To Whom It May Concern:

eSentire is the leading provider in Managed Detection and Response, the most comprehensive way to defend organizations from cyber threats. We monitor, detect, respond to, and contain threats across your rapidly evolving IT environment. With over 1,500 customers, over \$6.5 trillion USD in assets under protection, and over one million investigations monthly, we earn our global reputation daily. Our clients include organizations in finance, legal, healthcare, utilities, engineering, construction, energy, resources, technology, retail, entertainment, and government, among other industries.

As an information systems security expert eSentire has independence and credibility that set it apart from competitors. This is a crucial distinction: unlike many large companies whose primary business is integration, implementation, or product sales, with security as a sideline, eSentire focuses exclusively on security issues daily and has done so since 2001. eSentire's reliable advice and sound recommendations are the result of careful analysis of the clients' systems in the context of a potentially hostile environment.

A summary of our teams' credentials include:

- Certified Information Systems Auditor (CISA)
- Certified Information Systems Security Professional (CISSP)
- Certified Information Security Manager (CISM)
- Systems Security Certified Practitioner (SSCP)
- Offensive Security Certified Professional (OSCP)

eSentire, Inc. was engaged by Encap Investments to perform an External vulnerability assessment against Encap Investments' external infrastructure, including deep analysis of the attack surface through a variety of threat vectors. This assessment was performed during the month of April 2023 and we are pleased to report that as a result Encap Investment was found to be not susceptible to external attack through known high or critical vulnerabilities.
