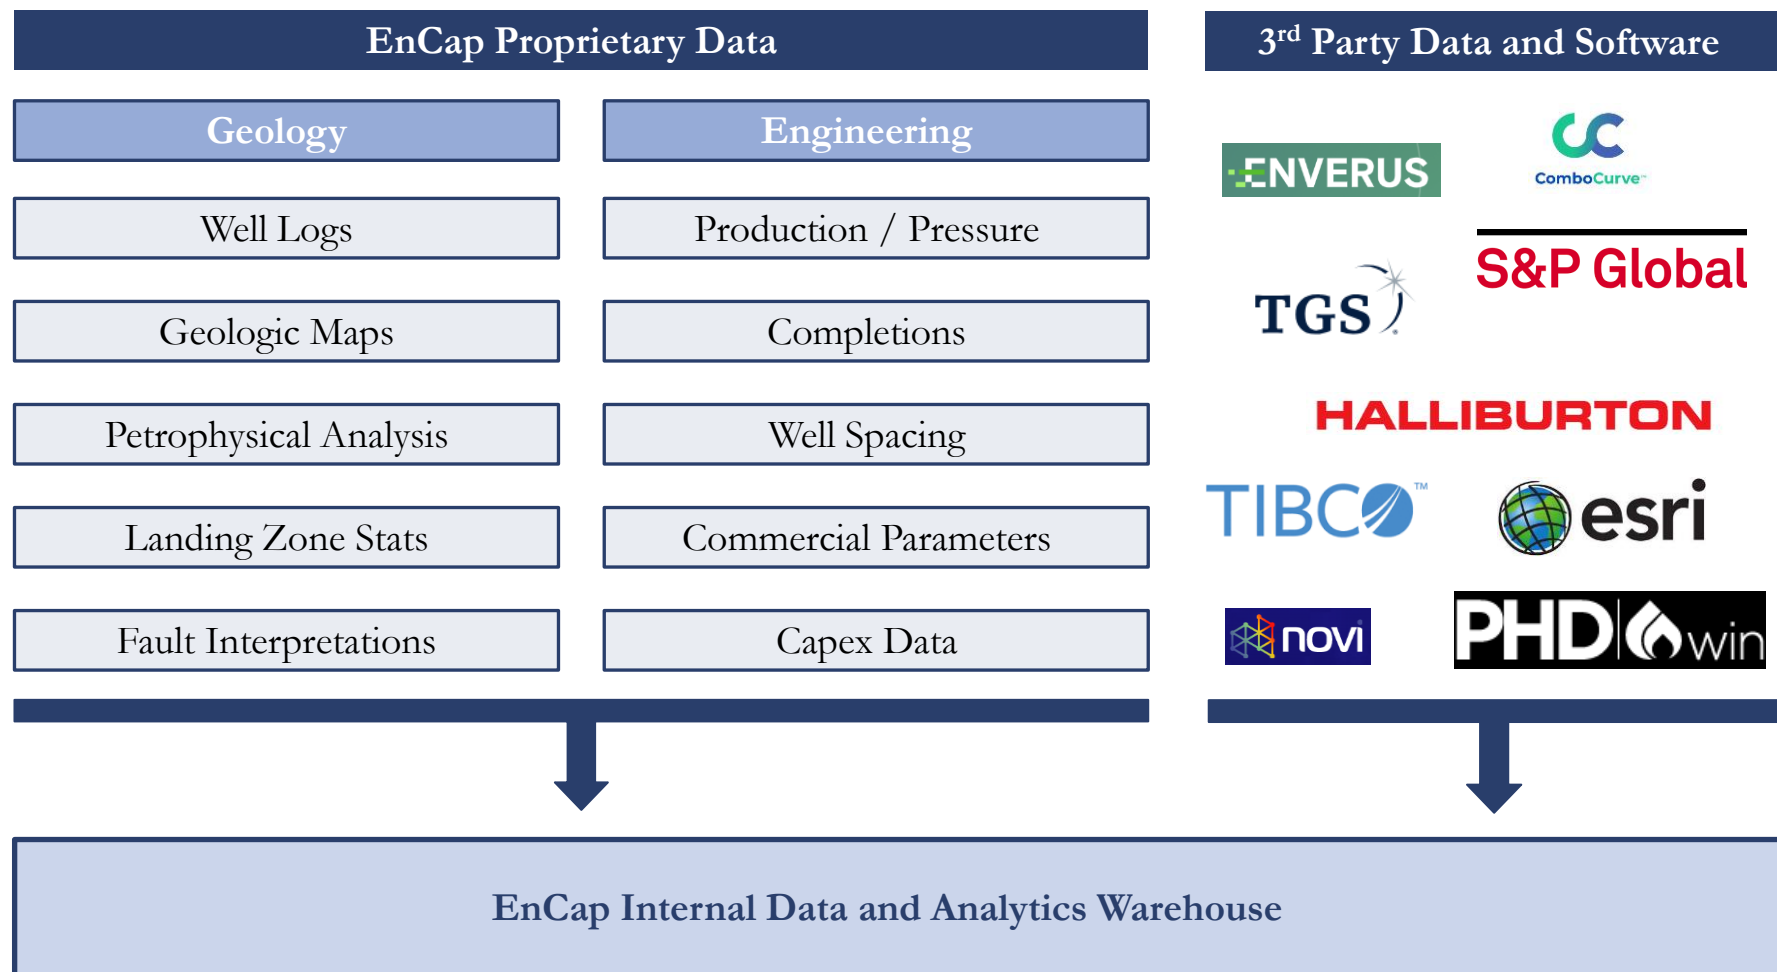

# Technical Team Integrated Throughout Company Lifecycle

## Proprietary Data and Analysis

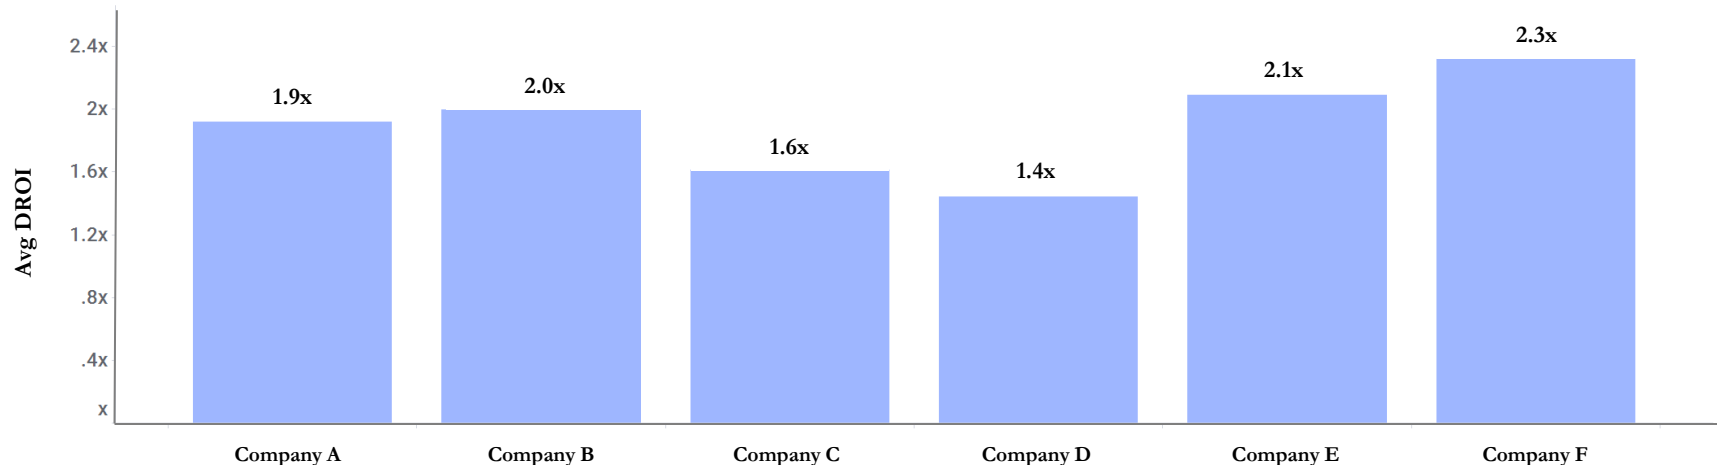

- EnCap has built an internal repository of geologic and engineering data/analytics across all major U.S. Basins that drives efficient and accurate technical analysis
- Portfolio companies are also able to leverage EnCap data/analytics when evaluating an investment

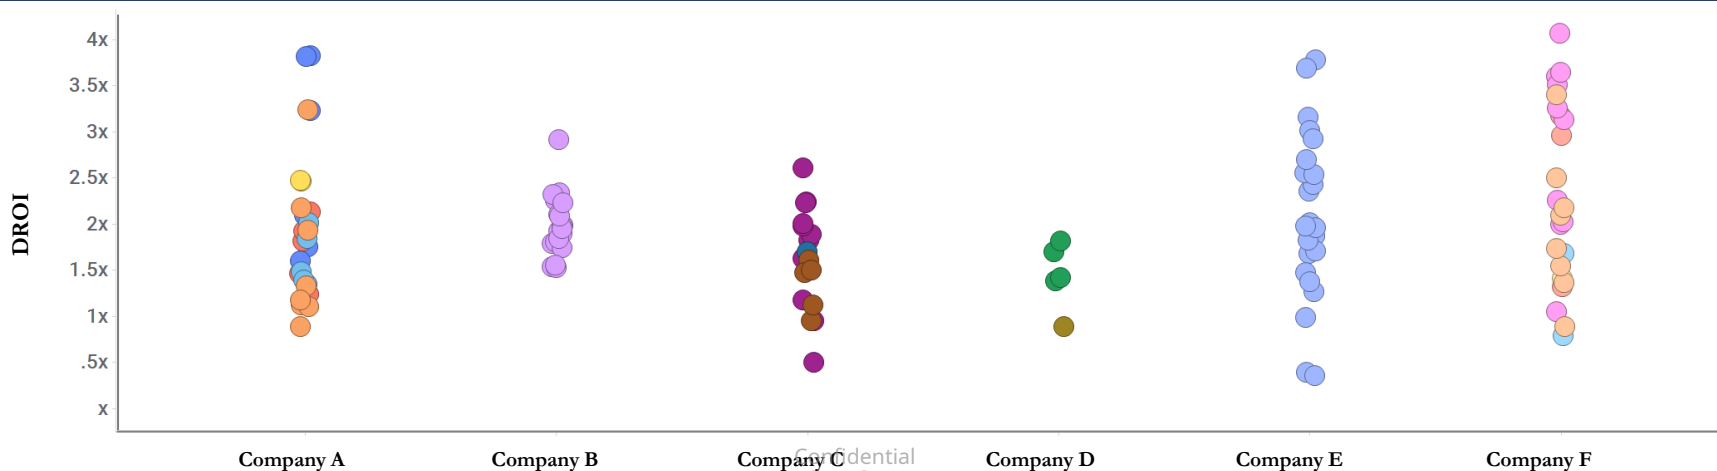

# Capital Investment Reviews and Portfolio Benchmarking

- The EnCap technical team is continuously performing lookback analysis on capital investments by forecasting production/cashflow from drilled wells to benchmark performance of teams within the portfolio

## Average DROI by Portfolio Company (\$75/\$3.50)

## DROI by Portfolio Company – Scatter by Well, Colored by Reservoir

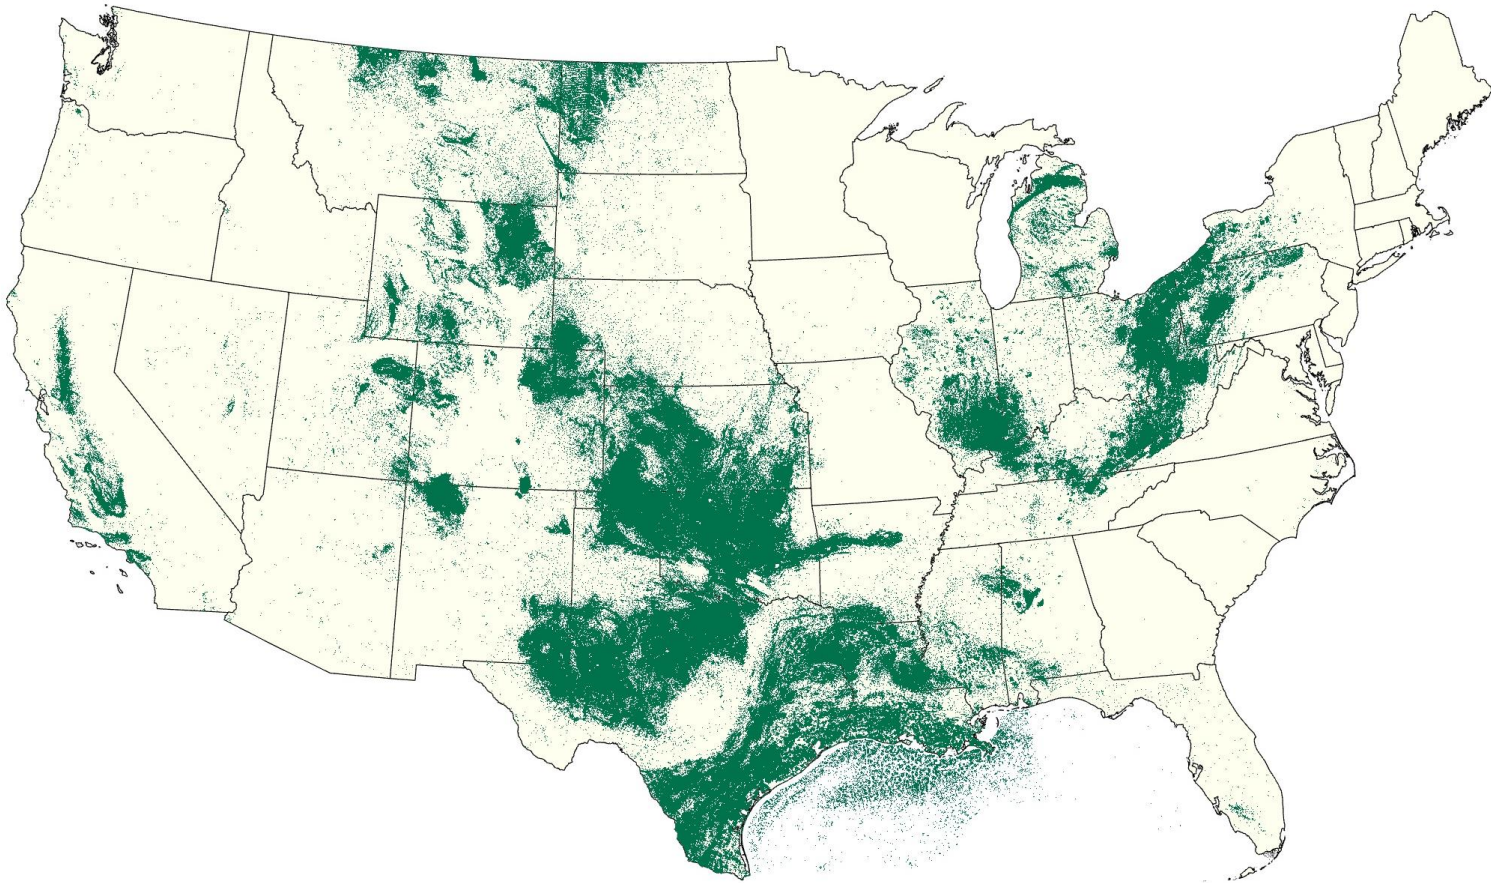

# EnCap Data Control Across the United States

- EnCap has access to over 2.8 million public and proprietary data points across the U.S. that form the backbone of the databases that EnCap uses to perform technical analysis and risk assessment
- Every green dot on the map represents a data point where EnCap has access to well logs and oil & gas production data

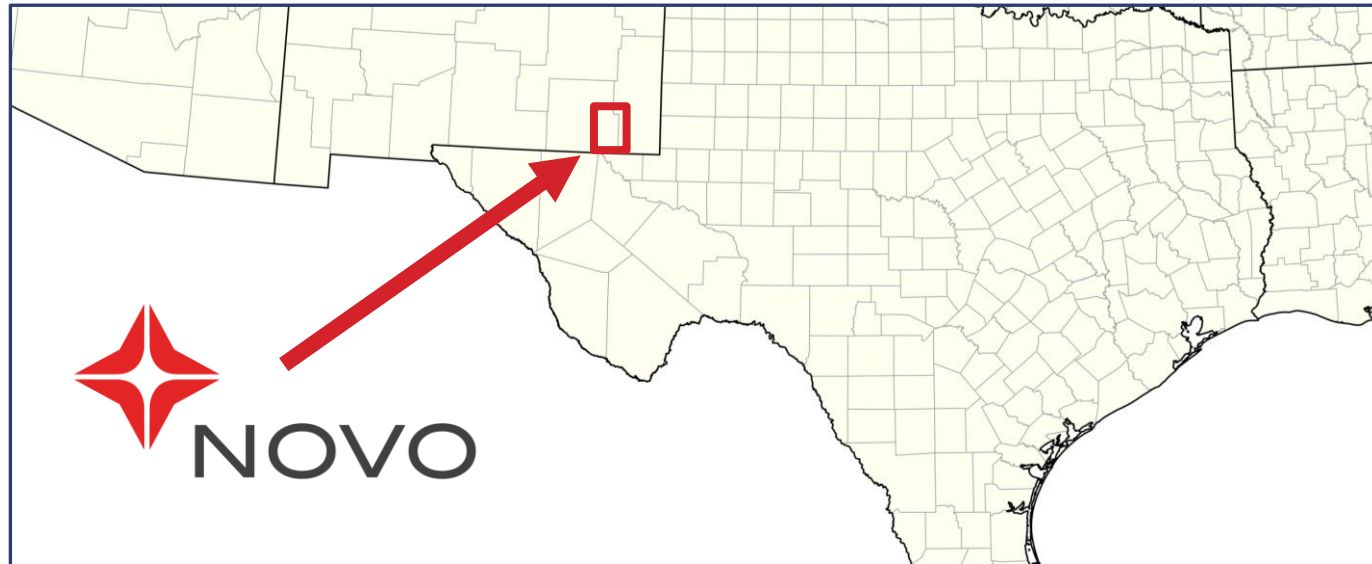

## Lower 48 Activity Log Locator Map

## Case Study: Novo Oil and Gas

- In May 2019, Novo (Fund X) materially expanded its footprint in the Delaware Basin
- The EnCap technical team worked directly with Novo to evaluate well productivity and subsurface risk

### Novo Oil and Gas Asset Locator

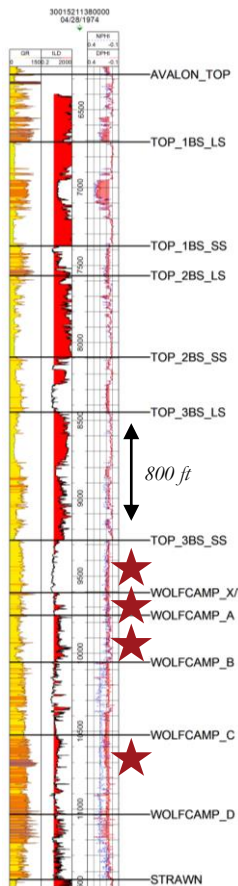

### Novo Company Lifecycle

# Data Control Around Novo at Time of Acquisition (May 2019)

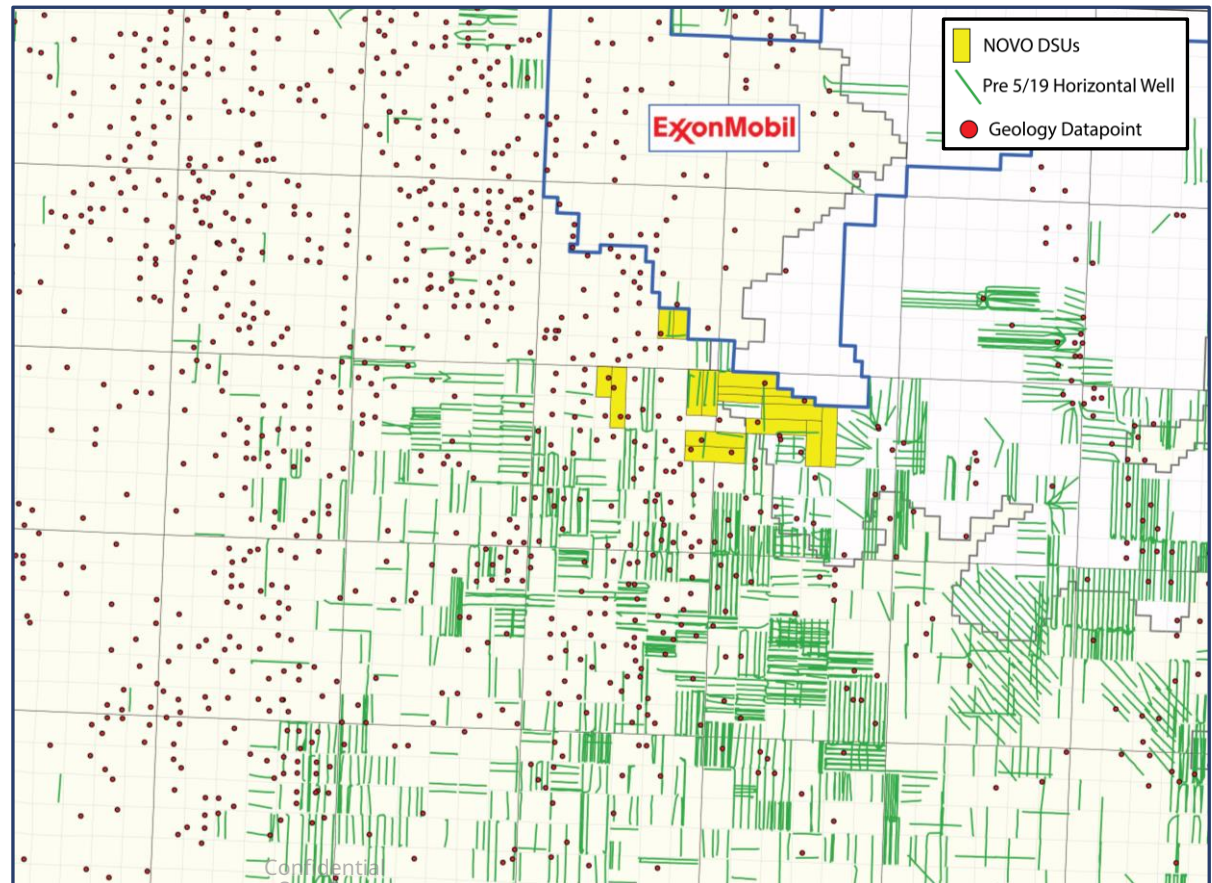

- Novo's flagship Delaware Basin acquisition was underwritten on four proven landing zones defined by significant amounts of production data
- Novo worked alongside the EnCap technical team to characterize the key subsurface risks and upside opportunities
- The Novo acquisition offered exposure to great geology & upside the market was undervaluing / underappreciating

## Type Log

## Novo Area Activity Map

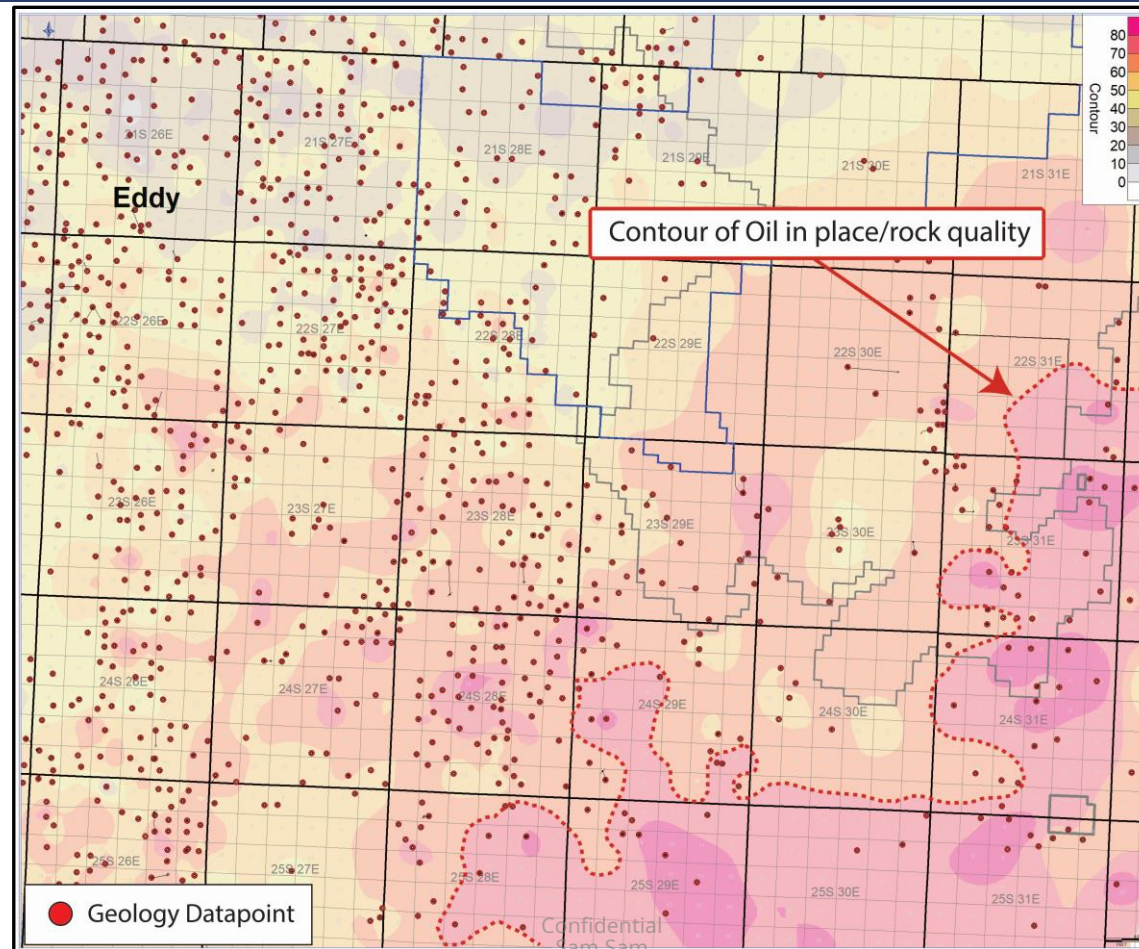

## Proprietary Geologic Map Example at Time of Acquisition (May 2019)

- EnCap leveraged its proprietary geologic data and Novo's expertise to characterize the reservoir and prospective zones over the acquisition opportunity
- The porosity-thickness map below is used to quantify oil-in-place across a geographic area

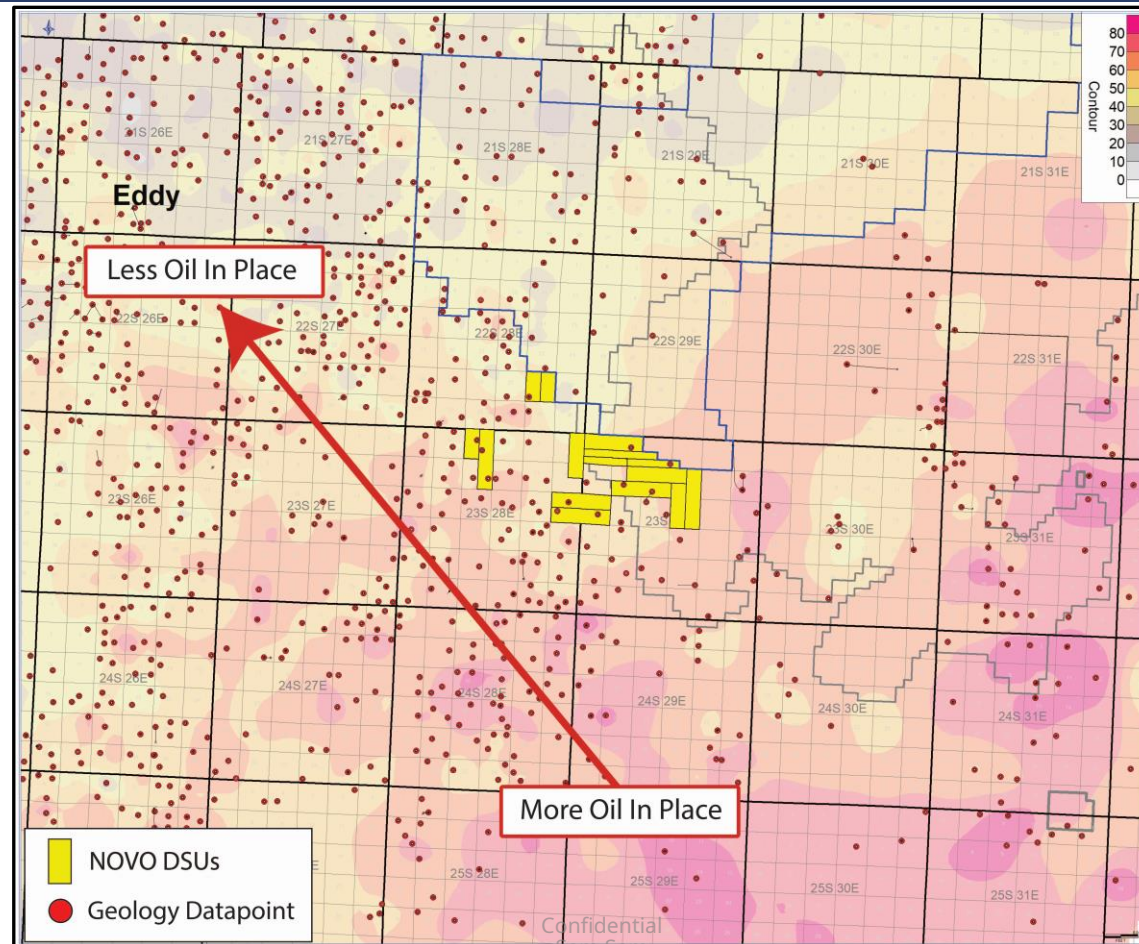

### Novo Area Porosity-Thickness Map

## Proprietary Geologic Map Example at Time of Acquisition (May 2019)

- EnCap and Novo concluded the acquisition offered exposure to ideal geology and was derisked through significant vertical well control
- EnCap's underwriting valued four distinct landing zones and 16 total wells per mile

### Novo Area Porosity-Thickness Map

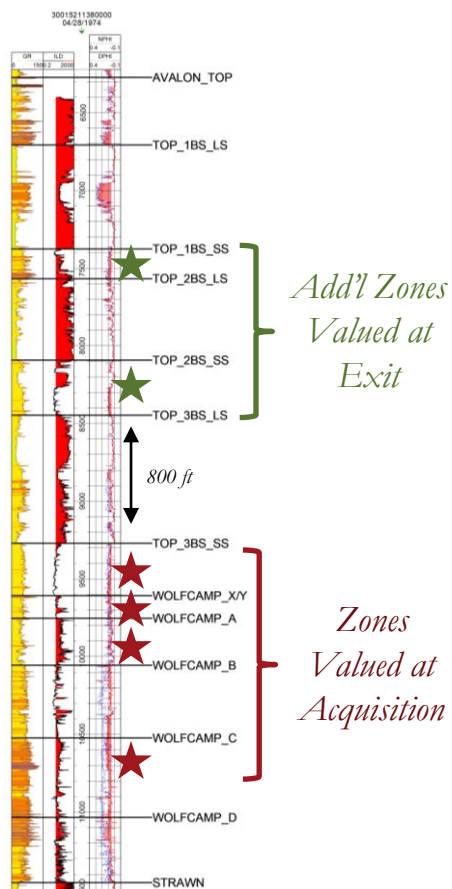

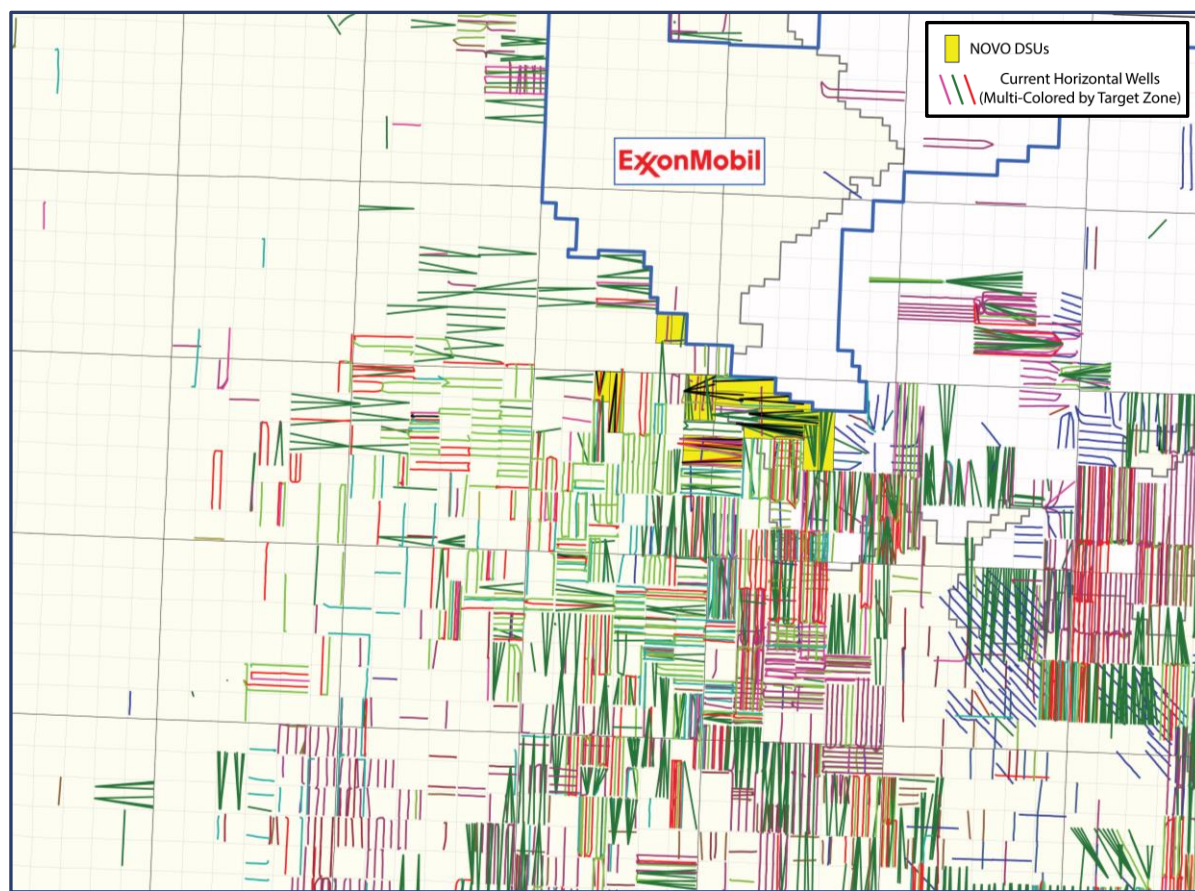

## Data Control Around Novo at Time of Divestiture (August 2023)

- Offset activity increased significantly following Novo's acquisition in 2019
- Operators focused on the four zones EnCap underwrote; however, Novo helped delineate two additional landing zones
- When EnCap exited the investment, buyers allocated value to all six landing zones

### Type Log

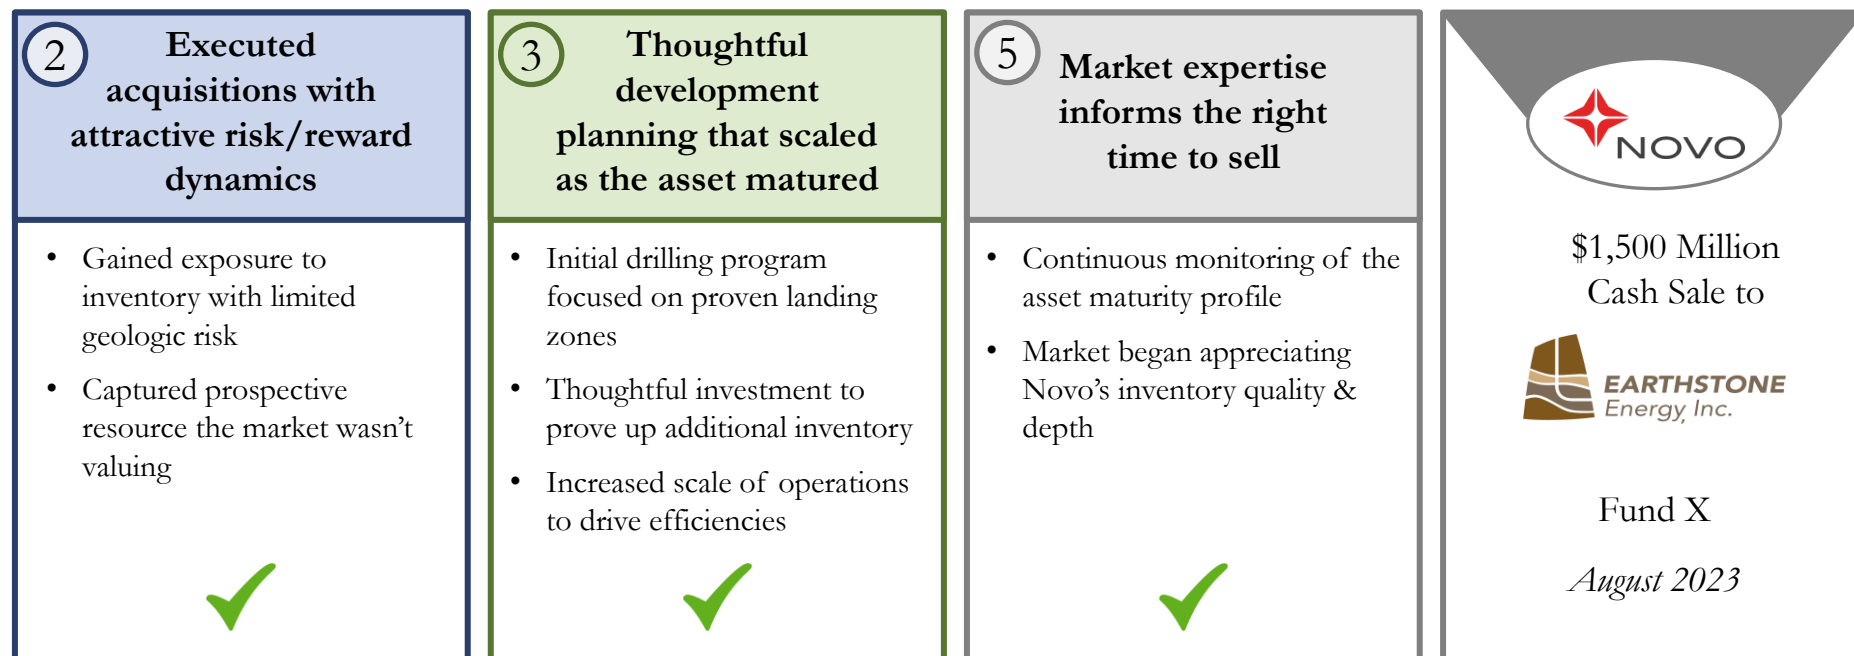

### Novo Area Activity Map

## Case Study: Novo

- Novo was ultimately sold to Earthstone and Northern for \$1.5 Billion in August 2023
- This process is a useful case study for how the technical team works with portfolio companies to add value
